

OFFICIAL COMMUNICATIONS

Meetings of the Society have been fixed at the following times and places:

STATE COLLEGE, PENNSYLVANIA, SUMMER MEETING AND COLLOQUIUM, September 7–10, 1937.

Abstracts must be in the hands of Associate Secretary T. R. Hollcroft, 531 West 116th St., New York, N. Y., not later than August 3. Abstracts received by the Secretaries not later than July 9 will appear in the July issue of the Bulletin. Professor John von Neumann will deliver a series of colloquium lectures on *Continuous geometry*. By invitation of the Program Committee, Professor Hassler Whitney will give an address entitled *Topological properties of differentiable manifolds*.

NEW YORK CITY, October 30, 1937.

Abstracts must be in the hands of Associate Secretary T. R. Hollcroft, 531 West 116th St., New York, N. Y., not later than October 2. Abstracts received by the Secretaries not later than September 3 will appear in the September issue of the Bulletin. By invitation of the Program Committee, Professor D. J. Struik will deliver an address entitled *The application of tensor analysis to problems of electrical engineering*.

PASADENA, CALIFORNIA, November 27, 1937.

Abstracts are due by October 30, 1937.

R. G. D. RICHARDSON, *Secretary of the Society*.

Articles for insertion in the BULLETIN should be addressed to the Managing Editor, D. R. CURTISS, Northwestern University, Evanston, Ill. Reviews should be sent to W. R. LONGLEY, Yale University, New Haven, Conn. Notes should be sent to H. W. KUHN, Ohio State University, Columbus, Ohio.

Subscriptions to the BULLETIN, orders for back numbers, and inquiries in regard to non-delivery of current numbers should be addressed to the American Mathematical Society, 450–459 Ahnaip St., Menasha, Wis., or Low Memorial Library, 531 West 116th St., New York, N. Y.

The initiation fees and the annual dues of members of the Society (see this BULLETIN, p. 322, May, 1930; and the List of Officers and Members, September, 1936, p. 67) are payable to the Treasurer of the Society, Professor P. A. Smith, Low Memorial Library, 531 West 116th St., New York, N. Y.

WHOLE NUMBER 451

CONTENTS

	PAGE
Some Topics in Sampling Theory. By H. L. RIETZ	209
A Generalization of Schwarz's Lemma. By CONSTANTIN CARATHÉODORY	231
A Note on Matrices Defining Total Real Fields. By A. A. ALBERT	242
The Category and Borel Class of Certain Subsets of \mathcal{L}_p . By J. C. OXTOBY	245
A Generalized Element of Decomposition for Doubly Periodic Functions. By G. D. NICHOLS	249
Errata in the Lehmer Factor Stencils. By J. D. ELDER . .	253
An Application of Derivatives of Non-Analytic Functions in Plane Stress Problems. By V. P. JENSEN and D. L. HOLL	256
On Certain Configurations of Points in Space and Linear Systems of Surfaces with these as Base Points. By ARNOLD EMCH	261
Einstein Spaces of Class One. By C. B. ALLENDOERFER . .	265
An Arithmetic Function. By LEONARD CARLITZ	271
On Line Integrals and Differential Equations, especially those of Dynamics. By D. C. LEWIS, JR.	277
A Simplified Solution of the Equation $\Delta y(x) = F(x)$. By I. M. SHEFFER	283
On the Summability by Positive Typical Means of Se- quences $\{f(n\theta)\}$. By M. S. ROBERTSON	287
Postulates for Boolean Algebra in Terms of Ternary Re- jection. By ALBERT WHITEMAN	293
Some Formulas for Factorable Polynomials in Several Indeterminates. By LEONARD CARLITZ	299

For official Communications and Notes, see the inside of the back cover.
