Index

Γ_q-structure 1
$\Gamma_q^{\mathbb{C}}$-structure 2
Γ-vector field 103
ξ_q 11

d_∇ 81
W_q 8
  the cohomology of — 15
$\mathrm{W}_q^{\mathbb{C}}$ 6
  the cohomology of — 15
WO_q 8
  the cohomology of — 15
WU_q 6
  a basis for $H^*(\mathrm{WU}_2)$ 18
  a basis for $H^*(\mathrm{WU}_3)$ 19
  $H^{2q+1}(\mathrm{WU}_q)$ 16

actual deformation 72

Bott class 3, **11**, 12
  the imaginary part of the — **11**, 21
  infinitesimal derivative of the — 101
Bott connection **4**, 30
  complex — 4
  infinitesimal derivative of a — 83
  locally homogeneous — 30
  real — 4
Bott vanishing theorem 6

canonical form 82
  infinitesimal derivative of the — 83
canonical line bundle 2
characteristic mapping **7**, 9
  universal — 10
Chern convention 121
Chern–Simons form 4
classifying mapping 10
cobordant xiv
codimension 1, 2
  complex — 2
  real — 1
complex normal bundle 2
complex secondary class 7
  infinitesimal derivative of —es 85
  residue of —es 104
connection
  basic 4
  basic X- — 104
  complex Bott — **4**, 30
  locally homogeneous — 29
  real Bott — 4
  unitary — 33

deformation 72, 82
  actual — 72
  holomorphic — 72
  infinitesimal — 82
  — preserving diffeomorphism type ... 73
  smooth — 72
  — of transverse holomorphic structures 73
DGA 6
Duminy's theorem 115

Fatou component 117
Fatou neighborhood **116**, 117
Fatou set 117
foliated transversely holomorphic vector field 81
  sheaf of germs of —s 81
foliation 1
  — atlas 1
  (G, H)- — 28
  homogeneous — 28
  locally homogeneous — 28
  transversely holomorphic — 2
  transversely $(G, G/H)$- — **28**, 36
  transversely homogeneous — 28

Fuks–Lodder–Kotschick class 111

$(G, G/H)$-foliation **28**, 36
  transversely — 28
(G, H)-foliation 28
Godbillon–Vey class **11**, 21
  example on G_2 53–58
  example on $\mathrm{SL}(q+1;\mathbb{C})$ 38–47
  example on $\mathrm{SO}(q+2;\mathbb{C})$ 47–49
  example on $\mathrm{Sp}(n+1;\mathbb{C})$, $q = 2n+1$ 50–52

homogeneous foliation 28
  locally — 28

infinitesimal deformation 82
  — associated with an actual family 97, 99
infinitesimal derivative
  — of the Bott class 101
  — of a Bott connection 83
  — of the canonical form 83
  — of complex secondary classes 85

Julia component 117
Julia set 117

leaf 1
locally homogeneous foliation 28

normal bundle 2
  complex — 2
  real — 2

polarization 121

residual class 14
residue 104
  — of ξ_1 118–119

secondary class **7**, 8
  complex — 7
  real — 8

transversely holomorphic foliation 2
  family of —s 72
  infinitesimal deformation of —s ... 73, **82**

Vey basis 15
