ROCKY MOUNTAIN JOURNAL OF MATHEMATICS

Volume 47 2017 Number 4

CONTENTS

Positive solutions for the nonhomogeneous p-Laplacian equation in $\mathbb{R}^N$
By Caisheng Chen and Jing Li 1055

The integral trace form of cyclic extensions of odd prime degree
By Everton Luiz de Oliveira, J. Carmelo Interlando, Trajano Pires da Nóbrega Neto and José Othon Dantas Lopes 1075

Periods of continuous maps on closed surfaces
By Juan Luis García Guirao and Jaume Llibre 1089

Centers for generalized quintic polynomial differential systems
By Jaume Giné, Jaume Llibre and Claudia Valls 1097

Inequalities and bi-Lipschitz conditions for the triangular ratio metric
Parisa Hariri, Matti Vuorinen and Xiaohui Zhang 1121

A characterization of non-Noetherian BFDs and FFDs
Richard Erwin Hasenauer 1149

On factorable rings
By Andrew J. Hetzel and Ashley M. Lawson 1159

Some elementary components of the Hilbert scheme of points
By Mark E. Huibregtse 1169

Heron quadrilaterals via elliptic curves
By Farzali Izadi, Foad Khoshnam and Dustin Moody 1227

Rational convolution roots of isobaric polynomials
By Huilan Li, Trueman MacHenry and Aura Conci 1259

Zeta functions and ideal classes of quaternion orders
By Jonathan W. Sands 1277

The C^*-algebra generated by irreducible Toeplitz and composition operators
By Massoud Salehi Sarvestani and Massoud Amini 1301

CONTENTS CONTINUED ON LAST PAGE

Krull dimension and unique factorization in Hurwitz polynomial rings
By Phan Thanh Toan and Byung Gyun Kang 1317

Remarks on regularity criteria for 2D generalized MHD equations
By Zhuan Ye 1333

Front-like entire solutions for a delayed nonlocal dispersal equation with convolution type bistable nonlinearity
By Guo-Bao Zhang and Ruyun Ma 1355
