NIHONKAI MATHEMATICAL JOURNAL

Vol. 27, Nos. 1 & 2 (2016)

Contents

Shuhei WADA and Takeaki YAMAZAKI:
Equivalence relations among some inequalities on operator means ... 1

Masatoshi FUJII, Akemi MATSUMOTO and Masaru TOMINAGA:
Simultaneous extensions of Diaz-Metcalf and Buzano inequalities .. 17

Hiroshi ENDO and Ryotaro TANAKA:
Generalized centers and characterizations of inner product spaces .. 29

Hiroyasu MIZUGUCHI:
The constants related to isosceles orthogonality in normed spaces and its dual 41

Yuki SEO:
Fiedler-Ando theorem for Ando-Li-Mathias mean of positive operators 59

Wataru TAKAHASHI:
The split common fixed point problem with families of mappings and strong convergence theorems by hybrid methods in Banach spaces 67

Toshiharu KAWASAKI:
On convergence of orbits to a fixed point for widely more generalized hybrid mappings 89

Keiichi WATANABE:
A confirmation by hand calculation that the Möbius ball is a gyrovector space 99

Masatoshi Fujii and Ritsuo Nakamoto:
A refinement of the grand Furuta inequality 117

Ken-Ichi Mitani, Noriyuki Tabiraki and Tomoyoshi Ohwada:
Note on Dunkl-Williams inequality with n elements 125

Eiichi Nakai:
Pointwise multipliers on Musielak-Orlicz spaces 135

Yoshiaki Okazaki:
Topological linear subspace of $L_0(\Omega, \mu)$ for the infinite measure μ
..... 147

Peng-Ruei Huang and Hiroshi Nakazato:
The boundary of the Q-numerical range of some Toeplitz nilpotent matrix 155

Koji Aoyama:
Viscosity approximation method for quasinonexpansive mappings with contraction-like mappings 167
