

STATISTICAL SCIENCE

Volume 35, Number 3

August 2020

Special Issue on Causal Inference

Editorial: Special Issue on “Causal Inference”	<i>Jason Roy and Dylan Small</i>	335
Matching Methods for Observational Studies Derived from Large Administrative Databases	<i>Ruoqi Yu, Jeffrey H. Silber and Paul R. Rosenbaum</i>	338
Comment: Matching Methods for Observational Studies Derived from Large Administrative Databases	<i>Fredrik Sävje</i>	356
Comment: Matching Methods for Observational Studies Derived from Large Administrative Databases	<i>Mark M. Fredrickson, Josh Errickson and Ben B. Hansen</i>	361
Commentary on Yu et al.: Opportunities and Challenges for Matching Methods in Large Databases	<i>Elizabeth A. Stuart and Benjamin Ackerman</i>	367
Rejoinder: Matching Methods for Observational Studies Derived from Large Administrative Databases	<i>Ruoqi Yu, Jeffrey H. Silber and Paul R. Rosenbaum</i>	371
Linear Mixed Models with Endogenous Covariates: Modeling Sequential Treatment Effects with Application to a Mobile Health Study	<i>Tianchen Qian, Predrag Klasnja and Susan A. Murphy</i>	375
Comment: Clarifying Endogeneous Data Structures and Consequent Modelling Choices Using Causal Graphs	<i>Erica E. M. Moodie and David A. Stephens</i>	391
Moving Toward Rigorous Evaluation of Mobile Health Interventions	<i>Kristin A. Linn</i>	394
Comment: Diagnostics and Kernel-based Extensions for Linear Mixed Effects Models with Endogenous Covariates	<i>Hunyong Cho, Joshua P. Zitovsky, Xinyi Li, Minxin Lu, Kushal Shah, John Sperger, Matthew C. B. Tsilimigras and Michael R. Kosorok</i>	396
Rejoinder: Linear Mixed Models with Endogenous Covariates: Modeling Sequential Treatment Effects with Application to a Mobile Health Study	<i>Tianchen Qian, Predrag Klasnja and Susan A. Murphy</i>	400
Invariance, Causality and Robustness	<i>Peter Bühlmann</i>	404
Comment: Invariance, Causality and Robustness by P. Bühlmann	<i>Vanessa Didelez</i>	427
Comment: Invariance and Causal Inference	<i>Stefan Wager</i>	430
Rejoinder: Invariance, Causality and Robustness	<i>Peter Bühlmann</i>	434
Outcome-Wide Longitudinal Designs for Causal Inference: A New Template for Empirical Studies	<i>Tyler J. VanderWeele, Maya B. Mathur and Ying Chen</i>	437
Comment: On the Potential for Misuse of Outcome-Wide Study Designs, and Ways to Prevent It	<i>Stijn Vansteelandt and Oliver Dukes</i>	467
Comment: Outcome-Wide Individualized Treatment Strategies	<i>Ashkan Ertefaie and Brent A. Johnson</i>	472

(Continued on p. ii)

Statistical Science [ISSN 0883-4237 (print); ISSN 2168-8745 (online)], Volume 35, Number 3, August 2020. Published quarterly by the Institute of Mathematical Statistics, 3163 Somerset Drive, Cleveland, OH 44122, USA. Periodicals postage paid at Cleveland, Ohio and at additional mailing offices.

POSTMASTER: Send address changes to *Statistical Science*, Institute of Mathematical Statistics, Dues and Subscriptions Office, 9650 Rockville Pike—Suite L2310, Bethesda, MD 20814-3998, USA.

STATISTICAL SCIENCE

Volume 35, Number 3

August 2020

(Continued from p. i)

A New Template for Empirical Studies: From positivity to Positivity	<i>Rhian Daniel</i>	476
Rejoinder: The Future of Outcome-Wide Studies	<i>Tyler J. VanderWeele, Maya B. Mathur and Ying Chen</i>	479
A Nonparametric Super-Efficient Estimator of the Average Treatment Effect	<i>David Benkeser, Weixin Cai and Mark J. van der Laan</i>	484
Comment: Increasing Real World Usage of Targeted Minimum Loss-Based Estimators	<i>Mireille E. Schnitzer</i>	496
Comment: Automated Analyses: Because We Can, Does It Mean We Should?	<i>Susan M. Shortreed and Erica E. M. Moodie</i>	499
Comment: Stabilizing the Doubly-Robust Estimators of the Average Treatment Effect under Positivity Violations	<i>Fan Li</i>	503
Rejoinder: A Nonparametric Superefficient Estimator of the Average Treatment Effect	<i>David Benkeser, Weixin Cai and Mark J. van der Laan</i>	511
On Nearly Assumption-Free Tests of Nominal Confidence Interval Coverage for Causal Parameters Estimated by Machine Learning	<i>Lin Liu, Rajarshi Mukherjee and James M. Robins</i>	518
Discussion of “On Nearly Assumption-Free Tests of Nominal Confidence Interval Coverage for Causal Parameters Estimated by Machine Learning”	<i>Edward H. Kennedy, Sivaraman Balakrishnan and Larry Wasserman</i>	540
Rejoinder: On nearly assumption-free tests of nominal confidence interval coverage for causal parameters estimated by machine learning	<i>Lin Liu, Rajarshi Mukherjee and James M. Robins</i>	545
