

## JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

**Bulletin of the American Mathematical Society** is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and has a department of research announcements. Invited addresses offered for publication should be sent to HANS F. WEINBERGER, Dept. of Mathematics, University of Minnesota, Minneapolis, MN 55455. Book reviews should be sent to PAUL R. HALMOS, Dept. of Mathematics, Indiana University, Bloomington, IN 47401. Research announcements are limited to 100 typed lines of 65 spaces each, including references. They are intended to communicate outstanding results that are to be reported in full elsewhere. Research announcements should be sent directly to a member of the Council of the American Mathematical Society, who is also a member of an editorial committee of the Society. The names of these council members together with the first two digits of the subject field from the AMS (MOS) Subject Classification Scheme (1970) in which they are prepared to consider manuscripts are on the inside back cover. All other correspondence about research announcements should be sent to OLGA TAUSSKY TODD, American Mathematical Society, Department of Mathematics, 253-37, California Institute of Technology, Pasadena, CA 91125.

The first page of each article, including research announcements, that is submitted for publication should bear a *descriptive title* which should be short, but informative. Useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Before the first footnote, there should be the AMS (MOS) *subject classification numbers* representing the primary and secondary subjects of the article. If a list of *key words and phrases* describing the subject matter of the article is included, it will also be printed as a footnote on the first page. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to MATHEMATICAL REVIEWS, index to volume 39 (1970). See the June 1970 NOTICES for more details, as well as illustrative examples.

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. NONE. 90% of the papers currently being communicated by the editors will be published in 3-4 months.

**Proceedings of the American Mathematical Society** is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet. Papers in algebraic and differential topology should be sent to REINHARD E. SCHULTZ, Dept. of Mathematics, Purdue University, West Lafayette, IN 47907; in **combinatorics and discrete mathematics** to JAY R. GOLDMAN, School of Mathematics, University of Minnesota, Minneapolis, MN 55455; in **commutative algebra** to ROBERT M. FOSSUM, Dept. of Mathematics, University of Illinois, Urbana, IL 61801; in complex variables and analytic number theory to LOUIS BRICKMAN, Dept. of Mathematics, State University of New York at Albany, Albany, NY 12203 or to LAWRENCE A. ZALCMAN, Dept. of Mathematics, University of Maryland, College Park, MD 20742; in differential equations to RICHARD K. MILLER, Dept. of Mathematics, Iowa State University, Ames, IA 50010; in functional analysis and operator theory to CHANDLER DAVIS, Dept. of Mathematics, University of California at Berkeley, Berkeley, CA 94720 or to RONALD G. DOUGLAS, Dept. of Mathematics, State University of New York at Stony Brook, Stony Brook, NY 11790 or to PETER A. FILLMORE, Dept. of Mathematics, Dalhousie University, Halifax, Nova Scotia, Canada; in general algebra to BARBARA L. OSOFSKY, Dept. of Mathematics, Rutgers University, New Brunswick, NJ 08903; in general analysis to RICHARD R. GOLDBERG, Dept. of Mathematics, University of Iowa, Iowa City, IA 52240; in general topology to DAVID J. LUTZER, Dept. of Mathematics, Texas Tech University, Lubbock, TX 79409 or to THOMAS A. CHAPMAN, Dept. of Mathematics, University of Kentucky, Lexington, KY 40506; in geometry to JOSEPH A. WOLF, Dept. of Mathematics, University of California, Berkeley, CA 94720; in group theory to NORMAN BLACKBURN, Dept. of Mathematics, The University, Manchester M13 9PL, England; in logic and foundations to K. JON BARWISE, Dept. of Mathematics, University of Wisconsin, Madison, WI 53706; in **probability and other fields** to NARESH JAIN, School of Mathematics, 127 Vincent Hall, University of Minnesota, Minneapolis, MN 55455; in **real variables** to RICHARD A. HUNT, Dept. of Mathematics, Purdue University, Lafayette, IN 47907. All other communications should be addressed to the Managing Editor BARBARA L. OSOFSKY at the above address.

**Mathematics of Computation** is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to

computation. In addition, reviews and notes in these and related fields are published. Prospective publications should be sent to the Editor, JAMES H. BRAMBLE, Center for Applied Mathematics, 275 Olin Hall, Cornell University, Ithaca, NY 14853.

**Mathematical Reviews** is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Each volume consists of six regular issues plus an index issue. Abstracts and reviews are grouped under subject headings.

**Transactions of the American Mathematical Society** is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Papers in real analysis (excluding harmonic analysis) and applied mathematics should be sent to ROBERT T. SEELEY, Dept. of Mathematics, University of Massachusetts at Boston, College I, Columbia Point, Dorchester, MA 02125; in harmonic and complex analysis to HUGO ROSSI, Dept. of Mathematics, University of Utah, Salt Lake City, UT 84112; in abstract analysis to ALEXANDRA BELLOW, Dept. of Mathematics, Northwestern University, Evanston, IL 60201; in algebra and number theory (excluding universal algebras) to STEPHEN S. SHATZ, Dept. of Mathematics, University of Pennsylvania, Philadelphia, PA 19174; in logic, foundations, universal algebras and combinatorics to SOLOMON FEFERMAN, Dept. of Mathematics, Stanford University, Stanford, CA 94305; in topology to PHILIP T. CHURCH, Dept. of Mathematics, Syracuse University, Syracuse, NY 13210; in global analysis and differential geometry to VICTOR W. GUILLEMIN, c/o Mrs. M. McQuillin, Dept. of Mathematics, Harvard University, Cambridge, MA 02138; in probability and statistics to DANIEL W. STROOCK, Dept. of Mathematics, University of Colorado, Boulder, CO 80302. All other communications to the editors should be addressed to the Managing Editor, STEPHEN S. SHATZ at the above address.

**Memoirs of the American Mathematical Society** is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. An issue of the MEMOIRS is made up of one or more numbers; a number contains either a single monograph or a group of cognate papers. Copy is supplied by the author; information on preparation of camera copy may be obtained by writing to the Editorial Department of the American Mathematical Society. Papers should be sent to the appropriate editor of TRANSACTIONS.

**Notices of the American Mathematical Society**, published eight times a year, announces the programs of the meetings of the Society. The NOTICES carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists. All communications should be addressed to the Editor, American Mathematical Society, P.O. Box 6248, Providence, RI 02940. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced that issue. These deadlines are published regularly on the inside front cover.

**Current Mathematical Publications**, issued biweekly, contains a subject-classified index of papers and books being published currently in mathematics.

#### CHAIRMEN OF PUBLICATION AND COMMUNICATION COMMITTEES

*Bulletin Editorial Committee:* Paul R. Halmos, Dept. of Mathematics, Indiana University, Bloomington, IN 47401

*Proceedings Editorial Committee:* Barbara L. Osofsky, Dept. of Mathematics, Rutgers University, New Brunswick, NJ 08903

*Transactions and Memoirs Editorial Committee:* Stephen S. Shatz, Dept. of Mathematics, University of Pennsylvania, Philadelphia, PA 19174

*Mathematical Reviews Editorial Committee:* D. J. Lewis, Dept. of Mathematics, University of Michigan, Ann Arbor, MI 48104

*Colloquium Editorial Committee:* Samuel Eilenberg, Columbia University, 522 Math., New York, NY 10027

*Mathematical Surveys Editorial Committee:* Edgar H. Brown, Jr., Dept. of Mathematics, Brandeis University, Waltham, MA 02154

*Mathematics of Computation Editorial Committee:* James H. Bramble, Dept. of Applied Mathematics, 275 Olin Hall, Cornell University, Ithaca, NY 14853

*Committee to Monitor Problems in Communication:* Leonard Gillman, Dept. of Mathematics, University of Texas at Austin, Austin TX 78712

*Representatives of the Society on the Board of Editors of the American Journal of Mathematics:* Hyman Bass, Dept. of Mathematics, Columbia University, New York, NY 10027; I. M. Singer, Dept. of Mathematics, Massachusetts Institute of Technology, Cambridge, MA 02139

*Executive Editor of Mathematical Reviews:* Jacob Burlak, 611 Church Street, Ann Arbor, MI 48104

*Editor of Translations Projects:* Ben Silver, American Mathematical Society, P.O. Box 6248, Providence, RI 02940

## CONTENTS

BERNARD HELFFER AND LUIGI RODINO. Elliptic pseudo differential operators degenerate on a symplectic submanifold.....	619
H. BREZIS AND F. E. BROWDER. Singular Hammerstein equations and maximal monotone operators.....	623
MARIO MILMAN. Tensor products of function spaces.....	626
RONALD GARIEPY AND WILLIAM P. ZIEMER. A gradient estimate at the boundary for solutions of quasilinear elliptic equations.....	629
G. A. EDGAR AND L. SUCHESTON. The Riesz decomposition for vector-valued amarts.....	632
M. L. WAGE, W. G. FLEISSNER AND G. M. REED. Normality versus countable paracompactness in perfect spaces.....	635

## COUNCIL, 1976

### PUBLICATIONS COMMITTEES\*

Robert G. Bartle (26, 28, 46, 47), Hyman Bass† (18), Alexandra Bellow (46, 47), James H. Bramble (65, 35), Edgar H. Brown, Jr. (55, 57), Alberto P. Calderón (26, 42, 44, 35), Thomas A. Chapman (57A, 57C), S. S. Chern† (53), Philip T. Church (54, 55, 57, 58), Chandler Davis (15, 41, 47, 65F), Samuel Eilenberg (18, 68), Solomon Feferman (02A–K, 04, 18A), Robert M. Fossum (12, 13, 14, 16, 18), Walter Gautschi (65D, F, L, Q), Richard R. Goldberg (40, 42, 43, 44, 46J), Paul R. Halmos (02, 04, 15, 28, 46, 47), Alston S. Householder (15A03–24, 65F, 65H05), D. J. Lewis (10), Richard K. Miller (33, 35, 46, 77), Barbara L. Osofsky (16, 18, 13), Maxwell A. Rosenlicht (12, 12H05, 14, 15, 20G), Jacob T. Schwartz (68, 93, 94), Robert T. Seeley (35, 33, 46, 47), Stephen S. Shatz (14, 13, 12), I. M. Singer (46, 53, 58), Daniel W. Stroock (60, 62), Olga Taussky Todd (12, 15), Hans F. Weinberger (35, 45, 49), Joseph A. Wolf (22, 53), John W. Wrench, Jr. (10.25, 33, 65.05, 65.25).

### OTHER MEMBERS OF THE COUNCIL

Paul T. Bateman, Lipman Bers, R. H. Bing, Charles W. Curtis, David Gale, Leonard Gillman, Walter H. Gottschalk, Mary W. Gray, Judy Green, Phillip A. Griffiths, Orville G. Harrold, Jr., Herbert B. Keller, Robion C. Kirby, Lee Lorch, John W. Milnor, Louis Nirenberg, Karl K. Norton, Franklin P. Peterson, Everett Pitcher, Murray H. Protter, Kenneth A. Ross, Hugo Rossi, Lee A. Rubel, Jane Cronin Scanlon, Barry Simon, Daniel Waterman, Guido L. Weiss, J. Ernest Wilkins, Jr.

---

\* Research announcements, limited to 100 typed lines of 65 spaces each, may be submitted to those members of the Council who are members of the publications committees. Such announcements are intended to communicate outstanding results that are to be reported in full elsewhere. Each communicator has a quota of six per calendar year.

†1976 quota exhausted.

July, 1976

## BOOK REVIEWS

JOHN HORVÁTH. <i>Topological vector spaces</i> by A. Grothendieck.....	515
LARS GÅRDING. <i>Partial differential equations</i> by E. T. Copson.....	521
PETER ROQUETTE. <i>Elliptic functions</i> by Serge Lang.....	523
W. H. GUSTAFSON. <i>Maximal orders</i> by I. Reiner.....	526
LEONARD GILLMAN. <i>The Stone-Čech compactification</i> by Russell C. Walker.....	530
F. W. GEHRING. <i>Variation totale d'une fonction</i> by Michel Bruneau.....	532
JONATHAN D. LUBIN. <i>Commutative formal groups</i> by Michel Lazard.....	535
ROBERT E. BARNHILL. <i>Methods of numerical integration</i> by Philip J. Davis and Philip Rabinowitz.....	538
L. C. YOUNG. <i>Methods of optimization</i> by G. R. Walsh.....	540
Elections to Membership.....	541

## RESEARCH ANNOUNCEMENTS

ALAN WEINSTEIN. The principal symbol of a distribution.....	548
JULIUS ZELMANOWITZ. An extension of the Jacobson density theorem.....	551
ALFRED W. HALES. Ultrafilters and abelian groups.....	554
GERALD S. STOLLER. Form of solutions to the $p$ -adic equation $y' = 0$ .....	557
STEPHEN S. SHATZ. Degeneration and specialization in algebraic families of vector bundles.....	560
DANIEL M. OBERLIN. Random rearrangements of Fourier coefficients.....	563
I. C. GOHBERG AND L. E. LERER. Resultants of matrix polynomials.....	565
M. ZIEGLER. A language for topological structures which satisfies a Lindström-theo- rem.....	568
HERMAN GLUCK AND DAVID SINGER. Deformations of geodesic fields.....	571
T. FIGIEL, J. LINDENSTRAUSS AND V. D. MILMAN. The dimension of almost spherical sections of convex bodies.....	575
ROBERT C. REILLY. Applications of the integral of an invariant of the Hessian.....	579
MARSHALL SLEMROD. Existence, uniqueness, stability for a simple fluid with fading memory.....	581
JOHN MACBAIN. Global bifurcation theorems for nonlinearly perturbed operator equations.....	584
I. GOHBERG, M. A. KAASHOEK AND D. C. LAY. Spectral classification of opera- tors and operator functions.....	587
ROBERT GORDON AND EDWARD L. GREEN. Indecomposable modules: modules with cores.....	590
THOMAS JECH AND KAREL PRIKRY. On ideals of sets and the power set opera- tion.....	593
W. F. LUCAS. Disconnected solutions.....	596
DAVID SINGER AND HERMAN GLUCK. The existence of nontriangulable cut loci	599
FREDERICK BLOOM. Stability and growth estimates for Volterra integrodifferen- tial equations in Hilbert space.....	603
ROBERT LEE WILSON. The roots of a simple Lie algebra are linear.....	607
GEORGE S. SACERDOTE. A characterization of the subgroups of finitely presented groups.....	609
JOHN R. HARPER AND JAMES P. LIN. Two torsion in $H$ -spaces.....	612
BUCK WARE. Infinite dimensional versions of two theorems of Carl Siegel.....	613
LUIS A. CAFFARELLI. The regularity of elliptic and parabolic free boundaries.....	616
