

VOLUME 39 NO. 1 2013–14  
**REAL ANALYSIS  
EXCHANGE**

CONTENTS

|  |     |
|--|-----|
| EDITORIAL MESSAGES . . . . .   | i   |
| CONFERENCE ANNOUNCEMENTS . . . . .   | ii  |
| RESEARCH ARTICLES  |     |
| Lingmin Liao and Michał Rams   |     |
| Multifractal Analysis of Some Multiple Ergodic Averages for the Systems with Non-constant Lyapunov Exponents . . . . . | 1   |
| Robert Menkyna   |     |
| On the Sums of Lower Semicontinuous Strong Świątkowski Functions . . . . .   | 15  |
| Gerald Beer and Michael J. Hoffman   |     |
| Tubes about Functions and Multifunctions . . . . .   | 33  |
| Gareth Speight   |     |
| Directional Lower Porosity . . . . .   | 45  |
| Krzysztof Chris Ciesielski and Jakub Jasinski  |     |
| Smooth Peano Functions for Perfect Subsets of the Real Line . .  | 57  |
| Henna Koivusalo  |     |
| Dimension of Uniformly Random Self-Similar Fractals . . . . .  | 73  |
| Rostom Getsadze  |     |
| Essential Divergence in Measure of Multiple Orthogonal Fourier Series . . . . .  | 91  |
| J. A. Astorga-Moreno and S. García-Ferreira  |     |
| Outer Measures on the Real Line by Weak Selections . . . . .   | 101 |
| Krzysztof Chris Ciesielski and Timothy Glatzer   |     |
| Sets of Discontinuities for Functions Continuous on Flats . . .  | 117 |
| Antonio Boccuto and Xenofon Dimitriou  |     |
| Some New Types of Filter Limit Theorems for Topological Group-Valued Measures . . . . .                                | 139 |
| INROADS  |     |
| Viktoria V. Bilet and Oleksiy A. Dovgoshey   |     |
| Investigations of Strong Right Upper Porosity at a Point . . .   | 175 |
| Oswaldo de Oliveira  |     |
| The Implicit and Inverse Function Theorems: Easy Proofs . .  | 207 |

|  |     |
|--|-----|
| Zsigmond Tarcsay   |     |
| A Functional Analytic Proof of the Lebesgue–Darst            |     |
| Decomposition Theorem . . . . .                              | 219 |
| Sokol B. Kaliaj  |     |
| Descriptive Characterizations of Pettis and Strongly McShane |     |
| Integrals . . . . .  | 227 |
| Keqin Liu  |     |
| A Generalization of the Fundamental Theorem of Calculus . .  | 239 |
