Preface	v
Biography	vii
Ph.D. Students	viii
Photos	ix
Contributors	xv
A counterexample concerning the extension of uniform strong laws to ergodic processes	
<i>Terrence M. Adams and Andrew B. Nobel</i>	1
Mechanical models in nonparametric regression	
<i>Vladimír Balek and Ivan Mizera</i>	5
Efficient estimation in the semiparametric normal regression-copula model with a focus on QTL mapping	
<i>Bojan Basrak and Chris A. J. Klaassen</i>	20
Multivariate regression through affinely weighted penalized least squares	
<i>Rudolf Beran</i>	33
Robust tests for model selection	
<i>Lucien Birgé</i>	47
Semiparametric models and two-phase samples: Applications to Cox regression	
<i>Norman E. Breslow and Thomas Lumley</i>	65
Stochastic search for semiparametric linear regression models	
<i>Lutz Dümbgen, Richard J. Samworth and Dominic Schuhmacher</i>	78
On low-dimensional projections of high-dimensional distributions	
<i>Lutz Dümbgen and Perla Del Conte-Zerial</i>	91
On asymptotic quantum statistical inference	
<i>Richard D. Gill and Mădălin I. Guță</i>	105
On the estimation of smooth densities by strict probability densities at optimal rates in sup-norm	
<i>Evarist Giné and Hailin Sang</i>	128
Adaptive Q-learning	
<i>Yair Goldberg, Rui Song and Michael R. Kosorok</i>	150
Consistent scoring functions for quantiles	
<i>Kyrill Grant and Tilmann Gneiting</i>	163
Smooth and non-smooth estimates of a monotone hazard	
<i>Piet Groeneboom and Geurt Jongbloed</i>	174
Efficient testing and estimation in two Lehmann alternatives to symmetry-at-zero models	
<i>W. J. Hall and Jon A. Wellner</i>	197

A remark on low rank matrix recovery and noncommutative Bernstein type inequalities	
<i>Vladimir Koltchinskii</i>	213
Analyzing posteriors by the information inequality	
<i>Willem Kruijer and Aad van der Vaart</i>	227
Uniform in bandwidth limit laws for kernel distribution function estimators	
<i>David M. Mason and Jan W. H. Swanepoel</i>	241
Around Nemirovski's inequality	
<i>Pascal Massart and Raphaël Rossignol</i>	254
A note on insufficiency and the preservation of Fisher information	
<i>David Pollard</i>	266
Improved matrix uncertainty selector	
<i>Mathieu Rosenbaum and Alexandre B. Tsybakov</i>	276
Some asymptotic theory for functional regression with stationary regressor	
<i>Frits Ruymgaart, Jing Wang and Shih-Hsuan Wei</i>	291
The Lasso, correlated design, and improved oracle inequalities	
<i>Sara van de Geer and Johannes Lederer</i>	303
The average likelihood ratio for large-scale multiple testing and detecting sparse mixtures	
<i>Guenther Walther</i>	317
