

## Journals Published by the American Mathematical Society

---

---

### Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The subscription price is \$12.00 per annual volume of six numbers.

Invited Addresses offered for publication should be sent to MURRAY GERSTENHABER, Department of Mathematics, University of Pennsylvania, Philadelphia, Pennsylvania 19104.

Book Reviews should be sent to GIAN-CARLO ROTA, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139.

All Research Announcements should be sent to M. H. PROTTER, Department of Mathematics, University of California, Berkeley, California 94720.

All other communications to the editors should be sent to the Managing Editor, MURRAY GERSTENHABER, at the above address.

### Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics and is devoted principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character, for which there is normally no other outlet.

Papers in algebra, number theory, and algebraic geometry should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois; in modern or classical analysis to IRVING GLICKSBERG, Department of Mathematics, University of Washington, Seattle, Washington 98105 or to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850; in set-theoretic and general topology to ERNEST A. MICHAEL, Department of Mathematics, University of Washington, Seattle, Washington 98105; in algebraic topology and all other geometry to P. EMERY THOMAS, Department of Mathematics, University of California, Berkeley, California 94720; in applied mathematics, differential equations, and related areas of analysis to WOLFGANG WASOW, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in probability, statistics, and related fields to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706; in logic, set theory, and related areas to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801. All other communications should be addressed to the Managing Editor, ARTHUR MATTUCK.

### Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

Papers in analysis and applied mathematics should be sent to J. J. KOHN, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in topology to FRANKLIN PETERSON, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139; in algebra, number theory, and logic to D. A. BUCHSBAUM, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in geometry and abstract analysis to R. S. PALAIS, Department of Mathematics, Brandeis University, Waltham, Massachusetts 02154; in statistics and probability to H. P. McKEAN, Department of Mathematics, Rockefeller University, New York, New York 10021; in mathematical logic and foundations to DANA SCOTT, Department of Mathematics, Stanford University, Stanford, California 94305. All other communications to the editors should be addressed to the Managing Editor, DANA SCOTT.

## CONTENTS—*continued from back cover*

David G. Ebin and Jerrold E. Marsden. Groups of diffeomorphisms and the solution of the classical Euler equations for a perfect fluid.....	962
Richard S. Palais. The Morse lemma for Banach spaces.....	968
William Jaco. Three-manifolds with fundamental group a free product.....	972
Joel M. Cohen and Herman Gluck. Stacked bases for modules....	978
John R. Faulkner. Octonion planes in characteristic two.....	980
Andreas Dress. On the decomposition of modules.....	984
Robert Lee Wilson. Nonclassical simple Lie algebras.....	987
H. I. Brown, J. P. Crawford and H. H. Stratton. On summability fields of conservative operators.....	992
James D. Stasheff. Manifolds of the homotopy type of (non-Lie) groups.....	998
R. L. Davis. A Galois theory for a class of purely inseparable exponent two field extensions.....	1001
W. H. Summers. Products of fully complete spaces.....	1005
Mitsuyoshi Kato. Relative Hauptvermutung for neighborhoods of 1-flat submanifolds with codimension two.....	1006
Yum-Tong Siu. Analytic sheaves of local cohomology.....	1011
J. Wolfgang Smith. Commuting vectorfields on open manifolds....	1013
James W. Vick. An application of $K$ -theory to equivariant maps.....	1017
Kuo-Tsai Chen. An algebraic dualization of fundamental groups.	1020
Kurt Kreith. A Sturm theorem for strongly elliptic systems and applications.....	1025
James R. Brown. A universal model for dynamical systems with quasi-discrete spectrum.....	1028
Andreas Dress. On integral representations.....	1031
David Williams. Markov properties of Brownian local time.....	1035
Stephen Fisher. Another theorem on convex combinations of unimodular functions.....	1037
Alan Weinstein. Symplectic structures on Banach manifolds....	1040

---

The members of the Council for 1969 are: R. D. Anderson, Louis Auslander, Hyman Bass, P. T. Bateman, D. H. Blackwell, Armand Borel, Raoul H. Bott, Felix Browder, William Browder, E. H. Brown, Jr., David Buchsbaum, Paul J. Cohen, H. S. M. Coxeter, Avner Freidman, K. O. Friedrichs, W. H. J. Fuchs, F. W. Gehring, Murray Gerstenhaber, Leonard Gillman, Wallace Givens, Irving Glicksberg, P. R. Halmos, O. G. Harrold, I. N. Herstein, Eugene Isaacson, Victor Klee, J. J. Kohn, Ray A. Kunze, Serge Lang, George Mackey, Saunders MacLane, W. T. Martin, A. P. Mattuck, H. P. McKean, Jr., E. Michael, C. B. Morrey, Jr., J. K. Moser, R. S. Palais, Frank Peterson, R. S. Pierce, Everett Pitcher, Murray Protter, Irving Reiner, Gian-Carlo Rota, J. T. Schwartz, Dana Scott, George Seligman, Stephen Smale, N. E. Steenrod, Michio Suzuki, P. E. Thomas, W. R. Wasow, Bertram Yood, Oscar Zariski.

# CONTENTS

September, 1969

R. L. Wilder. Trends and social implications of research . . . . .	891
Franklin P. Peterson. Characteristic classes—old and new . . . . .	907
P. A. Meyer. Review of "Markov processes and potential theory," by R. M. Blumenthal and R. K. Getoor . . . . .	912
F. P. Peterson. Review of "Algebraic topology," by Edwin H. Spanier . . . . .	916
James A. Jenkins. Review of "Value distribution theory," by Leo Sario and Kiyoshi Noshiro . . . . .	917
Joseph G. Stampfli. Review of "A Hilbert space problem book," by Paul R. Halmos . . . . .	923
William P. Ziemer. Review of "Plateau's problem: an invitation to varifold geometry," by F. J. Almgren, Jr. . . . .	924
Louis Weisner. Review of "Lie theory and special functions," by Willard Miller, Jr. . . . .	925
G. Hochschild. Review of "Rapport sur la cohomologie des groupes," by Serge Lang . . . . .	927
M. Mahowald. Review of "Cohomology operations and applica- tions in homotopy theory," by Robert E. Mosher and Martin C. Tangora . . . . .	929
The April meeting in Cincinnati . . . . .	930
The April meeting in Santa Cruz . . . . .	932
Report of the Treasurer . . . . .	933
Arthur Sard. A theory of cotypes . . . . .	936
Louis F. McAuley. Certain mappings or decompositions which are topologically projections . . . . .	941
Moses Glasner and Richard Katz. A note on the Royden boundary . . . . .	945
David Colton and Robert P. Gilbert. Function theoretic methods in the theory of boundary value problems for generalized meta- harmonic functions . . . . .	948
Myron Goldstein and T. R. Chow. A theorem of Stout . . . . .	953
Andreas Dress. On relative Grothendieck rings . . . . .	955
R. E. Williams. A note on rings with a weak algorithm . . . . .	959
