### SCHORLING AND REEVE'S GENERAL MATHEMATICS

**"The mathematics that people use".**

It trains pupils in the mathematics of everyday life.

It teaches the simple elements of algebra, geometry, trigonometry, etc., in their logical interrelation.

It is based on the "Problem Method" of teaching.

It is easily understood by first-year high-school pupils.

The mathematical idea of function is the organizing and unifying principle.

There is abundant material arranged in a way that allows selection to fit local conditions.
