## Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104.

Book Reviews should be sent to GIAN-CARLO ROTA, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139.

Research Announcements should be sent to some member of the Council of the Society, and communicated by him to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720.

All other communications to the editors should be sent to the Managing Editor, MURRAY GERSTENHABER, at the above address.

The members of the Council for 1968 are: R. D. Anderson, Louis Auslander, Paul T. Bateman, R. H. Bing, David H. Blackwell, Armand Borel, Raoul Bott, William Browder, Edgar H. Brown Jr., David Buchsbaum, R. C. Buck, C. W. Curtis, J. B. Diaz, Herbert Federer, Walter Feit, Avner Friedman, Kurt Friedrichs, Wolfgang H. Fuchs, Murray Gerstenhaber, Irving L. Glicksberg, John W. Green, P. R. Halmos, O. G. Harrold, Henry Helson, Israel N. Herstein, Eugene Isaacson, Joseph J. Kohn, Serge Lang, George Mackey, Saunders Mac Lane, H. P. McKean, Jr., W. T. Martin, A. P. Mattuck, Ernest A. Michael, C. B. Morrey, Jr., J. K. Moser, G. D. Mostow, Ivan Niven, R. S. Palais, Frank Peterson, Richard S. Pierce, Everett Pitcher, M. H. Protter, Irving Reiner, Gian-Carlo Rota, Stephen Smale, Jacob T. Schwartz, Dana S. Scott, George Seligman, Norman E. Steenrod, Michio Suzuki, P. Emery Thomas, W. R. Wasow, John Wermer, Bertram Yood, Oscar Zariski.

## Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra, number theory, and algebraic geometry should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in modern or classical analysis to IRVING GLICKSBERG, Department of Mathematics, University of Washington, Seattle, Washington 98105 or to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850; in set-theoretic and general topology to ERNEST A. MICHAEL, Department of Mathematics, University of Washington, Seattle, Washington 98105; in algebraic topology and all other geometry to P. EMERY THOMAS, Department of Mathematics, University of California, Berkeley, California 94720; in applied mathematics, differential equations, and related areas of analysis to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in probability, statistics, and related fields to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in logic, set theory, and related areas to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801. All other communications should be addressed to the Managing Editor, ARTHUR MATTUCK.

## Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to J. J. KOHN, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in topology to FRANKLIN PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to D. A. BUCHSBAUM, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in statistics and probability to H. P. MCKEAN, Department of Mathematics, Rockefeller University, New York, New York 10021; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, DANA SCOTT.

### Soviet Mathematics—Doklady

SOVIET MATHEMATICS—DOKLADY is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMI NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long. Issued bimonthly.

### Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes of MATHEMATICAL REVIEWS will be published in 1967, Volume 33, and Volume 34. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

### Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P.O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

### Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

### Chinese Mathematics—Acta

This is a cover-to-cover translation into English of Acta Mathematica Sinica, a bimonthly published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

### New Publications

This quarterly journal announces new books and journals in all fields of higher mathematics, including a section on both forthcoming and recently published books. The information is acquired from several sources, such as pamphlets and catalogs received from publishers and book dealers from many parts of the world.

## CONTENTS—Continued from back cover

Richard Askey. Jacobi polynomial expansions with positive coefficients and imbeddings of projective spaces.....	301
J. B. Diaz and Beatriz Margolis. A fixed point theorem of the alternative, for contractions on a generalized complete metric space.....	305
Michael Barr. A note on commutative algebra cohomology.	310
J. C. Cantrell and R. C. Lacher. Flattening a submanifold in codimensions one and two.....	314
Elmor L. Peterson and J. G. Ecker. Geometric programming: a unified duality theory for quadratically constrained quadratic programs and $l_p$ -constrained $l_p$ -approximation problems.....	316
James A. Yorke. Extending Liapunov's second method to non-Lipschitz Liapunov functions.....	322
Richard D. Pollack. Restricted Lie algebras of bounded type.....	326
Herman Rubin. Representation of nonnegative continuous functions on product spaces.....	332
J. P. May. The cohomology of principal bundles, homogeneous spaces, and two-stage Postnikov systems.....	334
C. R. Putnam. Wiener-Hopf operators and absolutely continuous spectra. II.....	340
J. L. Walsh. Note on classes of functions defined by integrated Lipschitz conditions.....	344
J. W. T. Youngs. Remarks on the Heawood conjecture (nonorientable case).....	347
J. W. T. Youngs. The nonorientable genus of $K_n$ .....	354
Richard Beals. Global asymptotic estimates for elliptic spectral functions and eigenvalues.....	358
John Stallings. Groups of dimension 1 are locally free.....	361
Ludwig Arnold and Johannes Michalíček. On the norm of stable measures.....	364
William Stenger. On the projection of a selfadjoint operator..	369
Edgar Kraut, Stavros Busenberg and William Hall. On an additive decomposition of functions of several complex variables.....	372
L. R. Bragg and J. W. Dettman. Related problems in partial differential equations.....	375
J. L. Bryant and C. L. Seebeck, III. Locally nice embeddings in codimension three.....	378
Erratum, Volume 73.....	380

# CONTENTS

March, 1968

## Invited Address

David Gale. A mathematical theory of optimal economic development.....	207
The November Meeting in Albuquerque.....	224

## Research Announcements

Edwin Hewitt and Kenneth A. Ross. A maximal problem in harmonic analysis. III.....	225
Bernard Russo. Isometries of $L^p$ -spaces associated with finite von Neumann algebras.....	228
J. Wolfgang Smith. An exact sequence for submersions.....	233
W. F. Lucas. A game with no solution.....	237
Yung-Chow Wong. Conjugate loci in Grassmann manifolds..	240
David Lay. Characterizations of the essential spectrum of F. E. Browder.....	246
John Dauns. Representation of $F$ -rings.....	249
Valentin Poénaru. Constructions on low-dimensional differentiable manifolds.....	253
S. Helgason and A. Korányi. A Fatou-type theorem for harmonic functions on symmetric spaces.....	258
George K. Francis. The folded ribbon theorem for regular closed curves in the plane.....	264
Ernest Shult. The solution of Boen's problem.....	268
Peter S. Landweber. Conjugations on complex manifolds and equivariant homotopy of $MU$ .....	271
Beatriz Margolis. On some fixed points theorems in generalized complete metric spaces.....	275
R. B. Darst. On a theorem of Nikodym with applications to weak convergence and von Neumann algebras.....	283
R. N. Bhattacharya. Berry-Esseen bounds for the multi-dimensional central limit theorem.....	285
M. M. Rao. Local functionals and generalized random fields.	288
Sidnie Drescher Feit. $k$ -mersions of manifolds.....	294
I. D. Berg and L. A. Rubel. Densities on locally compact Abelian groups.....	298
