Retraction of

"Extensions, dilations and functional models
of singular Sturm-Liouville operators"

By Bilender P. Allahverdiev

[Rocky Mountain J. of Math. **35** (2005), 367–390]

After publication of the article mentioned above, it was discovered that the article was almost identical to another one the author published, namely "Dissipative Sturm-Liouville operators with nonseparated boundary conditions," Monatshefte für Mathematik **140** (2003), 1–17. The Rocky Mountain Journal of Mathematics regrets that this has occurred.
