

CONTENTS

Yasumasa AKAGAWA , On the number of fundamental relations with respect to minimal generators of a p -group	1
Richard BRAUER , On pseudo groups	13
M. EICHLER , A new proof of the Baker-Campbell-Hausdor formula	23
Tsuyoshi HAYASHIDA , A class number associated with the product of an elliptic curve with itself	26
Hiroaki HIJIKATA , On certain groups with involutive generators	44
Heisuke HIRONAKA and Hideyuki MATSUMURA , Formal functions and formal embeddings	52
Taira HONDA , Isogeny classes of abelian varieties over finite fields	83
Jun-ichi IGUSA , On the algebraic theory of elliptic modular functions	96
Yasutaka IHARA , The congruence monodromy problems	107
Makoto ISHIDA , On rational points of homogeneous spaces over finite fields	122
Kiyosi ITO , The canonical modification of stochastic processes	130
Kenkichi IWASAWA , On explicit formulas for the norm residue symbol	151
Yukiyosi KAWADA , A remark on the principal ideal theorem	166
Kunihiko KODAIRA , Pluricanonical systems on algebraic surfaces of general type	170
Tomio KUBOTA , On a special kind of Dirichlet series	193
Sige-Nobu KURODA , Some results on p -extensions of algebraic number fields	208
Katsuhiko MASUDA , Application of the theory of the group of classes of projective modules to the existence problem of independent parameters of invariant	223
Takayoshi MITSUI , On the prime ideal theorem	233
Hisasi MORIKAWA , On the relation for two-dimensional theta constants of level three	248
Ryozo MORIKAWA , On the unit group of an absolutely cyclic number field of degree five	263
Masayoshi NAGATA , A type of integral extensions	266
Yoshikazu NAKAI , Notes on differential theoretic characterization of regular local rings	268

Takashi ONO , A mean value theorem in adèle geometry	275
Masaru OSIMA , On the generalized decomposition numbers of the symmetric group	289
Nobuo SASAKURA , On some results on the Picard numbers of certain algebraic surfaces	297
Ichiro SATAKE , On a certain invariant of the groups of type E_6 and E_7	322
Goro SHIMURA , Algebraic varieties without deformation and the Chow variety	336
Michio SUZUKI , A characterization of the simple groups $PSL(2, q)$	342
von Reiji TAKAHASHI , Über p -adische Kugelfunktionen und unitäre Darstellungen der Modulargruppen	350
Shuichi TAKAHASHI , Generation of Galois extensions by matrix roots	365
Itiro TAMURA , On the classification of sufficiently connected manifolds	371
Par Takashi TASAKA , Sur les groupes algébriques semi-simples	390
par Andre WEIL , Sur une formule classique	400
Toshihiko YAMADA , On the Davenport-Hasse curves	403
Hideo YOKOI , On the divisibility of the class number in an algebraic number field	411
Kosaku YOSIDA, Takeshi WATANABE and Hiroshi TANAKA , On the pre- closedness of the potential operator	419
