

## CONTENTS

Huipeng Chen: Characterizations and properties of stratifiable spaces ...	253
Takamitsu Yamauchi: The role of countable paracompactness for continuous selections avoiding extreme points.....	277
Benharrat Belaïdi and Abdallah El Farissi: Relation between differential polynomials of certain complex linear differential equations and meromorphic functions of finite order .....	291
Akira Kamibeppu: Homotopy type of the box complexes of graphs without 4-cycles .....	307
Yoshio Matsuyama: Curvature pinching for Kaehler submanifolds of a complex projective space*.....	315
Daisuke Dobashi: A characterization of tiling groups.....	323
Sorin Dragomir and Krishan L. Duggal: Indefinite extrinsic spheres .....	335
Jörg Brüdern: Representations of natural numbers as the sum of a prime and a $k$ -th power.....	349
Taro Kimura: Stability of certain reflective submanifolds in compact symmetric spaces .....	361
Jörg Brüdern, Koichi Kawada and Trevor D. Wooley: Additive representation in thin sequences, VII: Restricted moments of the number of representations .....	383
Naonori Ishii and Katsuaki Yoshida: Correction to the automorphism group of a cyclic $p$ -gonal curve.....	407
