Berlin Heidelberg New York

The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproductions, also in microform, is transferred to the publisher.

Alle Rechte, einschließlich das der Übersetzung in fremde Sprachen und das der fotomechanischen Wiedergabe oder einer sonstigen Vervielfältigung, auch in Mikroform, vorbehalten. Jedoch wird gewerblichen Unternehmen für den innerbetrieblichen Gebrauch nach Maßgabe des zwischen dem Börsenverein des Deutschen Buchhandels e. V. und dem Bundesverband der Deutschen Industrie abgeschlossenen Rahmenabkommens die Anfertigung einer fotomechanischen Vervielfältigung gestattet. Wenn für diese Zeitschrift kein Pauschalabkommen mit dem Verlag vereinbart worden ist, ist eine Wertmarke im Betrage von DM 0,40 pro Seite zu verwenden. *Der Verlag läßt diese Beträge den Autorenverbänden zufließen.*

Commun. math. Phys. - CMPHAY 40 (1) 1-82(1975)

27. II. 1975

Communications in Mathematical Physics

It is a fundamental condition that manuscripts have not been, and will not be published or submitted for publication elsewhere, either simultaneously or at a later date. With the acceptance of a manuscript for publication, the publishers acquire the sole copyright for all languages and countries. Unless special permission has been granted by the publishers, no photographic reproductions, microform or any other reproductions of a similar nature may be made of the journal, of individual contributions contained therein or of extracts therefrom.

100 offprints of each article will be supplied to the author free-of-charge and additional copies may be obtained at cost price if ordered before the issue goes to press.

Manuscripts may be sent to:

Prof. H. Araki, Research Institute for Mathematical Sciences, Kyoto University, Kyoto, Japan

Mathematical methods (Functional analysis, operator algebra and group theory, with direct relevance to physics)

Prof. J. Ehlers, Max-Planck-Institut für Physik und Astrophysik, Föhringer Ring 6, D-8000 München 40, Bundesrepublik Deutschland

General relativity (Gravitation and classical field theory)

Prof. G. Gallavotti, Università di Napoli, Istituto di Fisica Teorica, Mostra d'Oltremare, I-80125 Napoli, Italia (send registered mail)

Equilibrium statistical mechanics (Thermodynamic functions, phase transitions, equilibrium states, exactly soluble models)

Prof. R. Haag, from September 1, 1974 to August 1, 1975: CERN, Theory Division, CH-1211 Geneva 23, Switzerland

General structure of quantum field theory and foundations of quantum mechanics

Prof. K. Hepp, Theoretische Physik, E.T.H. Zürich, Hönggerberg, CH-8049 Zürich, Schweiz

Chief Editor

Prof. W. Hunziker, Theoretische Physik, E.T.H. Zürich, Hönggerberg, CH-8049 Zürich, Schweiz

Classical and quantum mechanics of finitely many degrees of freedom

Prof. J. L. Lebowitz, Belfer Graduate School of Science, Yeshiva University, New York, N. Y. 10033, USA

Nonequilibrium statistical mechanics (Time development of infinite systems, ergodic theory, transport theory, random processes, dissipative phenomena)

Prof. J. Moser, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, N. Y. 10012, USA

Dynamical systems (Differential equations and their application to physical systems)

Prof. K. Symanzik, DESY, Notkestieg 1, D-2000 Hamburg 52, Bundesrepublik Deutschland

Lagrangian quantum field theory (Perturbative approach)

Prof. A. S. Wightman, Princeton University, Jadwin Hall, Princeton, N. J. 08540, USA

Constructive quantum field theory

In order to avoid delay in publication this journal appears in loose numbers which can be subsequently assembled in volumes. One volume usually consists of 3 numbers. The price of one volume is DM 148,— plus postage and handling.

Wichtiger Hinweis für Autoren und Abonnenten!

Um die extrem gestiegenen Papier- und Satzkosten teilweise aufzufangen und ein drucktechnisch günstigeres Papierformat einsetzen zu können, erscheint diese Zeitschrift in einem größeren Format mit einem erweiterten Satzspiegel (12,2 x 19,4 cm). Diese Erweiterung bewirkt eine Reduzierung der Seitenzahl bei unveränderter Textmenge pro Band. Wir bitten unsere Abonnenten um Verständnis für diese Maßnahme.

Important notice to authors and subscribers!

In order to compensate in part for the increased paper and printing costs and to be able to use a paper size which allows printing to be done more economically, this journal is now appearing in a larger format with an extended printing area (12,2 x 19,4 cm). As a result of this extension, the number of pages can be reduced without a reduction in the amount of text per volume.

We hope our subscribers will appreciate the reasons for this change.
