

# **ADAPTIVE DESIGNS**

## **Table of Contents**

<b>Foreword.....</b>	<b>M. ZELEN AND L. J. WEI</b>	<b>i</b>
<b>Preface .....</b>	<b>N. FLOURNOY AND W.F. ROSENBERGER</b>	<b>iv</b>

### **Clinical Trials**

<b>Adaptive designs in clinical trials: some issues with emphasis on asymptotic inference</b>	<b>W.F. ROSENBERGER</b>	<b>1</b>
<b>Play-the-winner designs, generalized Polya urns, and Markov branching processes</b>	<b>R. T. SMYTHE AND W.F. ROSENBERGER</b>	<b>13</b>
<b>Response adaptive allocation and selection bias .....</b>	<b>J.A. BATHER</b>	<b>23</b>
<b>Randomized adaptive designs .....</b>	<b>V. MELFI</b>	<b>36</b>
<b>Biased coin designs: some properties and applications .....</b>	<b>J.R. EISELE</b>	<b>48</b>
<b>A modified bandit as an approach to ethical allocation in clinical trials ....</b>	<b>J.P. HARDWICK</b>	<b>65</b>
<b>Some designs for multicriteria bandits .....</b>	<b>P.W. JONES, A.M. LEWIS, AND R. HARTLEY</b>	<b>88</b>
<b>Sequential allocation involving several treatments .....</b>	<b>D.S. COAD</b>	<b>95</b>
<b>Sequential elimination procedures in trials of three Bernoulli response treatments</b>	<b>C.R. PALMER</b>	<b>110</b>
<b>Optimal designs for clinical trials in stages .....</b>	<b>Y. CHENG AND D.A. BERRY</b>	<b>124</b>

### **Dose-Response and Quantile Estimation**

<b>Up-and-down designs I: stationary treatment distributions</b>	<b>S.D. DURHAM AND N. FLOURNOY</b>	<b>139</b>
<b>Up-and-down designs II: exact treatment moments</b>	<b>S.D. DURHAM, N. FLOURNOY AND A.A. MONTAZER-HAGHIGHI</b>	<b>158</b>
<b>An adaptive design for maximization of a contingent binary response</b>	<b>Z. LI, S.D. DURHAM AND N. FLOURNOY</b>	<b>179</b>
<b>Certain sequential adaptive design problems.....</b>	<b>Z. GOVINDARAJULU</b>	<b>197</b>

### **Reliability, Quality Control and Other Applications**

<b>Adaptive allocation for estimation.....</b>	<b>C. PAGE</b>	<b>213</b>
<b>Exact computational analyses for adaptive designs.....</b>	<b>J.P. HARDWICK AND Q.F. STOUT</b>	<b>223</b>
<b>Adaptive designs for optimal age replacement policy .....</b>	<b>G. ARAS</b>	<b>238</b>
<b>New procedures of group-testing problem based on a Huffman lower bound and Shannon entropy criteria.....</b>	<b>L. HSU</b>	<b>249</b>
<b>Adaptive Bayesian designs for accelerated life testing.....</b>	<b>R. SOYER AND A.L. VOPATEK</b>	<b>263</b>
<b>Adaptation in the design of experiments for linear models .....</b>	<b>R. SCHWABE</b>	<b>276</b>
