VOL. 7 • NO. 4 *DECEMBER 1963*

ILLINOIS JOURNAL OF MATHEMATICS

a quarterly journal published by the
UNIVERSITY OF ILLINOIS, URBANA

edited by

REINHOLD BAER
ROBERT G. BARTLE
PAUL T. BATEMAN
D. G. BOURGIN
S. S. CHERN
PETER HILTON

ILLINOIS JOURNAL OF MATHEMATICS

Manuscripts

Original research papers in pure and applied mathematics intended for publication in this journal may be written in English, French, German, or Italian. They should be addressed to the Illinois Journal of Mathematics, University of Illinois, Urbana, Illinois, or to one of the editors:

REINHOLD BAER, 6243 Falkenstein im Taunus, Gartenstrasse 11, Germany.

ROBERT G. BARTLE, Department of Mathematics, University of Illinois, Urbana, Illinois.

PAUL T. BATEMAN, Department of Mathematics, University of Illinois, Urbana, Illinois.

D. G. BOURGIN, Department of Mathematics, University of Illinois, Urbana, Illinois.

S. S. CHERN, Department of Mathematics, University of California, Berkeley 4, California.

PETER HILTON, Department of Mathematics, Cornell University, Ithaca, New York.

All papers should be typewritten, double spaced, and the author should keep a complete copy. Bibliography and footnotes should be typed, double spaced, on separate sheets of paper.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Reprints

One hundred free reprints are supplied to the sole author of a paper; fifty free reprints are supplied to each author of a joint paper. Additional reprints may be purchased from Waverly Press.

The ILLINOIS JOURNAL OF MATHEMATICS is published quarterly by the University of Illinois. Entered as second-class matter June 4, 1957 at the post office at Urbana, Illinois, under the act of August 24, 1912. Office of publication, University of Illinois Press, Urbana, Ill.

CONTENTS

Volume 7 1963

Pages

ARENS, RICHARD, Representation of moments by integrals . . . 609–614

AUSLANDER, M. and RIM, D. S., Ramification index and multiplicity. 566–581

BASS, HYMAN, Big projective modules are free. 24– 31

BAXTER, GLEN, A norm inequality for a "finite-section" Wiener-Hopf equation 97–103

BLACKWELL, DAVID and DUBINS, LESTER E., A converse to the dominated convergence theorem 508–514

BLUMENTHAL, R. M., GETOOR, R. K., and MCKEAN, H. P., JR., A supplement to "Markov processes with identical hitting distributions" 540–542

BRENNER, J. L., g-circulant matrices over a field of prime characteristic 174–179

BROWDER, WILLIAM and THOMAS, EMERY, On the projective plane of an H-space 492–502

CARLITZ, L., The distribution of irreducible polynomials in several indeterminates 371–375

CHASE, STEPHEN U., Function topologies on abelian groups . . . 593–608

CURJEL, C. R., On the homology decomposition of polyhedra. . . 121–136

CURTIS, CHARLES W., An isomorphism theorem for certain finite groups 279–304

DAVIS, MARTIN, Extensions and corollaries of recent work on Hilbert's tenth problem 246–250

DAVIS, MARTIN and PUTNAM, HILARY, Diophantine sets over polynomial rings 251–256

DEKKER, J. C. E., An infinite product of isols 668–680

DUBINS, LESTER E., with BLACKWELL, DAVID, A converse to the dominated convergence theorem 508–514

FONG, PAUL, A note on splitting fields of representations of finite groups 515–520

Pages

FUCHS, W. H. J., Proof of a conjecture of G. Pólya concerning gap series 661–667

GETOOR, R. K., with BLUMENTHAL, R. M. and MCKEAN, H. P., JR., A supplement to "Markov processes with identical hitting distributions" 540–542

GLEASON, ANDREW M., Universal locally connected refinements. . 521–531

GORDON, WILLIAM R., with MARCUS, MARVIN, Generalizations of some combinatorial inequalities of H. J. Ryser 582–592

GRANIRER, E., On amenable semigroups with a finite-dimensional set of invariant means I 32– 48

———, On amenable semigroups with a finite-dimensional set of invariant means II 49– 58

HAMSTROM, MARY-ELIZABETH, A decomposition theorem for E^4 . . 503–507

HIGMAN, GRAHAM, Suzuki 2-groups 79– 96

HU, SZE-TSEN, Immersions of compact metric spaces into Euclidean spaces 415–424

ITÔ, K. and MCKEAN, H. P., JR., Brownian motions on a half line . 181–231

JENKINS, JAMES A., On some span theorems 104–117

KAHN, DONALD W., The existence and applications of anticommutative cochain algebras 376–395

KAN, DANIEL M., On the k-cochains of a spectrum 479–491

———, Semisimplicial spectra 463–478

KIST, JOSEPH, Representations of archimedean function rings. . . 269–278

KNIGHT, FRANK, Markov processes on an entrance boundary. . . 322–336

MCKEAN, H. P., JR., with BLUMENTHAL, R. M. and GETOOR, R. K., A supplement to "Markov processes with identical hitting distributions" 540–542

MCKEAN, H. P., JR., with ITÔ, K., Brownian motions on a half line . 181–231

MAC NERNEY, J. S., Integral equations and semigroups. 148–173

MAHLER, KURT, On two extremum properties of polynomials. . . 681–701

MARCUS, MARVIN and GORDON, WILLIAM R., Generalizations of some combinatorial inequalities of H. J. Ryser 582–592

Pages

MARCUS, MARVIN and MINC, HENRYK, Disjoint pairs of sets and incidence matrices 137–147

MEYER, P. A., Decomposition of supermartingales: The uniqueness theorem 1– 17

MICHAEL, J. H., The equivalence of two areas for nonparametric discontinuous surfaces 59– 78

MINC, HENRYK, with MARCUS, MARVIN, Disjoint pairs of sets and incidence matrices 137–147

MURTHY, M. PAVAMAN, Modules over regular local rings 558–565

NISHIURA, TOGO, On the Cesari-Cavalieri inequality. 702–713

PARTHASARATHY, K. R., RAO, R. RANGA, and VARADHAN, S. R. S., Probability distributions on locally compact abelian groups. . 337–369

PERESSINI, ANTHONY L., A note on abstract (M)-spaces 118–120

PITCHER, T. S., Likelihood ratios for stochastic processes related by groups of transformations 396–414

PUTNAM, HILARY, with DAVIS, MARTIN, Diophantine sets over polynomial rings 251–256

RAO, R. RANGA, with PARTHASARATHY, K. R. and VARADHAN, S. R. S., Probability distributions on locally compact abelian groups. 337–369

RAY, DANIEL, Sojourn times of diffusion processes 615–630

REMAGE, RUSSELL, JR., An extension of a fine-cyclic additivity theorem for a functional 548–557

RIM, D. S., with AUSLANDER, M., Ramification index and multiplicity 566–581

RUDIN, WALTER, The extension problem for positive-definite functions 532–539

SALZMANN, HELMUT, Characterization of the three classical plane geometries 543–547

SCHECHTER, MARTIN, On the theory of differential boundary problems. 232–245

SCHMIDT, WOLFGANG M., Correction to my paper, "On the Minkowski-Hlawka theorem" 714

———, On the Minkowski-Hlawka theorem 18– 23

SCHWARZENBERGER, R. L. E., Jacobians and symmetric products . 257–268

STONE, CHARLES, Limit theorems for random walks, birth and death processes, and diffusion processes 638–660

———, The set of zeros of a semistable process 631–637

THOMAS, EMERY, with BROWDER, WILLIAM, On the projective plane of an H-space 492–502

VARADHAN, S. R. S., with PARTHASARATHY, K. R. AND RAO, R. RANGA, Probability distributions on locally compact abelian groups 337–369

WOLF, JOSEPH A., Elliptic spaces in Grassmann manifolds. . . . 447–462

———, Geodesic spheres in Grassmann manifolds. 425–446

YOOD, BERTRAM, Noncommutative Banach algebras and almost periodic functions 305–321
