CONTENTS

P. R. Ahern, *On the generalized F. and M. Riesz theorem* . . 373
A. A. Albert, *On exceptional Jordan division algebras* 377
J. A. Anderson and G. H. Fullerton, *On a class of Cauchy exponential series* 405
David Arterburn and Robert Whitley, *Projections in the space of bounded linear operators* 739
Donald C. Benson, *Unimodular solutions of infinite systems of linear equations* 1
Robert J. Blattner, *Group extension representation and the structure space* 1101
Richard E. Block, *Transitive groups of collineations on certain designs* 13
R. M. Blumenthal, Joram Lindenstrauss and R. R. Phelps, *Extreme operators into C(K)* 747
Barry Boehm, *Existence of best rational Tchebycheff approximations* 19
J. P. Brannen, *A note on Hausdorff's summation methods*. . . 29
Glen E. Bredon, *On the continuous image of a singular chain complex* 1115
Dennison R. Brown, *Topological semilattices on the two-cell* . . 35
P. S. Bullen, *Some inequalities for symmetric means* 47
David G. Cantor, *On arithmetic properties of coefficients of rational functions* 55
David H. Carlson, *On real eigenvalues of complex matrices* . . 1119
L. Carlitz, *A note on multiple exponential sums* 757
Hsin Chu, *Fixed points in a transformation group* 1131
Joseph A. Cima, *A nonnormal Blaschke-quotient*. 767
Paul Civin and Bertram Yood, *Lie and Jordan structures in Banach algebras* 775
Luther Claborn, *Dedekind domains and rings of quotients* . . 59
Luther Claborn, *Dedekind domains: overrings and semi-prime elements* 799
Luther Claborn, *Note generalizing a result of Samuel's* 805
Allan Clark, *Homotopy commutativity and the Moore spectral sequence* 65
Allan Clark, *Hopf algebras over Dedekind domains and torsion in H-spaces* 419
R. W. Cottle, See G. B. Dantzig, E. Eisenberg and R. W. Cottle
Howard B. Curtis, Jr., *The uniformizing function for certain simply connected Riemann surfaces* 1137
G. B. Dantzig, E. Eisenberg and R. W. Cottle, *Symmetric dual*

nonlinear programs 809
John Dauns and David V. Widder, *Convolution transforms whose inversion functions have complex roots* 427
Philip J. Davis, *Simple quadratures in the complex plane* . . . 813
George W. Day, *Free complete extensions of Boolean algebras* . 1145
A. Devinatz, *The asymptotic nature of the solutions of certain linear systems of differential equations* 75
R. G. Douglas, *Contractive projections on an L_1 space* 443
R. E. Edwards, *Approximation by convolutions* 85
R. E. Edwards, *Changing signs of Fourier coefficients* 463
Edward G. Effros, *The Borel space of von Neumann algebras on a separable Hilbert space* 1153
E. Eisenberg, See G. B. Dantzig, E. Eisenberg and R. W. Cottle
E. Fadell, *On a coincidence theorem of F. B. Fuller* 825
Michel Mendès France, *A set of nonnormal numbers* 1165
D. R. Fulkerson and O. A. Gross, *Incidence matrices and interval graphs* 835
G. H. Fullerton, See J. A. Anderson and G. H. Fullerton
T. W. Gamelin, *Decomposition theorems for Fredholm operators* 97
R. Gangolli, *Sample functions of certain differential processes symmetric spaces* 477
Robert W. Gilmer, Jr., *Some containment relations between classes of ideals of a commutative ring* 497
J. L. Goldberg, *Polynomials orthogonal over a denumerable set* 1171
B. Gordon, *A generalization of the coset decomposition of a finite group* 503
Edmond Granirer, *On the invariant mean on topological semigroups and on topological groups* 107
Frederick P. Greenleaf, *Norm decreasing homomorphisms of group algebras* 1187
Fletcher Gross, *The 2-length of a finite solvable group* 1221
O. A. Gross, See D. R. Fulkerson and O. A. Gross
Larry C. Grove, *Tensor products over H^*-algebras* 857
Deborah Tepper Haimo, *L^2 expansions in terms of generalized heat polynomials and of their Appell transforms* 865
N. Hicks, *Closed vector fields* 141
Charles Hobby and Ronald Pyke, *Doubly stochastic operators obtained from positive operators* 153
Kenneth Hoffman and Arlan Ramsay, *Algebra of bounded sequences* 1239
Teruo Ikebe, *On the Phase-shift formula for the scattering operator* 511
I. M. Isaacs and D. S. Passman, *A characterization of groups in terms of the degrees of their characters* 877
M. Ishida, *On algebraic homogeneous spaces* 525

D. G. James, *Integral invariants for vectors over local fields* . 905
J. P. Jans, *Some aspects of torsion* 1249
R. F. Jolly, *Concerning periodic subadditive functions* 159
Donald W. Kahn, *Maps which induce the zero map on homotopy* 537
Toshio Kato, *Wave operators and unitary equivalence* 171
Paul Katz and Ernest G. Straus, *Infinite sums in algebraic structures* 181
Laura Ketchum Kodama, *Boundary Measures of analytic differentials and uniform approximation on a Riemann surface* 1261
Alan G. Konheim and Benjamin Weiss, *Functions which operate on characteristic functions* 1279
Frank Kosier, *Certain algebras of degree one* 541
Fred Krakowski, *A remark on the lemma of Gauss* 917
H. F. Kreimer, *On an extension of the Picard-Vessiot theory* . 191
Betty Kvarda, *An inequality for the number of elements in a sum of two sets of lattice points* 545
R. G. Laha and E. Lukacs, *On a linear form whose distribution is identical with that of a monomial* 207
R. Larsen, *Almost invariant measures* 1295
Y. -F. Lin, *Generalized character semigroups: The Schwarz decomposition* 1307
Joram Lindenstrauss, See R. M. Blumenthal, Joram Lindenstrauss and R. P. Phelps
Justin T. Lloyd, *Representation of lattice-ordered groups having a basis* 1313
Donald Ludwig, *Singularities of superpositions of distributions* 215
E. Lukacs, See R. G. Laha and E. Lukacs
Charles A. McCarthy, *The nilpotent part of a special operator, II* 557
K. McCrimmon, *Norms and noncommutative Jordan algebras* . 925
T. G. McLaughlin, *On relative coimmunity* 1319
Jonah Mann and Donald J. Newman, *The generalized Gibbs phenomenon for regular Hausdorff means* 551
Marvin Marcus and Henryk Mine, *A subdeterminant inequality* 921
Albert W. Marshall and Ingram Olkin, *Norms and inequalities for condition numbers* 241
Henryk Minc, See Marvin Marcus and Henryk Minc
Horace Mochizuki, *Finitistic global dimension for rings* . . . 249
Donald E. Myers, *Topologies for Laplace transform spaces* . . 957
Mitsuru Nakai, *Φ-bounded harmonic functions and classification of Riemann surfaces* 1329
Donald J. Newman, See Jonah Mann and Donald J. Newman
Olav Njåstad, *On some classes of nearly open sets* 961
Lino Gutierrez Novoa, *On n-ordered sets and order completeness* 1337

R. Oehmke and R. Sandler, *The collineation groups of division ring planes II: Jordan division rings* 259
Milton Philip Olson, *A characterization of conditional probability* 971
George H. Orland, *On non-convex polyhedral surfaces in* E^3 . . 267
B. L. Osofsky, *A counter-example to a lemma of Skornjakov* . 985
T. G. Ostrom, *Collineation groups of semi-translation planes* . 273
Fredos Papangelou, *Some considerations on convergence in abelian lattice group* 1347
D. S. Passman, *Isomorphic groups and group rings* 561
D. S. Passman, See I. M. Isaacs and D. S. Passman
R. M. Pederson, *Laplace's method for two parameters* 585
R. P. Phelps, See R. M. Blumenthal, Jordan Lindenstrauss and R. P. Phelps
T. S. Pitcher, *A more general property than domination for sets of probability measures* 597
Sidney C. Port, *Ratio limit theorems for Markov chains* . . . 989
Ronald Pyke, See Charles Hobby and Ronald Pyke
Arlan Ramsay, See Kenneth Hoffman and Arlan Ramsay
Frank Raymond, *Some remarks on the coefficients used in the theory of homology manifolds* 1365
G. A. Reid, *A generalisation of W-algebras* 1019
J. R. Ringrose, *On sub-algebras as a* C^**-algebra* 1377
Robert W. Ritchie, *Classes of recursive functions based on Ackermann's function* 1027
Jack M. Robertson, *Some topological properties of certain spaces of differentiable homomorphism of disks and spheres* . . 1383
Zalman Rubinstein, *Some results in the location of zeros of polynomials* 1391
Arthur A. Sagle, *On anti-commutative algebras and general Lie triple systems* 281
Arthur A. Sagle, *Remarks on simple extended Lie algebras* . . 613
Arthur A. Sagle, *On simple extended Lie algebras over fields of characteristic zero* 621
Arthur A. Sagle, *On simple algebras obtained from homogeneous general Lie triple systems* 1397
Toru Saito, *Proper ordered inverse semigroups* 649
Hans Samelson, *On small maps of manifolds* 1401
R. Sandler, See R. Oehmke and R. Sandler
Thomas L. Sherman, *Properties of solutions of N* th *order linear differential equations* 1045
O. Shisha, *Monotone approximation* 667
L. C. Siebenmann, *A characterization of free projective planes* . 293
Edward Silverman, *Simple areas* 299
Annette Sinclair, $[\varepsilon(z)]$*-closeness of approximation* 1405

I. Sinha, *Reduction of sets of matrices to a triangular form* . 673
James M. Sloss, *Chebyshev approximation to zero* 305
Raymond E. Smithson, *Some general properties of multi-valued functions* 681
Ernst Snapper, *Inflation and deflation for all dimensions* . . . 1061
Edsel Stiel, *Isometric immersions of manifolds of nonnegative constant sectional curvature* 1415
Robert S. Strichartz, *Isometric isomorphisms of measure algebras* 315
Ernst G. Straus, See Paul Katz and Ernst G. Straus
John Stuelpnagel, *Euclidean fiberings of solvmanifolds* 705
K. Sundaresan, *On the strict and uniform convexity of certain Banach spaces* 1083
Earl J. Taft, *Invariant splitting in Jordan and alternative algebras* 1421
Richard J. Turyn, *Character sums and difference sets* 319
Richard S. Varga, *Minimal Gerschgorin sets* 719
F. J. Wagner, *Maximal convex filters in a locally convex space* 1087
L. E. Ward, Jr., *Concerning Koch's theorem on the existence of arcs* 347
L. E. Ward, Jr., *On a conjecture of R. J. Koch* 1429

Mathematical papers intended for publication in the *Pacific Journal of Mathematics* should by typewritten (double spaced). The first paragraph or two must be capable of being used separately as a synopsis of the entire paper. It should not contain references to the bibliography. Manuscripts may be sent to any one of the four editors. All other communications to the editors should be addressed to the managing editor, Richard Arens, at the University of California, Los Angeles, California 90024.

50 reprints per author of each article are furnished free of charge; additional copies may be obtained at cost in multiples of 50.

The *Pacific Journal of Mathematics* is published quarterly, in March, June, September, and December. Effective with Volume 13 the price per volume (4 numbers) is $18.00; single issues, $5.00. Special price for current issues to individual faculty members of supporting institutions and to individual members of the American Mathematical Society: $8.00 per volume; single issues $2.50. Back numbers are available.

Subscriptions, orders for back numbers, and changes of address should be sent to Pacific Journal of Mathematics, 103 Highland Boulevard, Berkeley 8, California.

Printed at Kokusai Bunken Insatsusha (International Academic Printing Co., Ltd.), No. 6, 2-chome, Fujimi-cho, Chiyoda-ku, Tokyo, Japan.
