THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930–1938

EDITED BY S. S. WILKS, 1938–1949

THE OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

Contents

	PAGE
Estimators of a Location Parameter in the Absolutely Continuous Case — R. H. FARRELL	949
Estimating the Current Mean of a Normal Distribution Which is Subjected to Changes in Time — H. CHERNOFF AND S. ZACKS	999
Admissibility of Quantile Estimates of a Single Location Parameter — MARTIN FOX AND HERMAN RUBIN	1019
Uniform Approximation of Minimax Point Estimates — M. N. GHOSH	1031
Sequential Estimation and Closed Sequential Decision Procedures — EDWARD PAULSON	1048
A Monotonicity Property of the Power Functions of Some Tests of the Equality of Two Covariance Matrices — T. W. ANDERSON AND S. DAS GUPTA	1059
Use of Inter-Block Information to Obtain Uniformly Better Estimators — K. R. SHAH	1064
On Some Alternative Estimates for Shift in the P-Variate One Sample Problem — PETER J. BICKEL	1079
Small-Sample Distributions of the Two-Sample Cramér-von Mises' W^2 and Watson's U^2 — E. J. BURR	1091
On Two-Stage Non-Parametric Estimation — E. H. YEN	1099
Comparison of the Power Functions for the Test of Independence in 2×2 Contingency Tables — W. L. HARKNESS AND L. KATZ	1115
On Bayes Procedures for a Problem With Choice of Observations — T. W. ANDERSON	1128
Some Stochastic Approximation Procedures for Use in Process Control — JOHN P. COMER, JR.	1136
Queues With Batch Departures II — F. G. FOSTER AND A. G. A. D. PERERA	1147
On a Measure of Association — S. D. SILVEY	1157
Properties of Polykays of Deviates — P. S. DWYER	1167
A Combinatorial Method for Products of Two Polykays With Some General Formulae — P. S. DWYER AND D. S. TRACY	1174
On Elementary Symmetric Functions of the Roots of a Multivariate Matrix: Distributions — TITO A. MIJARES	1186
A Characterization of the Exponential Distribution — THOMAS S. FERGUSON	1199
Polynomial Expansions of Bivariate Distributions — G. K. EAGLESON	1208
On the Topological Structure of Some Ordered Families of Distributions — J. PFANZAGL	1216
On Continuous Sufficient Statistics — J. L. DENNY	1229
Bounds for Distributions With Monotone Hazard Rate, I — RICHARD E. BARLOW AND ALBERT W. MARSHALL	1234
Bounds for Distributions With Monotone Hazard Rate, II — RICHARD E. BARLOW AND ALBERT W. MARSHALL	1258
Some Theorems on Functionals of Markov Chains — SIDNEY C. PORT	1275
The Tail σ-Field of a Markov Chain and a Theorem of Orey — DAVID BLACKWELL AND DAVID FREEDMAN	1291

(Continued on back cover)

Vol. 35, No. 3—September, 1964

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.* www.jstor.org

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are $20 per volume (four issues of one calendar year) in the U.S. and Canada, $15 per volume elsewhere. Single issues are $5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are $12 per volume, $3.50 per issue; issues from 1957 on are $20 per volume, $5.25 per issue; for complete sets, $200 for the first 25 volumes, $10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address,** etc., should be addressed to Gerald Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

Editorial Office, Department of Mathematics, University of Illinois, Urbana, Illinois. D. L. Burkholder, Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the new style.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime (′), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., $\underline{x}$) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE

WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland

Published quarterly by the Institute of Mathematical Statistics in March, June, September and December.

CHANGE OF EDITOR. New manuscripts arriving after July 1, 1964 should be submitted to the incoming Editor, D. L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois. Correspondence about old manuscripts submitted before July 1, 1964, should be directed to the Past Editor, J. L. Hodges, Jr.
