	Page
I. DIBAG, Degree theory for spherical fibrations	161
T. NISHIMORI, Existence problem of transverse foliations for some foliated 3-manifolds	179
K. WATANABE, Sur l'unicité du prolongement des solutions des équations elliptiques dégénérées.....	239
K. YABUTA, A multilinearization of Littlewood-Paley's g -function and Carleson measures.....	251
M. HAMANA, T. OKAYASU AND K. SAITÔ, Extensions of derivations and automorphisms from C^* -algebras to their injective envelopes	277
T. MURAI, Lacunary series and ranges of non-synthesis	289
K. TANAHASHI, A characterization of decomposable operators.....	295
G. SEIFERT, On uniformly almost periodic sets of functions for almost periodic differential equations	301
K. UCHIDA, Galois groups of unramified solvable extensions	311
