

## CORRECTION TO "SOJOURNS AND EXTREMES OF GAUSSIAN PROCESSES"

BY SIMEON M. BERMAN

*New York University*

On page 1004, fifth line from the bottom,  $q(t)$  should be  $q^2(t)$ .

On page 1012, formula (7.1),  $\varepsilon \rightarrow \infty$  should be  $\varepsilon \rightarrow 0$ .

The formula on the last line of page 1024 should be replaced by the more general formula,

$$\lim_{u \rightarrow \infty} \frac{P(\max_{[0,1]}(X(t) - f(t)) > u)}{E(zL)} = -F'(0),$$

where  $z$  is defined in (12.3). This follows, by the methods in the paper, from formula (11.12) for  $x = 0$ . By virtue of Lemma 11.1, the formula above reduces to the one on the bottom of page 1024 for  $p < \infty$ , and to

$$\lim_{u \rightarrow \infty} \frac{P(\max_{[0,1]}(X(t) - f(t)) > u)}{\phi(u)/u} = 1$$

for  $p = \infty$ . The inadequacy of the version previously published on page 1024 was brought to my attention by Jack Cuzick.
