

OFFICIAL COMMUNICATIONS

MEETINGS OF THE SOCIETY

SEATTLE, WASHINGTON, June 20, 1940.

Abstracts must have been in the hands of Associate Secretary T. M. Putnam, University of California, Berkeley, Calif., not later than May 23. By invitation of the Program Committee Professor John von Neumann will deliver an address before a joint meeting of the Society and the American Physical Society.

HANOVER, NEW HAMPSHIRE, September 10–12, 1940.

Abstracts must be in the hands of Associate Secretary T. R. Hollcroft, 531 West 116th St., New York, N. Y., not later than August 6. Abstracts received by August 1 will appear in the September issue of this BULLETIN. The series of four Colloquium Lectures will be on *Analytic topology* by Professor G. T. Whyburn. By invitation of the Program Committee, Professor Leonard Carlitz will give an address entitled *Arithmetic of polynomials in a Galois field*.

Due to the fact that this meeting is to be a week later than usual, the Mathematical Association of America has scheduled all its sessions for September 9. There will be a joint session on the afternoon of September 10 with the Institute of Mathematical Statistics.

NEW YORK CITY, October 26, 1940.

Abstracts must be in the hands of Associate Secretary T. R. Hollcroft, 531 West 116th St., New York, N. Y., not later than September 28. Abstracts received by August 1 will appear in the September issue of this BULLETIN. By invitation of the Program Committee, Professor H. B. Curry will deliver an address entitled *Some aspects of the problem of mathematical rigor*.

DETROIT, MICHIGAN, November 22–23, 1940.

Abstracts must be in the hands of Associate Secretary W. L. Ayres, University of Michigan, Ann Arbor, Mich., not later than October 25. Abstracts received by October 1 will appear in the November issue of this BULLETIN. By invitation of the Program Committee Professors Barkley Rosser and H. S. Wall will deliver addresses.

LOS ANGELES, CALIFORNIA, November 23, 1940.

Abstracts must be in the hands of Associate Secretary T. M. Putnam, University of California, Berkeley, Calif., not later than October 26. Abstracts received by October 1 will appear in the November issue of this BULLETIN.

ANNUAL MEETING: BATON ROUGE, LOUISIANA, December 30, 1940– January 1, 1941.

CHICAGO, ILLINOIS, Summer, 1941.

R. G. D. RICHARDSON, *Secretary of the Society*.

Articles for insertion in the BULLETIN should be typewritten, double spaced, and the author should keep a complete copy. Papers in algebra and theory of numbers should be sent to A. A. ALBERT, University of Chicago, Chicago, Ill.; in analysis to L. M. GRAVES, University of Chicago, Chicago, Ill.; in other fields to P. A. SMITH, Barnard College, Columbia University, New York, N. Y. Reviews should be sent to VIRGIL SNYDER, 214 University Ave., Ithaca, N. Y., and items for Notes to H. W. KUHN, Ohio State University, Columbus, Ohio. All other communications to the editors should be addressed to the Managing Editor, TOMLINSON FORT, Lehigh University, Bethlehem, Pa.

The initial fees and the annual dues of members of the Society (see this BULLETIN, May, 1930, p. 322; and the List of Officers and Members, September, 1938, p. 75) are payable to the Treasurer of the Society, B. P. GILL, Low Memorial Library, 531 West 116th St., New York, N. Y.

CONTENTS

Vol. 46, No. 6

JUNE, 1940

Whole No. 489

	Page
Existence and differentiability theorems for the solutions of variational problems for multiple integrals. By C. B. MORREY, JR.	439
Nullifying functions. By F. J. MURRAY.	459
Certain self-reciprocal functions. By BRIJ MOHAN.	466
A remark on the sum and the intersection of two normal ideals in an algebra. By TADASI NAKAYAMA.	469
A note on convex functions. By BERNARD FRIEDMAN.	473
Real asymptotic solutions of real differential equations. By M. H. MARTIN.	475
On the supporting-plane property of a convex body. By DAVID MOSKOVITZ and L. L. DINES.	482
A generalization of Ostrowski's theorem on matric identities. By N. H. MCCOY.	490
The radius and modulus of n -valence for analytic functions whose first $n-1$ derivatives vanish at a point. By L. H. LOOMIS.	496
Inverse problems of the calculus of variations for multiple integrals. By W. A. PATTERSON.	502
Copeland's definition of a Stieltjes integral. By R. L. JEFFERY. . .	512
A theorem on the rotation group of the two-sphere. By DEANE MONTGOMERY and LEO ZIPPIN.	520
On ordered algebras. By A. A. ALBERT.	521
Simplicial intersection chains for an abstract complex. By W. W. FLEXNER.	523
On translations of functions and sets. By R. P. AGNEW. . . .	525
A new formula for the Bernoulli numbers. By H. L. GARABEDIAN.	531
On a problem concerning probability and its connection with the theory of diffusion. By M. KAC.	534
The solution of harmonic equations by means of definite integrals. By H. BATEMAN.	538
Sur le système de Souslin d'ensembles dans l'espace transfini. By ISAIE MAXIMOFF.	543
On linear polygon transformations. By JESSE DOUGLAS.	551
Axioms for Moore spaces and metric spaces. By C. W. VICKERY. .	560
The automorphisms of the symmetric group. By I. E. SEGAL. . .	565
A correction to "A note on linear functionals." By R. P. BOAS, JR., and J. W. TUKEY.	566
