

Contents

Asymptotics of Maximum Likelihood without the LLN or CLT or Sample Size Going to Infinity <i>Charles J. Geyer</i>	1
On the Geometric Ergodicity of Two-Variable Gibbs Samplers <i>Aixin Tan, Galin L. Jones and James P. Hobert</i>	25
On Convergence Properties of the Monte Carlo EM Algorithm <i>Ronald C. Neath</i>	43
The Origins of de Finetti's Critique of Countable Additivity <i>Eugenio Regazzini</i>	63
Reverse Exchangeability and Extreme Order Statistics <i>Yindeng Jiang and Michael D. Perlman</i>	83
Sampling from a Manifold <i>Persi Diaconis, Susan Holmes and Mehrdad Shahshahani</i>	102
On an Approach to Bayesian Sample Sizing in Clinical Trials <i>Robb J. Muirhead and Adina I. Şoaita</i>	126
A CB (Corporate Bond) Pricing Probabilities and Recovery Rates Model for Deriving Default Probabilities and Recovery Rates <i>Takeaki Kariya</i>	138
