

# ILLINOIS JOURNAL OF MATHEMATICS

Volume 52, Number 2

Summer 2008

---

<b>Igor E. Pritsker</b> , An areal analog of Mahler's measure .....	347
<b>Kunio Hidano and Yuki Kurokawa</b> , Weighted HLS inequalities for radial functions and Strichartz estimates for wave and Schrödinger equations .....	365
<b>Alan Adolphson and Steven Sperber</b> , On the zeta function of a projective complete intersection .....	389
<b>Benton L. Duncan</b> , Finite dimensional point derivations for graph algebras ...	419
<b>Heydar Radjavi and Vladimir G. Troitsky</b> , Invariant sublattices .....	437
<b>TongKeun Chang and Kijung Lee</b> , Spectral properties of the layer potentials on Lipschitz domains .....	463
<b>Sergei Merenkov</b> , Rapidly growing entire functions with three singular values	473
<b>Yunfeng Jiang</b> , The orbifold cohomology ring of simplicial toric stack bundles	493
<b>Kevin Beanland</b> , Operators on asymptotic $\ell_p$ spaces which are not compact perturbations of a multiple of the identity .....	515
<b>John R. Akeroyd and Pratibha G. Ghate</b> , Closed-range composition operators on $\mathbb{A}^2$ .....	533
<b>Apostolos Beligiannis and Henning Krause</b> , Thick subcategories and virtually Gorenstein algebras .....	551
<b>Aleksei Lissitsin, Kristel Mikkor and Eve Oja</b> , Approximation properties defined by spaces of operators and approximability in operator topologies ...	563
<b>Andreas Fischer</b> , Definable smoothing of Lipschitz continuous functions .....	583
<b>Laura Taalman</b> , An exact sequence of weighted Nash complexes .....	591
<b>Alex Iosevich and Doowon Koh</b> , Extension theorems for the Fourier transform associated with nondegenerate quadratic surfaces in vector spaces over finite fields .....	611
<b>Ryo Nikkuni</b> , Delta edge-homotopy invariants of spatial graphs via disk-summing the constituent knots .....	629
<b>Pramod K. Sharma</b> , Orbits of automorphisms of integral domains .....	645
<b>Andrei K. Lerner</b> , On some weighted norm inequalities for Littlewood–Paley operators .....	653
<b>Bartłomiej Siudeja</b> , Scattering length for stable processes .....	667
<b>Wael Abu-Shammala and Alberto Torchinsky</b> , From dyadic $\Lambda_\alpha$ to $\Lambda_\alpha$ ...	681
<b>Henrik Holm and Peter Jørgensen</b> , Covers, precovers, and purity .....	691
