
Why do things half-way?

ASTRONOMY AND ASTROPHYSICS

A European Journal

Recognized as a "Europhysics Journal" by the European Physical Society

Astronomy and Astrophysics is the most important journal in its field to be published outside North America. Established in 1969, it is the result of the merging of six renowned European journals in astronomy and astrophysics. **Astronomy and Astrophysics** presents papers on all aspects of astronomy and astrophysics – theoretical, observational, and instrumental – regardless of the techniques employed – optical, radio, particles, space vehicles, numerical analysis, etc. Letters to the editor, research notes and occasional review papers are also included.

Astronomy and Astrophysics is divided into thirteen sections:

1. Letters
2. Cosmology
3. Extragalactic astronomy
4. Galactic structure and dynamics
5. Stellar clusters and associations
6. Formation, structure and evolution of stars
7. Stellar atmospheres
8. Diffuse matter in space
(including H II regions and planetary nebulae)
9. The Sun
10. The solar system
11. Celestial mechanics and astrometry
12. Physical and chemical processes
13. Instruments, data processing, and computational methods

Astronomy and Astrophysics is edited by an international staff of scientists.

Editors-in-Chief: C. Cesarski, Meudon, France and M. Grewing, Tübingen, Germany, Federal Republic

Letter-Editor: S. R. Pottasch, Groningen, The Netherlands

... and a Board of Directors

Subscription Information: ISSN 0004-6361 Title No. 230

1985, vol. 142-153 (2 issues each): DM 1890,-, plus carriage charges DM 42,37 domestic, DM 87,60 foreign.

Please send your order to your bookseller or to the publisher.

Personal subscription rates are available to isolated workers or to those members of institutes who can prove that their institute has already a full-price institutional subscription. The annual personal subscription rate is DM 37,80, plus carriage charges (see Subscription Information). Application forms for individual subscriptions may be obtained from ESO, Karl-Schwarzschild-Str.2, D-8046 Garching b. München, FRG

Title No. 288

Editors in Chief: **G. Kramer**, Hamburg; **H. Satz**, Bielefeld*Editors:* **R. Barbieri**, Pisa; **T. Ferbel**, Rochester; **K. Fujikawa**, Hiroshima; **P. Hasenfratz**, Genf; **C. Jarlskog**, Stockholm; **A. Krzywicki**, Orsay; **P. Söding**, Hamburg; **B. Stech**, Heidelberg; **J. C. Taylor**, Cambridge; **F. Wilczek**, Santa Barbara**Aims and Scope:**

Zeitschrift für Physik C, **Particles and Fields** is devoted to the experimental and theoretical investigation of elementary particles. In view of the steadily growing interplay of theory and experiment in this field, particular emphasis is given to a clear and complete presentation of research.

The topics covered include:

- Experimental and theoretical particle physics
- Structure of elementary particles
- High energy processes
- Strong, electromagnetic and weak interactions
- Symmetry principles
- Unification schemes
- S-matrix theory
- Quantum field theory
- Lattice field theory

Special features: Rapid publication, no page charge.
Language of publications is English.

Zeitschrift für Physik appears in three parts: A: Atoms and Nuclei; B: Condensed Matter; C: Particles and Fields
Each part may be ordered separately.

Coordinating editor for Zeitschrift für Physik, Parts A, B and C: O. Haxel, Heidelberg

The Mathematical Intelligencer

Editor-in-Chief: John Ewing, Department of Mathematics,
Indiana University, Bloomington, IN 47405, USA

European Editor: Ian Stewart, Mathematics Institute,
University of Warwick, Coventry CV4 7AL, England

Book Review Editor: Gary Cornell, Department of Mathematics,
University of Connecticut, Storrs, CT 06268, USA (together with
Ian Stewart)

The Mathematical Intelligencer is a unique magazine for mathematicians. Covering the entire range of mathematics, the *Intelligencer* features expository articles on current research, history, philosophy, and mathematical trivia. Readers particularly enjoy its fresh approach to mathematics as a homogeneous subject, and use it as a forum for ideas that often don't quite fit into other mathematics journals.

If you were a subscriber in 1985, you would have read the following articles in Vol. 7

Denis Guedji: An interview with Claude Chevalley

Norbert Schappacher: The Max Planck Institute in Bonn:
Historical perspectives

René Thom: Virtues and dangers of interdisciplinary research

Jeremy Gray: Who would have won the Fields medal
100 years ago?

Ch. Pommerenke: The Bieberbach conjecture

Ronnie Wells: Nonlinear field equations and twistor theory

Caroline Series: The geometry of Markov numbers

Steven Strogatz: Yeast oscillations and the Non-retraction theorem

P. R. Drake: Progress in the philosophy of mathematics

Roger Heath-Brown: The first case of Fermat's last theorem
