## TABLE OF CONTENTS

VOLUME 14, 1984

|  |     |
|--|-----|
| CHEN, X. Y. and T. MATUMOTO: On generic 1-parameter families of $C^\infty$ -maps of an $n$ -manifold into a $(2n-1)$ -manifold ..... | 547 |
| EI, S.-I. and M. MIMURA: Transient and large time behaviors of solutions to heterogeneous reaction-diffusion equations .....         | 649 |
| FUJIKOSHI, Y. and R. NISHII: On the distribution of a statistic in multivariate inverse regression analysis .....                    | 215 |
| FUKAGAI, N.: On decaying entire solutions of second order sublinear elliptic equations .....   | 551 |
| HEMMI, Y.: On finite $H$ -spaces given by sphere extensions of classical groups .....  | 451 |
| HONDA, M.: Joins of weakly ascendant subalgebras of Lie algebras .....   | 333 |
| IMAI, H.: Picard principle for linear elliptic differential operators .....  | 527 |
| ITO, M.: A remark on singular perturbation methods .....   | 619 |
| KASHIWAGI, Y.: Supersoluble Lie algebras .....   | 575 |
| KAWANO, N.: On bounded entire solutions of semilinear elliptic equations .....   | 125 |
| KAYANO, T. and M. YAMASAKI: Boundary limit of discrete Dirichlet potentials .....  | 401 |
| KENMOCHI, N.: Asymptotic behavior of solutions to a Stefan problem with obstacles on the fixed boundary.....                         | 1   |
| KIJIMA, D., M. NISHI and H. UDA: On the $q$ -dimension of a space of orderings and $q$ -fans .....                                   | 159 |
| KOBAYASHI, Y.: A product formula approach to first order quasilinear equations .....   | 489 |
| KOHNO M.: Derivatives of Stokes multipliers .....  | 247 |
| KOHNO, M. and T. YOKOYAMA: A central connection problem for a normal system of linear differential equations .....                   | 257 |
| KOYAMA, T.: On a product formula for a class of nonlinear evolution equations .....  | 283 |
| KREITH, K.: A class of hyperbolic focal point problems.....  | 213 |
| KUBO, F. and M. HONDA: Quasi-artinian Lie algebras .....   | 563 |
| MAEDA, F.-Y.: Semi-linear boundary value problems with respect to an ideal boundary on a self-adjoint harmonic space .....           | 35  |
| MAEDA, F.-Y.: Removability of polar sets for solutions of semi-linear  |     |

|  |     |
|--|-----|
| equations on a harmonic space .....  | 537 |
| MARUO, O.: Pseudo-coalescent classes of groups .....   | 631 |
| MATUMOTO, T.: Extension problem of diffeomorphisms of a 3-torus<br>over some 4-manifolds .....   | 189 |
| MATUMOTO, T., N. MINAMI and M. SUGAWARA: On the set of<br>free homotopy classes and Brown's construction.....  | 359 |
| MIMURA, M., Y. NISHIURA, A. TESEI and T. TSUJIKAWA: Coex-<br>istence problem of two competing species models with density-dependent<br>diffusion ..... | 425 |
| MIMURA, M. and N. SAWASHITA: On the group of self-homotopy<br>equivalences of principal $S^3$ -bundles over spheres .....                              | 415 |
| MIYAKAWA, T.: Construction of solutions of a semilinear parabolic<br>equation with the aid of the linear Boltzmann equation .....                      | 299 |
| MIZUTA, Y.: Study of the behavior of logarithmic potentials by means<br>of logarithmically thin sets .....   | 227 |
| MURAI, T.: Boundedness of singular integral operators of Calderón<br>type (IV) .....   | 511 |
| NAITO, M.: A note on bounded positive entire solutions of semilinear<br>elliptic equations .....   | 211 |
| NISHIKAWA, M.: Exponential image and conjugacy classes in the<br>group $O(3, 2)$ .....   | 311 |
| OKOCHI, H.: Asymptotic behavior of solutions to certain nonlinear<br>parabolic evolution equations .....   | 265 |
| RÖCKNER, M.: Self-adjoint harmonic spaces and Dirichlet forms .....  | 55  |
| SAWASHITA, N.: Self $H$ -equivalences of $H$ -spaces with applications to<br>$H$ -spaces of rank 2 .....   | 75  |
| SHIBA, M.: The Riemann-Hurwitz relation, parallel slit covering map, and<br>continuation of an open Riemann surface of finite genus .....              | 371 |
| SHINTANI, H.: Two-step methods for ordinary differential equations .....   | 471 |
| SHINTANI, H.: Two-step methods with one off-step node .....  | 479 |
| SIOTANI, M. and Y. FUJIKOSHI: Asymptotic approximations for the<br>distributions of multinomial goodness-of-fit statistics .....                       | 115 |
| SUZUKI, N.: Martin boundary for $\Delta - P$ .....   | 67  |
| TÔGÔ, S.: Locally finite simple Lie algebras .....   | 407 |
| TRENCH, W. F.: Asymptotic theory of perturbed general disconjugate<br>equations II .....   | 169 |
| USAMI, H.: On the elliptic equation $\Delta u = \phi(x)e^u$ in the plane .....   | 571 |
| WAKAYAMA, M.: Zeta functions of Selberg's type for compact quotient<br>of $SU(n, 1)$ ( $n \geq 2$ ) .....  | 597 |
| WATANABE, H.: Diffusion approximations of some stochastic difference<br>equations II .....   | 15  |

CONTENTS

|   | PAGE |
|---|------|
| <b>Y. HEMMI:</b> On finite $H$ -spaces given by sphere extensions of classical groups<br>.....  | 451  |
| <b>H. SHINTANI:</b> Two-step methods for ordinary differential equations .....  | 471  |
| <b>H. SHINTANI:</b> Two-step methods with one off-step node .....   | 479  |
| <b>Y. KOBAYASHI:</b> A product formula approach to first order quasilinear<br>equations .....   | 489  |
| <b>T. MURAI:</b> Boundedness of singular integral operators of Calderón type (IV)<br>.....  | 511  |
| <b>H. IMAI:</b> Picard principle for linear elliptic differential operators .....   | 527  |
| <b>F-Y. MAEDA:</b> Removability of polar sets for solutions of semi-linear equations<br>on a harmonic space .....                             | 537  |
| <b>X. Y. CHEN and T. MATUMOTO:</b> On generic 1-parameter families of $C^\infty$ -maps<br>of an $n$ -manifold into a $(2n-1)$ -manifold ..... | 547  |
