Preface

Jaromír Antoch, Marie Hušková and Pranab K. Sen v

Contributors of this volume

..... vii

Life and Work of Jana Jurečková: An Appreciation

Jaromír Antoch, Marie Hušková and Pranab K. Sen 1

Nonparametric comparison of ROC curves: Testing equivalence

Jaromír Antoch, Luboš Prchal and Pascal Sarda 12

The unbearable transparency of Stein estimation

Rudolf Beran..... 25

On the estimation of cross-information quantities in rank-based inference

Delphine Cassart, Marc Hallin and Davy Paindaveine 35

Estimation of irregular probability densities

Lieven Desmet, Irène Gijbels and Alexandre Lambert 46

Measuring directional dependency

Yadolah Dodge and Iraj Yadegari..... 62

On a paradoxical property of the Kolmogorov-Smirnov two-sample test

Alexander Y. Gordon and Lev B. Klebanov..... 70

MCD-RoSIS – A robust procedure for variable selection

Charlotte Guddat, Ursula Gather and Sonja Kuhnt 75

A note on reference limits

Jing-Ye Huang, Lin-An Chen and Alan H. Welsh..... 84

Simple sequential procedures for change in distribution

Marie Hušková and Ondřej Chochola 95

A class of multivariate distributions related to distributions with a Gaussian component

Abram M. Kagan and Lev B. Klebanov..... 105

Locating landmarks using templates	
<i>Jan Kalina</i>	113
On the asymptotic distribution of the analytic center estimator	
<i>Keith Knight</i>	123
Rank tests for heterogeneous treatment effects with covariates	
<i>Roger Koenker</i>	134
A class of minimum distance estimators in AR(p) models with infinite error variance	
<i>Hira L. Koul and Xiaoyu Li</i>	143
Integral functionals of the density	
<i>David M. Mason, Elizbar Nadaraya and Grigol Sokhadze</i>	153
Qualitative robustness and weak continuity: the extreme unctio?	
<i>Ivan Mizera</i>	169
Asymptotic theory of the spatial median	
<i>Jyrki Möttönen, Klaus Nordhausen and Hannu Oja</i>	182
Second-order asymptotic representation of M-estimators in a linear model	
<i>Marek Omelka</i>	194
Extremes of two-step regression quantiles	
<i>Jan Picek and Jan Dienstbier</i>	204
Is ignorance bliss: Fixed vs. random censoring	
<i>Stephen Portnoy</i>	215
The Theil–Sen estimator in a measurement error perspective	
<i>Pranab K. Sen and A. K. Md. Ehsanes Saleh</i>	224
The Lasso with within group structure	
<i>Sara van de Geer</i>	235
Nonparametric estimation of residual quantiles in a conditional Koziol–Green model with dependent censoring	
<i>Noël Veraverbeke</i>	245
Robust error-term-scale estimate	
<i>Jan Ámos Víšek</i>	254
