

# BULLETIN OF THE BELGIAN MATHEMATICAL SOCIETY

## SIMON STEVIN

### CONTENTS – Vol 21, No 1 (2014)

|                                                                                                                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Y. YE – C.-L. TANG. Periodic solutions for second order Hamiltonian systems with general superquadratic potential.                                    | 1   |
| X.-M. LI – H.-X. YI. Certain meromorphic functions sharing a nonconstant polynomial with their linear polynomials.                                    | 19  |
| J. LIU – Y. WEI. Spacelike hypersurfaces with nonzero constant $k$ -th mean curvature and two distinct principal curvatures in anti-de Sitter spaces. | 39  |
| X. YANG – H. CHEN. Existence of periodic solutions for a damped vibration problem with $(q, p)$ -Laplacian.                                           | 51  |
| J. CHEN – A. RASILA – X. WANG. Starlikeness and convexity of polyharmonic mappings.                                                                   | 67  |
| N. G. ALBUQUERQUE. Maximal lineability of the set of continuous surjections.                                                                          | 83  |
| D. BULACU – B. TORRECILLAS. On Doi-Hopf modules and Yetter-Drinfeld modules in symmetric monoidal categories.                                         | 89  |
| R. MORTINI. The mapping properties of some non-holomorphic functions on the unit disk.                                                                | 117 |
| Z. KAMONT. Functional differential inequalities with partial derivatives.                                                                             | 127 |
| T. CIAŚ. Right inverses for partial differential operators on spaces of Whitney functions.                                                            | 147 |
| A. K. MISHRA – M. M. SOREN. Coefficient bounds for bi-starlike analytic functions.                                                                    | 157 |
| P. ZAPRAWA. On the Fekete-Szegő problem for classes of bi-univalent functions.                                                                        | 169 |
| E. KO – E. K. LEE – R. SHIVAJI – B. SON. Uniqueness of positive solutions for a singular nonlinear eigenvalue problem when a parameter is large.      | 179 |
| B. IVARSSON – F. KUTZSCHEBAUCH. On Kazhdan's Property (T) for the special linear group of holomorphic functions.                                      | 185 |
