No. 3

## Special Invited Paper

Large deviations for vector-valued functionals of a Markov chain: Lower bounds

A. DE ACOSTA

## Articles

Large deviations for the empirical field of a Gibbs measure

HANS FÖLLMER AND STEVEN OREY

On the upper bound for large deviations of sums of i.i.d. random vectors . . . . . M. SLABY

Fluctuation results for the Wiener sausage . . . . . JEAN-FRANÇOIS LE GALL

Continuity of Gaussian processes . . . . . GENNADY SAMORODNITSKY

On Brownian paths connecting boundary points . . . . . KRZYSZTOF BURDZY

Hitting distributions of small geodesic spheres . . . . . MING LIAO

Traveling waves in inhomogeneous branching Brownian motions. I

S. LALLEY AND T. SELLKE

Doob's conditioned diffusions and their lifetimes . . . . . R. DANTE DEBLASSIE

Homogenization of a diffusion process in a divergence-free random field

KARL OELSCHLÄGER

Nash estimates and the asymptotic behavior of diffusions

K. GOLDEN, S. GOLDSTEIN AND J. L. LEBOWITZ

On the uniqueness of the infinite occupied cluster in dependent two-dimensional

site percolation . . . . . A. GANDOLFI, M. KEANE AND L. RUSSO

The contact process on a finite set . . . . . RICHARD DURRETT AND XIU-FANG LIU

The contact process in high dimensions . . . . . ENRIQUE D. ANDJEL

Moment bounds for associated sequences . . . . . THOMAS BIRKEL

The match set of a random permutation has the FKG property

PETER C. FISHBURN, PETER G. DOYLE AND L. A. SHEPP

Covering problems for Markov chains . . . . . PETER MATTHEWS

Phase transition in reinforced random walk and RWRE on trees . . . . . ROBIN PEMANTLE

Characterization of the law of the iterated logarithm in Banach spaces

M. LEDOUX AND M. TALAGRAND

On the effect of random norming on the rate of convergence in the central

limit theorem . . . . . PETER HALL

Characteristics of normal samples . . . . . VICTOR GOODMAN

Functional limit theorems for  $U$ -processes . . . . . DEBORAH NOLAN AND DAVID POLLARD

Stationary regenerative sets and subordinators . P. J. FITZSIMMONS AND MICHAEL TAKSAR

Regenerative systems on the real line . . . . . H. KASPI AND B. MAISONNEUVE

Asymptotics of a class of Markov processes which are not in general irreducible

RABI N. BHATTACHARYA AND OESOOK LEE

Asymptotic forms for the derivatives of one-sided stable laws . . . WOLFGANG GAWRONSKI

Stochastic processes with value in exponential type Orlicz spaces . . . . . MICHAEL WEBER

## Book Review

Review of *Empirical Processes with Application to Statistics* by Galen R. Shorack

and Jon A. Wellner . . . . . PETER GAENSSLER

# Statistics from Springer-Verlag —

extraordinary books beyond the standard  
and the normal!

## Goodness-of-Fit Statistics for Discrete Multivariate Data

T. Read and N. Cressie

A unified analysis of traditional goodness-of-fit tests. Includes introductory chapters on the analysis of discrete multivariate data and a literature survey for the most known members of the power-divergence family.

1988/app. 216 pp./7 illus./hardcover/\$44.00  
ISBN 96682-X

*Springer Series in Statistics*

## Prescriptions for Working Statisticians

A. Madansky

Collection of statistical diagnostics and prescriptions necessary to deal with the realities of inference from data, where preconditions are not necessarily satisfied. 1988/app. 352 pp./25 illus./128 tables/hardcover/\$39.80  
ISBN 96627-7

*Springer Texts in Statistics*

## Probability Theory

Independence, Interchangeability, Martingales  
Second Edition

Y.S. Chow and H. Teicher

Concerned with measure-theoretic foundations and the emerging body of laws and theorems. Devoted solely to independence, interchangeability and martingales, with emphasis on stepping times.

1988/app. 488 pp./hardcover/\$42.00  
ISBN 96695-1

*Springer Texts in Statistics*

## An Introduction to the Theory of Point Processes

D. Daley and D. Vere-Jones

General introduction bridging the gap between informal treatment concerned with applications and highly abstract theoretical treatments of stochastic point processes.

1988/app. 680 pp./1 illus./hardcover/\$79.00  
ISBN 96666-8

*Springer Series in Statistics*

## Statistical Decision Theory and Related Topics, Volumes I and II

S.S. Gupta and J. Berger

Vol. I focuses on Bayesian ideas and is crucial to anyone interested in decision theory, conditioning and Bayesian concepts. Vol. II encompasses the leading edge of current research in mathematical statistics with decision theory receiving special emphasis.

Volume I: 1988/418 pp./20 illus./hardcover/\$32.00

ISBN 96661-7

Volume II: 1988/399 pp./24 illus./hardcover/\$32.00

ISBN 96662-5

## New! Lecture Notes in Statistics

### Majorization and the Lorenz Order: A Brief Introduction

B.C. Arnold

Designed for a one-quarter course introducing majorization and the Lorenz order. The inequality principles of Dalton, especially the transfer of Robin Hood principle are given appropriate prominence.

1987/122 pp./softcover/\$16.30

ISBN 96592-0

*Volume 43*

### The Theory and Application of Statistical Inference Functions

D.L. McLeish and C.G. Small

Comprehensive in treatment of statistical principles and sufficiently powerful for variety of practical problems.

1988/124 pp./4 illus./softcover/\$25.00

ISBN 96720-6

*Volume 44*

### Statistical Information and Likelihood

A Collection of Critical Essays by Dr. D. Basu

J.K. Ghosh

Significant essays, brought together in honour of Dr. Basu, comprising important issues to questions of foundations. Discusses likelihood principle, the paradoxes that attend its violation and the radical deviation from classical statistical practices.

1988/app. 378 pp./softcover/app. \$39.70

ISBN 96751-6

*Volume 45*

To order, write to: Springer-Verlag New York, Inc., Attn: B. Bay, 175 Fifth Avenue, New York, NY 10010. Checks and Money orders (plus \$2.50 for shipping and handling) are acceptable forms of payment. NY, NJ and CA residents, please add state sales tax. To order by credit card, call TOLL FREE 1-800-526-7254 and refer to number S899. (In NJ, 201-348-4033).
