SPECIAL INVITED PAPER

GEMAN, DONALD AND HOROWITZ, JOSEPH. Occupation densities 1–67
HOROWITZ, JOSEPH AND GEMAN, DONALD. Occupation densities 1–67

ARTICLES AND SHORT COMMUNICATIONS

ASMUSSEN, SØREN. On some two-sex population models 727–744
ASMUSSEN, SØREN AND KURTZ, THOMAS G. Necessary and sufficient conditions for complete convergence in the law of large numbers . 176–182
BELLOW, A. AND DVORETZKY. A. On martingales in the limit 602–606
BERMAN, SIMEON M. A compound Poisson limit for stationary sums, and sojourns of Gaussian processes 511–538
BERMAN, SIMEON M. Isotropic Gaussian processes on the Hilbert sphere 1093–1106
BLACKWELL, D. There are no Borel SPLIFs. 1189–1190
BLOCK, HENRY W. AND SAVITS, THOMAS H. Laplace transforms for classes of life distributions 465–474
BLOCK, HENRY W. AND SAVITS, THOMAS H. Multivariate increasing failure rate average distributions 793–801
BRADLEY, RICHARD C., JR. A note on a mixing condition 636–638
BRAMSON, MAURY AND GRIFFEATH, DAVID. Clustering and dispersion rates for some interacting particle systems on $\mathbb{Z}$ 183–213
BROCKETT, PATRICK L. AND HUDSON, WILLIAM N. Zeros of the densities of infinitely divisible measures 400–403
BROSSARD, JEAN. Comparaison des "normes" L_P du processus croissant et de la variable maximale pour les martingales regulieres à deux indices. Théorème local correspondant 1183–1188
BROWN, MARK. Bounds, inequalities and monotonicity properties for some specialized renewal processes 227–240
CAMBANIS, STAMATIS AND MILLER, GRADY. Some path properties of pth order and symmetric stable processes 1148–1156
CHALEYAT-MAUREL, M., EL KAROUI, N. AND MARCHAL, B. Reflexion discontinue et systemes stochastiques 1049–1067
CHEN, LOUIS H. Y. Martingale transform and random Abel-Dini series 475–482
CHEN, WEN-CHEN AND STARR, NORMAN. Optimal stopping in an urn . 451–464
COGBURN, ROBERT. Markov chains in random environments: The case of Markovian environments 908–916
CRESSIE, NOEL. The asymptotic distribution of the scan statistic under uniformity 828–840
DALEY, D. J. Tight bounds for the renewal function of a random walk 615–621
DE ACOSTA, ALEJANDRO. Exponential moments of vector valued random series and triangular arrays 381–389
DE MARÉ, JACQUES. Optimal prediction of catastrophes with applications to Gaussian processes 841–850

DIACONIS, P. AND FREEDMAN, D. de Finetti's theorem for Markov chains . . . 115–130
DIACONIS, P. AND FREEDMAN, D. Finite exchangeable sequences . . . 745–764
DOBRUSHIN, R. L., GRAY, R. M. AND ORNSTEIN, D. S. Block synchronization, sliding-block coding, invulnerable sources and zero error codes for discrete noisy channels . . . 639–674
DUDLEY, R. M. AND KUELBS, J. Log log laws for empirical measures . 405–418
DUNHAM, JAMES G. Abstract alphabet sliding-block entropy compression coding with a fidelity criterion . . . 1085–1092
DURRETT, RICHARD. On the growth of one dimensional contact processes . . . 890–907
DVORETZKY, A. AND BELLOW, A. On martingales in the limit . . . 602–606
EL KAROUI, N., MARCHAL, B. AND CHALEYAT-MAUREL, M. Reflexion discontinue et systemes stochastiques . . . 1049–1067
ELLIS, MARTIN H. Conditions for attaining $\bar{d}$ by a Markovian joining 431–440
ELLIS, MARTIN H. On Kamae's conjecture concerning the $\bar{d}$-distance between two-state Markov processes . . . 372–376
ERICKSON, K. BRUCE. Rates of escape of infinite dimensional Brownian motion . . . 325–338
ETEMADI, NASROLLAH. Further limit theorems for the range of a two-parameter random walk in space . . . 917–927
FERNHOLZ, LUISA TURRIN. Limit points associated with generalized iterated logarithm laws . . . 390–392
FERNHOLZ, LUISA TURRIN AND TEICHER, HENRY. Stability of random variables and iterated logarithm laws for martingales and quadratic forms . . . 765–774
FREEDMAN, D. AND DIACONIS, P. de Finetti's theorem for Markov chains . . . 115–130
FREEDMAN, D. AND DIACONIS, P. Finite exchangeable sequences . . . 745–764
FREMLIN, D. H. AND TALAGRAND, M. A Gaussian measure on l_∞ . . . 1192–1193
GEMAN, STUART. A limit theorem for the norm of random matrices . . 252–261
GHOUSSOUB, N. AND STEELE, J. MICHAEL. Vector valued subadditive processes and applications in probability . . . 83–95
GLOVER, JOSEPH. Compactifications for dual processes . . . 1119–1134
GRAY, ROBERT M. AND KIEFFER, J. C. Asymptotically mean stationary measures . . . 962–973
GRAY, R. M., ORNSTEIN, D. S. AND DOBRUSHIN, R. L. Block synchronization, sliding-block coding, invulnerable sources and zero error codes for discrete noisy channels . . . 639–674
GREY, D. R. A new look at convergence of branching processes . . . 377–380
GRIFFEATH, DAVID AND BRAMSON, MAURY. Clustering and dispersion rates for some interacting particle systems on $\mathbb{Z}$ . . . 183–213
GUNDY, RICHARD F. Local convergence of a class of martingales in multidimensional time . . . 607–614
GUT, ALLAN. Convergence rates for probabilities of moderate deviations for sums of random variables with multidimensional indices . . . 298–313
GZYL, HENRYK. Infinitesimal generators of time changed processes . . 716–726
