CONTENTS OF VOLUME 10

1980 Wald Memorial Lecture

BICKEL, P. J. On adaptive estimation 647–671

1981 Wald Memorial Lectures

EFRON, BRADLEY. Transformation theory: how normal is a family of distributions? 323–339
EFRON, BRADLEY. Editor's Correction to "Transformation theory: how normal is a family of distributions" 1032
EFRON, BRADLEY. Maximum likelihood and decision theory 340–356

Memorial Articles

BARNARD, G. A. AND GODAMBE, V. P. Allan Birnbaum—1923–1976 1033–1039
GODAMBE, V. P. AND BARNARD, G. A. Allan Birnbaum—1923–1976 1033–1039
WATSON, G. S. William Gemmell Cochran—1909–1980 1–10

Special Invited Papers

EATON, MORRIS L. A review of selected topics in multivariate probability inequalities 11–43
STONE, CHARLES J. Optimal global rates of convergence for nonparametric regression 1040–1053

Articles and Short Communications

ABRAMSON, IAN S. On bandwidth variation in kernel estimates—a square root law 1217–1223
ALAM, KHURSHEED AND SAXENA, K. M. LAL. Estimation of the noncentrality parameter of a Chi-squared distribution 1012–1016
ALBERT, JAMES H. AND GUPTA, ARJUN K. Mixtures of Dirichlet distributions and estimation in contingency tables 1261–1268
ALVO, MAYER, CABILIO, PAUL AND FEIGIN, PAUL D. Asymptotic theory for measures of concordance with special reference to average Kendall tau 1269–1276
AMARI, SHUN-ICHI. Differential geometry of curved exponential families—curvatures and information loss 357–385
ANDERSEN, P. K. AND GILL, R. D. Cox's regression model for counting processes: a large sample study 1100–1120
ANDERSSON, STEEN. Distributions of maximal invariants using quotient measures 955–961
BAR-LEV, SHAUL K. AND REISER, BENJAMIN. An exponential subfamily which admits UMPU tests based on a single test statistic 979–989
BARNARD, G. A. Discussion of the Dawid/Stone paper 1068–1069
BATES, DOUGLAS M., HAMILTON, DAVID C., AND WATTS DONALD G.

Accounting for intrinsic nonlinearity in nonlinear regression parameter inference regions 386–393
BEDNARSKI, TADEUSZ. Binary experiments, minimax tests and 2-alternating capacities 226–232
BERAN, RUDOLF. Estimated sampling distributions: the bootstrap and competitors 212–225
BERAN, RUDOLF. Robust estimation in models for independent nonidentically distributed data 415–428
BERGER, JAMES O. Selecting a minimax estimator of a multivariate normal mean 81–92
BERGER, JAMES O., BERLINER, L. MARK AND ZAMAN, ASAD. General admissibility and inadmissibility results for estimation in a control problem 838–856
BERLINER, L. MARK, ZAMAN, ASAD, AND BERGER, JAMES O. General admissibility and inadmissibility results for estimation in a control problem 838–856
BERRY, DONALD A. AND WANG, PECHENG. Optimal stopping regions with islands and peninsulas 634–636
BHANSALI, R. J. The evaluation of certain quadratic forms occurring in autoregressive model fitting 121–131
BLACKWELL, D. AND RAMAMOORTHI, R. V. A Bayes but not classically sufficient statistic 1025–1026
BÖHNING, DANKMAR. Convergence of Simar's algorithm for finding the maximum likelihood estimate of a compound Poisson process 1006–1008
BOHRER, ROBERT AND WYNN, HENRY P. Spherically symmetric probability orderings useful in multiple comparisons 1253–1260
BOYER, JOHN E., JR., TSAO, HOW JAN, AND GILLILAND, DENNIS C. Bayes empirical Bayes: finite parameter case 1277–1282
BUTLER, RONALD W. Nonparametric interval and point prediction using data trimmed by a Grubbs-type outlier rule 197–204
CABILIO, PAUL, FEIGIN, PAUL D. AND ALVO, MAYER. Asymptotic theory for measures of concordance with special reference to average Kendall tau 1269–1276
CAMBANIS, STAMATIS AND SCHOENFELDER, CAROL. Random designs for estimating integrals of stochastic processes 526–538
CAMPBELL, KATHERINE. Recursive computation of *M*-estimates for the parameters of a finite autoregressive process 442–453
CARROLL, RAYMOND J. Adapting for heteroscedasticity in linear models 1224–1233
CARROLL, RAYMOND J. AND RUPPERT, DAVID. Robust estimation in heteroscedastic linear models 429–441
CASELLA, GEORGE AND HWANG, JIUUN T. Minimax confidence sets for the mean of a multivariate normal distribution 868–881
CHOW, Y. S. AND MARTINSEK, A. T. Bounded regret of a sequential

procedure for estimation of the mean 909–914
CONSTANTINE, GREGORY M. On the E-optimality of PBIB designs with a small number of blocks 1027
COTTERILL, DEREK S. AND CSÖRGŐ, MIKLÓS. On the limiting distribution of and critical values for the multivariate Cramér-Von Mises statistic 233–244
CRESSIE, NOEL. A useful empirical Bayes identity 625–629
CSÖRGŐ, MIKLÓS AND COTTERILL, DEREK S. On the limiting distribution of and critical value for the multivariate Cramér-Von Mises statistic 233–244
DALAL, SIDDHARTHA R. AND FORTINI, PETER. An inequality comparing sums and maxima with application to Behrens-Fisher type problem 297–301
DANIELS, H. E. Sequential tests constructed from images 394–400
DAWID, A. P. AND STONE, M. The functional-model basis of fiducial inference 1054–1067
DIACONIS, PERSI AND FREEDMAN, DAVID. De Finetti's theorem for symmetric location families 184–189
DIACONIS, P. AND FREEDMAN, D. A. On inconsistent *M*-estimators . . 454–461
DOSS, HANI AND SELLKE, THOMAS. The tails of probabilities chosen from a Dirichlet prior 1302–1305
DYKSTRA, RICHARD L. AND ROBERTSON, TIM. Order restricted statistical tests on multinomial and Poisson parameters: the starshaped restriction 1246–1252
DYKSTRA, RICHARD L. AND ROBERTSON, TIM. An algorithm for isotonic regression for two or more independent variables 708–716
EPLETT, W. J. R. Rank tests generated by continuous piecewise linear functions 569–574
ESTY, WARREN W. Confidence intervals for the coverage of low coverage samples 190–196
EUBANK, R. L., SMITH, P. L. AND SMITH, P. W. A note on optimal and asymptotically optimal designs for certain time series models . . 1295–1301
FEIGIN, PAUL D., ALVO, MAYER AND CABILIO, PAUL. Asymptotic theory for measures of concordance with special reference to average Kendall tau 1269–1276
FEREBEE, BROOKS. Tests with parabolic boundary for the drift of a Wiener process 882–894
FERREIRA, PEDRO E. Sequential estimation through estimating equations in the nuisance parameter case 167–173
FIELD, CHRISTOPHER. Small sample asymptotic expansions for multivariate *M*-estimates 672–689
FINE, TERRENCE L. AND WALLEY, PETER. Towards a frequentist theory of upper and lower probability 741–761
FISHER, N. I. Unbiased estimation for some nonparametric families of distribution 603–615

FORTINI, PETER AND DALAL, SIDDHARTHA R. An inequality comparing sums and maxima with application to Behrens-Fisher type problem 297–301
FRASER, D. A. S. Discussion of the Dawid/Stone paper 1070–1073
FREEDMAN, DAVID AND DIACONIS, PERSI. De Finetti's theorem for symmetric location families 184–189
FREEDMAN, D. A. AND DIACONIS, P. On inconsistent *M*-estimators .. 454–461
FRIEDMAN, MICHAEL. Piecewise exponential models for survival data with covariates 101–113
FU, JAMES C. Large sample point estimation: a large deviation theory approach 762–771
FULLER, WAYNE A. AND HASZA, DAVID P. Testing for nonstationary parameter specifications in seasonal time series models 1209–1216
FULLER, WAYNE A. AND WOLTER, KIRK M. Estimation of nonlinear errors-in-variables models 539–548
GALIL, Z. AND KIEFER, J. Construction methods for *D*-optimum weighing designs when n ≡ 3 (mod4) 502–510
GEMAN, STUART AND HWANG, CHII-RUEY. Nonparametric maximum likelihood estimation by the method of sieves 401–414
GILL, R. D. AND ANDERSEN, P. K. Cox's regression model for counting processes: a large sample study 1100–1120
GILLILAND, DENNIS C., BOYER, JOHN E., JR. AND TSAO, HOW JAN. Bayes empirical Bayes: finite parameter case 1277–1282
GOLDSTEIN, MICHAEL. Contamination distributions 174–183
GUPTA, ARJUN K. AND ALBERT, JAMES H. Mixtures of Dirichlet distributions and estimation in contingency tables 1261–1268
GUTMANN, SAM. Stein's paradox is impossible in problems with finite sample space 1017–1020
HALL, PETER. On estimating the endpoint of a distribution 556–568
HALL, W. J. Asymptotic lognormality of *P* values 44–64
HAMILTON, DAVID C., WATTS, DONALD G. AND BATES, DOUGLAS M. Accounting for intrinsic nonlinearity in nonlinear regression parameter inference regions 386–393
HANNAN, E. J., HONG-ZHI, AN AND ZHAO-GUO, CHEN. Autocorrelation, autoregression and autoregressive approximation 926–936
HASZA, DAVID P. AND FULLER, WAYNE A. Testing for nonstationary parameter specifications in seasonal time series models 1209–1216
HONG-ZHI, AN, ZHAO-GUO, CHEN AND HANNAN, E. J. Autocorrelation, autoregression and autoregressive approximation 926–936
HOOPER, PETER M. Sufficiency and invariance in confidence set estimation 549–555
HOOPER, PETER M. Invariance confidence sets with smallest expected measure 1283–1294
HOSOYA, YUZO AND TANIGUCHI, MASANOBU. A central limit theorem for stationary processes and the parameter estimation of linear

processes ... 132–153
HWANG, CHII-RUEY AND GEMAN, STUART. Nonparametric maximum likelihood estimation by the method of sieves ... 401–414
HWANG, JIUNN TZON. Semi tail upper bounds on the class of admissible estimators in discrete exponential families with applications to Poisson and negative binomial distributions ... 1137–1147
HWANG, JIUNN TZON. Improving upon standard estimators in discrete exponential families with applications to Poisson and negative binomial cases ... 857–867
