Biography of William E. Strawderman	viii
Publications of William E. Strawderman	x
Density estimation in high and ultra high dimensions, regularization, and the L_1 asymptotics	
<i>Anirban DasGupta and S.N. Lahiri</i>	1
Minimax estimation of linear combinations of restricted location parameters	
<i>Tatsuya Kubokawa</i>	24
Bayesian predictive densities for linear regression models under α-divergence loss: Some results and open problems	
<i>Yuzo Maruyama and William E. Strawderman</i>	42
Multiple rank tests for pairwise comparisons	
<i>Arthur Cohen and Harold Sackrowitz</i>	57
Reducing data nonconformity in linear models	
<i>Andrew L. Rukhin</i>	64
Minimax ℓ_q risk in ℓ_p balls	
<i>Cun-Hui Zhang</i>	78
A weak functional framework for applications in statistics	
<i>Adel Blouza, Dominique Fourdrinier and Patrice Lepelletier</i>	90
Inadmissible estimators of normal quantiles and two-sample problems with additional information	
<i>Éric Marchand, Mohammad Jafari Jozani and Yogesh Mani Tripathi</i>	104
Asymptotic admissibility of priors and elliptic differential equations	
<i>John A. Hartigan</i>	117
Multiagent estimators of an exponential mean	
<i>Constance van Eeden and James V. Zidek</i>	131
On hierarchical prior specifications and penalized likelihood	
<i>Robert L. Strawderman and Martin T. Wells</i>	154
Accurate approximations to the distribution of a statistic testing symmetry in contingency tables	
<i>John E. Kolassa and Hema Gayat Bhagavatula</i>	181
A nonparametric Bayesian method for estimating a response function	
<i>Scott Brown and Glen Meeden</i>	190
CD posterior – combining prior and data through confidence distributions	
<i>Kesar Singh and Mingge Xie</i>	200
