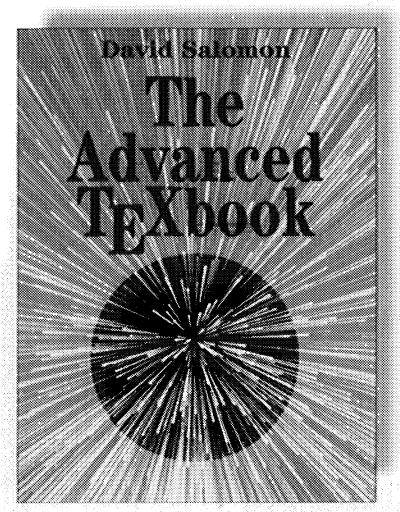
We have the TEXnology



M. Seroul, S. Levy

A Beginner's Book of TEX

1st ed. 1991. Corr. 3rd printing 1995.
XII, 284 pages. Softcover DM 61,–
ISBN 3-540-97562-4

A Beginner's Book of TEX is addressed primarily to beginners, but it contains much information that will be useful to aspiring TEX "wizards". Moreover, the authors kept firmly in mind the diversity of backgrounds that characterizes TEX users: authors in the sciences and in the humanities, secretaries, technical typists. The book contains a careful explanation of all fundamental concepts and commands, but also a wealth of commented examples and "tricks" based on the authors' long experience with TEX.

D. Salomon

The Advanced TEXbook

1995. XX, 482 pages.
Softcover DM 68,– ISBN 0-387-94556-3

Why is TEX so hard to use? Because it is in essence a programming language, and so it is best viewed from this perspective. The author presents a complete course in TEX which will be suitable for users of TEX who want to advance beyond the basics.
The initial chapters introduce the essential workings of TEX, including a detailed discussion of boxes and glue. Later chapters cover a wide range of advanced topics such as: macros, conditionals, tokens, leaders, file I/O, the line-and page-break algorithms, and output routines.
Throughout, numerous examples are given and exercises (with answers) provide a means for readers to test their understanding of the material. As a result, no serious user of TEX will want to be without this text.

M. Doob

TEX: starting from 1

1993. X, 114 pages. Softcover DM 44,–
ISBN 3-540-56441-1

This book is designed for the complete newcomer to TEX. It starts by showing how to typset simple text that mostly uses the defaults predefined by TEX. By use of graded exercises, the situations covered slowly become more complex and include many different types of mathematical constructions and tables. In the end it is possible to handle almost any standard mathematical situation.

Prices subject to change without notice. In EU countries the local VAT is effective.
