

ILLINOIS JOURNAL OF MATHEMATICS

Volume 58, Number 2

Summer 2014

Andreas Fischer , On smooth locally o-minimal functions	285
Daniel Freeman, Ryan Hotovy and Eileen Martin , Moving finite unit norm tight frames for S^n	311
Robert W. Neel , Martingales arising from minimal submanifolds and other geometric contexts	323
E. G. Katsoulis , The reflexive closure of the adjointable operators	359
Theodoros Vlachos , Isometric deformations of minimal surfaces in $\mathbb{S}^4$	369
Nhan Nguyen, Saurabh Trivedi and David Trotman , A geometric proof of the existence of definable Whitney stratifications	381
Benedikt Steinar Magnússon , Analytic discs, global extremal functions and projective hulls in projective space	391
W. B. Johnson and S. Ortega Castillo , The cluster value problem for Banach spaces	405
P. Cassou-Noguès, T. Chinburg, B. Morin and M. J. Taylor , Hopf algebras and quadratic forms	413
Brian Pigott and Sarah Raynor , Asymptotic stability for KdV solitons in weighted spaces via iteration	443
Daniel Alpay and Palle Jorgensen , Reproducing kernel Hilbert spaces generated by the binomial coefficients	471
Zijian Guo, Rachel Kogan, Hua Qiu and Robert S. Strichartz , Boundary value problems for a family of domains in the Sierpinski gasket	497
Hajime Urakawa , Sasaki manifolds, Kähler cone manifolds and biharmonic submanifolds	521
Rung-Tzung Huang and Yoonweon Lee , The gluing formula of the zeta-determinants of Dirac Laplacians for certain boundary conditions	537
Ghadir Sadeghi and Mohammad Sal Moslehian , Noncommutative martingale concentration inequalities	561
Antonio Tortora and Giovanni Vincenzi , The Engel elements in generalized FC -groups	577
Aleksandra Zapadinskaya , Hölder continuous Sobolev mappings and the Lusin N property	585
