Copyright

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e. g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for photocopies in the USA:

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0010-3616, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

Springer L^AT_EX and plain-T_EX macros

We can use your T_EX files directly for phototypesetting if you have used our macros. Makropackages are available for the following journals:

***L*Jour1** L^AT_EX styles for Acta Informatica, Applicable Algebra in Engineering, Communication and Computing, Archive for Mathematical Logic, Astronomy & Astrophysics Reviews, Calculus of Variations, Communications in Mathematical Physics, Continuum Mechanics and Thermodynamics, Economic Theory, Inventiones mathematicae, Journal of Evolutionary Economics, Journal of Mathematical Biology, Manuscripta mathematica, Mathematische Annalen, Mathematische Semesterberichte, Mathematische Zeitschrift, Numerische Mathematik, Probability Theory and Related Fields, Statistical papers, Theoretica Chimica Acta

***P*Jour1g** global plain T_EX packages for all journals mentioned above; ***P*Jour 1** may still be used. All packages are available via mailserver, FTP server or on DOS diskettes.

Mailserver

Send an e-mail message to svserv@vax.ntp.springer.de which must contain one (several) of the following commands:

***L*Jour1** `get /tex/latex/ljour1.zip`
***P*Jour1g** `get /tex/plain/pjour1g.zip`

In order to be transmitted ungarbled via the net, the files are pkzipped and uuencoded. The line `get /tex/help-tex.txt` in your e-mail to `svserv` will send you a file explaining how to unpack the files you receive. Please do not send regular e-mail to this address.

FTP server

The internet address is 192.129.24.12 (trick.ntp.springer.de) The username is FTP or ANONYMOUS and the files are in the directory `/pub/tex`

Diskettes

To get the macro files and the AMS fonts (when needed) on 3.5" DOS diskettes please write to:

Springer-Verlag, Journal Production,
Tiergartenstr. 17
D-69121 Heidelberg, Germany
e-mail: springer@vax.ntp.springer.de
FAX number: x 49 6221 487625

Please indicate clearly which macro package you need and the journal for which your paper is intended.

**Use our L^AT_EX and plain-T_EX macros
to prepare your article
for this and for other Springer journals.**

Zentralblatt für Mathematik

Mathematics Abstracts

A publication with tradition
incorporating
modern technology

1931:

The *Zentralblatt für Mathematik/Mathematics Abstracts* was founded by O. Neugebauer. It covers the entire spectrum of mathematics and information sciences, with emphasis on areas of application. Covering scientific literature world-

wide, the references are drawn from about 2,200 journals and serials, conference contributions, books, reports and preprints.

The *Zentralblatt* is jointly published by Springer-Verlag and Fachinformationszentrum Karlsruhe.

1972:

Giving access to mathematics literature dating back to 1972, the online database **MATH** on STN International offers access to approximately 800,000 citations. Each month the database is updated, and ca. 4,000 records added.

1991:

Containing the abstracts and bibliographic data from *Zentralblatt für Mathematik* for 1985-1990, the **CompactMATH CD-ROM** (updated annually) allows time-independent searching of mathematics literature. The user-friendly software enables users to switch to the **MATH** online database, and displays mathematical formulae graphically on the screen.

*Zentralblatt für
Mathematik –
a service for science*

Natural Operations in Differential Geometry

1993. VI, 434 pp. Hardcover DM 128,-
ISBN 3-540-56235-4

The literature on natural bundles and natural operators in differential geometry was until now scattered in the mathematical journal literature. This book is the first monograph on the subject, collecting this material in a unified presentation.

The book begins with an introduction to differential geometry stressing naturality and functionality, and the general theory of connections on arbitrary fibered manifolds. The functional approach to classical natural bundles is extended

to a large class of geometrically interesting categories. Several methods of finding all natural operators are given and these are identified for many concrete geometric problems. After reducing each problem to a finite order setting, the remaining discussion is based on properties of jet spaces, and the basic structures from the theory of jets are then described in a self-contained manner. The relations of these geometric problems to corresponding questions in mathematical physics are brought out in several places in the book, and it closes with a very comprehensive bibliography of over 300 items.
