CONTENTS OF VOLUME 9

ARTICLES AND SHORT COMMUNICATIONS

AHMED, ABDUL-HADI N., LEÓN, RAMÓN AND PROSCHAN, FRANK. Generalized association, with applications in multivariate statistics 168–176

AKRITAS, MICHAEL G. AND JOHNSON, RICHARD A. Asymptotic inference in Lévy processes of the discontinuous type 604–614

BAKSALARY, J. K. AND KALA, R. Linear transformations preserving best linear unbiased estimators in a general Gauss-Markoff model 913–916

BARTOSZYŃSKI, ROBERT, BROWN, BARRY W., MCBRIDE, CHARLES M. AND THOMPSON, JAMES R. Some nonparametric techniques for estimating the intensity function of a cancer related nonstationary Poisson process 1050–1060

BATES, DOUGLAS M. AND WATTS, DONALD G. Parameter transformations for improved approximate confidence regions in nonlinear least squares 1152–1167

BERK, R. H., BROWN, L. D. AND COHEN, ARTHUR. Properties of Bayes sequential tests 678–682

BERK, R. H., BROWN, L. D. AND COHEN, ARTHUR. Bounded stopping times for a class of sequential Bayes tests 834–845

BHATTACHARYA, P. K. Posterior distribution of a Dirichlet process from quantal response data 803–811

BHATTACHARYA, P. K. AND FRIERSON, DARGAN, JR. A nonparametric control chart for detecting small disorders 544–554

BICKEL, P. J. Minimax estimation of the mean of a normal distribution when the parameter space is restricted 1301–1309

BICKEL, PETER J., AND FREEDMAN, DAVID A. Some asymptotic theory for the bootstrap 1196–1217

BICKEL, P. J. AND LEHMANN, E. L. A minimax property of the sample mean in finite populations 1119–1122

BJØRNSTAD, JAN F. A class of Schur procedures and minimax theory for subset selection 777–791

BROWN, BARRY W., MCBRIDE, CHARLES M., THOMPSON, JAMES R. AND BARTOSYŃSKI, ROBERT. Some nonparametric techniques for estimating the intensity function of a cancer related nonstationary Poisson process 1050–1060

BROWN, LAWRENCE D. A complete class theorem for statistical problems with finite sample spaces 1289–1300

BROWN, L. D. AND COHEN, ARTHUR. Inadmissibility of large classes of sequential tests 1239–1249

BROWN, L. D., COHEN, ARTHUR AND BERK, R. H. Properties of Bayes sequential tests 678–682

BROWN, L. D. COHEN, ARTHUR AND BERK, R. H. Bounded stopping times for a class of sequential Bayes tests 834–845
BUTLER, RONALD W. The admissible Bayes character of subset selection techniques involved in variable selection, outlier detection, and slippage problems 960–973
CALLAERT, HERMAN AND VERAVERBEKE, NOËL. The order of the normal approximation for a studentized U-statistic 194–200
CARROLL, RAYMOND J. AND RUPPERT, DAVID. On robust tests for heteroscedasticity 206–210
CASELLA, GEORGE AND STRAWDERMAN, WILLIAM E. Estimating a bounded normal mean 870–878
CHAO, ANNE. On estimating the probability of discovering a new species 1339–1342
CHENG, CHING-SHUI. Optimality and construction of psuedo-Youden designs 201–205
CHENG, K. F. On Berry-Esseen rates for jackknife estimators 694–696
CHIKUSE, YASUKO. Distributions of some matrix variates and latent roots in multivariate Behrens-Fisher discriminant analysis 401–407
CHOW, Y. S. AND YU, K. F. The performance of a sequential procedure for the estimation of the mean 184–189
COHEN, ARTHUR, BERK, R. H. AND BROWN, L. D. Properties of Bayes sequential tests 678–682
COHEN, ARTHUR, BERK, R. H. AND BROWN, L. D. Bounded stopping times for a class of sequential Bayes tests 834–845
COHEN, ARTHUR AND BROWN, L. D. Inadmissibility of large classes of sequential tests 1239–1247
COLLINS, JOHN R. AND PORTNOY, STEPHEN L. Maximizing the variance of M-estimators using the generalized method of moment spaces 567–577
CONSTANTINE, GREGORY M. Some E-optimal block designs 886–892
CURRIE, IAIN D. On distributions determined by random variables distributed over the n-cube 822–833
DEMPSTER, A. P., AND GASKO-GREEN, M. New tools for residual analysis 945–959
DEROBERTIS, LORRAINE AND HARTIGAN, J. A. Bayesian inference using intervals of measures 235–244
DEVROYE, LUC. On the almost everywhere convergence of nonparametric regression function estimates 1310–1319
DEVROYE, LUC. On the asymptotic probability of error in nonparametric discrimination 1320–1327
DIACONIS, PERSI AND GRAHAM, RONALD. The analysis of sequential experiments with feedback to subjects 3–23
DIONNE, LOUISE. Efficient nonparametric estimators of parameters in the general linear hypothesis 457–460
DYKSTRA, R. L. AND LAUD, PURUSHOTTAM. A Bayesian nonparametric approach to reliability 356–367

EATON, MORRIS L. On the projections of isotropic distributions 391–400
EFRON, B. AND STEIN, C. The jacknife estimate of variance 586–596
EPLETT, W. J. R. The inadmissibility of linear rank tests under Bahadur efficiency 1079–1086
EUBANK, R. L. A density-quantile function approach to optimal spacing selection 494–500
EUBANK, R. L., SMITH, PATRICIA L. AND SMITH, PHILIP W. Uniqueness and eventual uniqueness of optimal designs in some time series models 486–493
EVANS, G. B. A. AND SAVIN, N. E. The calculation of the limiting distribution of the least squares estimator of the parameter in a random walk model 1114–1118
FEIGIN, PAUL D. Conditional exponential families and a representation theorem for asymptotic inference 597–603
FÖLDES, ANTÓNIA AND REJTÖ, LIDIA. Strong uniform consistency for nonparametric survival curve estimators from randomly censored data 122–129
FOX, MARTIN. An inadmissible best invariant estimator: the i.i.d. case. 1127–1129
FRASER, MARTIN D., HSU, YU-SHENG AND WALKER, JOSEPH J. Identifiability of finite mixtures of von Mises distributions 1130–1131
FREEDMAN, D. A. Bootstrapping regression models 1218–1228
FREEDMAN, DAVID A., AND BICKEL, PETER J. Some asymptotic theory for the bootstrap 1196–1217
FRIERSON, DARGAN, JR. AND BHATTACHARYA, P. K. A nonparametric control chart for detecting small disorders 544–554
FULLER, WAYNE A., HASZA, DAVID P. AND GOEBEL, J. JEFFERY. Estimation of the parameters of stochastic difference equations 531–543
GABLER, S. AND STENGER, J. On the completeness of the class of fixed size sampling strategies 229–232
GAFFKE, N. Some classes of optimality criteria and optimal designs for complete two-way layouts 893–898
GASKO-GREEN, M., AND DEMPSTER, A. P. New tools for residual analysis 945–959
GHOSH, J. K., MORIMOTO, H. AND YAMADA, S. Neyman factorization and minimality of pairwise sufficient subfields 514–530
GHOSH, J. K. AND SINHA, BIMAL K. A necessary and sufficient condition for second order admissibility with applications to Berkson's bioassay problem 1334–1338
GHOSH, MALAY AND MEEDEN, GLEN. Admissibility in finite problems 846–852
GILL, R. D. Testing with replacement and the product limit estimator 853–860
GLESER, LEON JAY. Estimation in multivariate "errors in variables" regression model: large sample results 24–44
GOEBEL, J. JEFFERY, FULLER, WAYNE A. AND HASZA, DAVID P. Estimation of the parameters of stochastic difference equations 531–543

GOLDSTEIN, MICHAEL. A Bayesian criterion for sample size 670–672
GONG, GAIL AND SAMANIEGO, FRANCISCO J. Pseudo maximum likelihood estimation: theory and applications 861–869
GRAHAM, RONALD AND DIACONIS, PERSI. The analysis of sequential experiments with feedback to subjects 3–23
HABERMAN, SHELBY J. Tests for independence in two-way contingency tables based on canonical correlation and on linear-by-linear interaction 1178–1186
HALL, PETER. On trigonometric series estimates of densities 683–685
HALL, PETER. Asymptotic theory of triple sampling for sequential estimation of a mean 1229–1238
HAMMERSTROM, THOMAS. Asymptotically optimal tests for heteroscedasticity in the general linear model 368–380
HARTIGAN, J. A. AND DEROBERTIS, LORRAINE. Bayesian inference using intervals of measures 235–244
HARTUNG, JOACHIM. Nonnegative minimum biased invariant estimation in variance component models 278–292
HARVILLE, DAVID A. Unbiased and minimum-variance unbiased estimation of estimable functions for fixed linear models with arbitrary covariance structure 633–637
HASZA, DAVID P., GOEBEL, J. JEFFERY AND FULLER, WAYNE A. Estimation of the parameters of stochastic difference equations ... 531–543
HOEL, PAUL G. Regression systems for which optimal extrapolation designs require exactly $k + 1$ points 909–912
HSU, JASON C. Simultaneous confidence intervals for all distances from the "best" 1026–1034
HSU, YU-SHENG, WALKER, JOSEPH J. AND FRASER, MARTIN D. Identifiability of finite mixture of von Mises distributions 1130–1131
JOHNSON, RICHARD A. AND AKRITAS, MICHAEL G. Asymptotic inference in Lévy processes of the discontinuous type 604–614
JUREČKOVÁ, JANA. Tail-behavior of location estimators 578–585
KALA, R. AND BAKSALARY, J. K. Linear transformations preserving best linear unbiased estimators in a general Gauss-Markoff model 913–916
KALBFLEISCH, J. D. AND WILD, C. J. A note on a paper by Ferguson and Phadia 1061–1065
KALLENBERG, WILBERT C. M. The shortcoming of locally most powerful tests in curved exponential families 673–677
KARIYA, TAKEAKI. A robustness property of Hotelling's T^2-test 211–214
KARIYA, TAKEAKI. Tests for the independence between two seemingly unrelated regression equations 381–390
KARIYA, TAKEAKI. Robustness of multivariate tests 1267–1275
KARLIN, SAMUEL AND RINOTT, YOSEF. Total positivity properties of absolute value multinormal variables with applications to confidence interval estimates and related probabilistic inequalities 1035–1049
