

the most widely used
scientific information system in the world

Try any edition free for 4 weeks.

Nearly 200,000 professionals of all types use the *Current Contents*[®] system every week to locate and obtain new journal articles relevant to their work. And they've got good reasons.

Current Contents is the most comprehensive, least complicated way to make sure you learn of new developments in your field while they're still new. Just an hour a week spent scanning any edition of *Current Contents* lets you sort through everything that's published in a thousand or more journals. With *CC*[®] it's easy to pick out just those articles you want to read. Without handling the journals. Without increasing your journal subscription expenses.

Find out why so many people like you use *Current Contents*. Get more information and a free 4-week subscription by completing the coupon.

The journal you are reading and 5000 others are regularly covered in *CURRENT CONTENTS*[®].

Communications in
**Mathematical
Physics**

Volume 34 · Number 3 · 1973

Contents

- H. Araki: Golden-Thompson and Peierls-Bogolubov
Inequalities for a General von Neumann
Algebra 167
- Y. M. Park: Lorentz Covariance of the $P(\varphi)_2$ Quantum Field
Theory without Higher Order Estimates 179
- H. Roos: Additivity of the Entropy and Definition of the
Temperature for Quantum Systems 193
- J. F. Gille: Non Quasi-free Classes of Product States of the
C.C.R.-Algebra 223
- A. Papapetrou: Shock Waves in the Newman-Penrose
Formalism 229
- E. B. Davies: The Infinite Atom Dicke Maser Modell II 237
