
STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give complete coverage of published papers in the field of statistical theory (including associated aspects of probability and other mathematical methods) and new published contributions to statistical method.

There are approximately two hundred and fifty journals published in various parts of the world which are wholly or partly devoted to the field of statistical theory and method and which are brought within the scope of this journal of abstracts.

In addition to the vast array of journal literature, abstracts of the special collections of papers as published in reports of conferences symposia and seminars, together with the published reports of experiment and other research stations, are also included.

The abstracts are about 400 words long—the recommendation of UNESCO for the “long” abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) are given in detail to facilitate contact in order to obtain further detail or request an off-print. The journal is published quarterly and contains approximately 750 abstracts per year.

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. A unique aspect of this journal is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

Annual Subscription £5 (U.S.A. \$16.00)
Single Number 30s. (U.S.A. \$4.50)

Number 307

One Sample Limits of Some Two-Sample Rank Tests.....	Lincoln E. Moses
On the Normal Scores Two-Sample Rank Test.....	Jerome Klotz
Robustness of Some Procedures for the Two-Sample Location Problem.....	John W. Pratt
Minimum Variance, Linear, Unbiased Seasonal Adjustment of Economic Time Series.....	Dale W. Jorgenson
Taking a Covariance into Account.....	Irwin D. J. Bross
The Use of Wealth to Compare Households' Average Saving.....	Phillip Cagan
Income, Wealth, and the Demand for Money: Some Evidence from Cross-Section Data.....	Tong Hun Lee
Bayesian Analysis of the Regression Model with Autocorrelated Errors.....	Arnold Zellner and George C. Tiao
Some Comparisons of Methods of Fitting the Dosage Response Curve for Small Samples.....	Elliot M. Cramer
Analysis of Empirical Bivariate Extremal Distributions.....	E. J. Gumbel and Neil Goldstein
A New Class of Designs.....	C. Ramankutty Nair
Linear Regression Analysis with Missing Observations Among the Independent Variables.....	M. Glasser
Iterative Estimation of a Set of Linear Regression Equations.....	Lester G. Telser
A Note on the Equivalence of Two Methods of Fitting a Straight Line through Cumulative Data.....	John L. Jaech
On the Bounds of the Number of Common Treatments Between Blocks of Semi Regular Group Divisible Designs.....	Hiralal Agrawal
Correcting the Average Rank Correlation Coefficient for Ties in Rankings.....	Wilson L. Taylor
Distribution of Product and of Quotient of Maximum Values in Samples from a Power-Function Population.....	Paul R. Rider
On the Exact Distributions of the GCL Estimators in a Leading Three-Equation Case.....	D. G. Kabe
A Note on the Variance of the Ratio Estimate.....	Des Raj
An Approximation for the Exact Distribution of the Wilcoxon Test for Symmetry.....	S. A. Fellingham and D. J. Stoker
Nonparametric Upper Confidence Bounds for $\Pr\{Y < X\}$ and Confidence Limits for $\Pr\{Y < X\}$ when X and Y are Normal.....	D. B. Owen, K. J. Craswell and D. L. Hanson
An Extended Table of Critical Values for the Mann-Whitney (Wilcoxon) Two-Sample Statistic.....	Roy C. Milton
Table for Both the Sign Test and Distribution-free Confidence Intervals of the Median for Sample Sizes to 1,000.....	William J. MacKinnon
Another Derivation of the Non-central Chi-square Distribution.....	William C. Guenther
A Supplement to Mendenhall's Bibliography on Life Testing and Related Topics.....	Zakkula Govindarajulu
Book Reviews.....

TRABAJOS DE ESTADISTICA y de INVESTIGACION OPERATIVA

Review published by the "Instituto de Investigaciones Estadísticas" of the "Consejo Superior de Investigaciones Científicas", Madrid, Spain.

VOL. XV

CUADERNO I.

CONTENTS

B. M. BENNET AND B. BIRCH.—Sampling inspection tables for comparison of two groups using the negative binomial model.

PAUL VAN MOESEKE.—A variational note on "tatonnement"

A. VEGAS PEREZ.—Estimación no paramétrica de procesos monótonos.

NOTAS.

S. RÍOS.—Problemas de inversiones, decisiones secuenciales. Programación dinámica, procesos autoadaptativos.

CRONICA

BIBLIOGRAFIA

EJERCICIOS

For everything in connection with works, exchanges and subscriptions write to Prof. Sixto Ríos, Instituto de Investigaciones Estadísticas, C.S.I.C., Serrano 123, Madrid-6, Spain.

The Review is composed of three fascicles published three times a year (about 350 pp) and its annual price is 100 pesetas for Spain and 240 pesetas for all other countries.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

Z. W. Birnbaum, Department of Mathematics, University of Washington,
Seattle 5, Washington

President-Elect:

Herbert Solomon, Department of Statistics, Stanford University, Stan-
ford, California

Executive Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Car-
olina, Chapel Hill, North Carolina

Program Secretary:

Dorothy Gilford, Office of Naval Research, Washington 25, D.C.

Treasurer:

Gerald Lieberman, Institute of Mathematical Statistics, Sequoia Hall,
Stanford University, Stanford, California

Editor:

D. L. Burkholder, Department of Mathematics, University of Illinois,
Urbana, Illinois

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$15.00 per year for residents of the United States or Canada and \$7.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

On the Asymptotic Distribution of the Autocorrelations of a Sample From a Linear Stochastic Process.....	T. W. ANDERSON AND A. M. WALKER	1296
On the Probability of Large Deviations of Families of Sample Means.....	J. SETHURAMAN	1304
On the Distribution of the Number of Successes in Independent Trials.....	J. N. DARROCH	1317
Asymptotic Extremes for m -Dependent Random Variables.....	G. F. NEWELL	1322
Present Value of a Renewal Process.....	GIORGIO DALL'AGLIO	1326
Limit Theorems for Stopped Random Walks.....	R. H. FARRELL	1332
Notes		
The Last Return to Equilibrium in a Coin-Tossing Game	D. BLACKWELL, P. DEUEL AND D. FREEDMAN	1344
A Remark on the Coin Tossing Game.....	DAVID BLACKWELL AND DAVID FREEDMAN	1345
A Theorem on Stopping Times.....	R. M. BLUMENTHAL AND R. K. GETTOO	1348
Escape Probability for a Half Line.....	SIDNEY C. PORT	1351
An Application of a Ballot Theorem in Order Statistics.....	LAJOS TAKÁCS	1356
A Fluctuation Theorem and a Distribution-Free Test	CHARLES H. KRAFT AND CONSTANCE VAN EEDEN	1359
Tables of Distribution-Free Tolerance Limits.....	L. DANZIGER AND S. A. DAVIS	1361
A Note on the Truncated Exponential Distribution	LEE J. BAIN AND DAVID L. WEEKS	1366
An Application of a Generalized Gamma Distribution.....	GERALD S. ROGERS	1368
Book Reviews.....	J. KIEFER; TORE DALENUS; S. K. MITRA AND C. R. RAO; E. N. GILBERT	1371
Correction Notes.....		1388
Abstracts of Papers.....		1389
News and Notices.....		1412
Report of the Monterey, California Meeting.....		1413
Report of the Manhattan, Kansas Meeting.....		1415
Publications Received.....		1417

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

CENTRAL REGIONAL—Chicago, Illinois—December 28-29, 1964.
EASTERN REGIONAL—Tallahassee, Florida—Spring, 1965.
CENTRAL REGIONAL—Lincoln, Nebraska—Spring, 1965.
WESTERN REGIONAL—Berkeley, California—Summer, 1965.
ANNUAL MEETING—Los Angeles, California—Summer, 1966.

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
