

THE ANNALS *of* STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles appearing in *The Annals of Statistics* (volumes 1–17) are indexed in the *Cumulative Index to IMS Scientific Journals*, available from the Institute of Mathematical Statistics.

VOLUME 20

1992

CONTENTS OF VOLUME 20

Special Invited Paper, Articles and Short Communications

ARCONES, MIGUEL A. AND GINÉ, EVARIST. On the bootstrap of U and V statistics	655–674
BARINGHAUS, L. AND HENZE, N. Limit distributions for Mardia's measure of multivariate skewness	1889–1902
BARRY, DANIEL AND HARTIGAN, J. A. Product partition models for change point problems	260–279
BEGG, MELISSA DOWD AND LAGAKOS, STEPHEN. Effects of mis-modeling on tests of association based on logistic regression models	1929–1952
BENHENNI, KARIM AND CAMBANIS, STAMATIS. Sampling designs for estimating integrals of stochastic processes	161–194
BERAN, RUDOLF. Controlling conditional coverage probability in prediction	1110–1119
BERAN, RUDOLF AND HALL, PETER. Estimating coefficient distributions in random coefficient regressions	1970–1984
BICKEL, PETER J., NAIR, VIJAYAN N. AND WANG, PAUL C. C. Nonparametric inference under biased sampling from a finite population	853–878
BOOTH, JAMES, HALL, PETER AND WOOD, ANDREW. Bootstrap estimation of conditional distributions	1594–1610
BROWN, LAWRENCE D. AND GREENSHTEIN, EITAN. Two-sided sequential tests	555–561
BROWN, LAWRENCE D. AND MARDEN, JOHN I. Local admissibility and local unbiasedness in hypothesis testing problems	832–852
BURSHTEIN, DAVID, DELLA PIETRA, VINCENT, KANEVSKY, DIMITRI AND NÁDAS, ARTHUR. Minimum impurity partitions	1637–1646
CAMBANIS, STAMATIS AND BENHENNI, KARIM. Sampling designs for estimating integrals of stochastic processes	161–194
CARROLL, RAYMOND J. AND HSING, TAIEN. An asymptotic theory for sliced inverse regression	1040–1061
CASELLA, GEORGE AND GOUTIS, CONSTANTINOS. Increasing the confidence in Student's t interval	1501–1513
CASELLA, GEORGE, ROBERT, CHRISTIAN, WELLS, MARTIN T., FARRELL, ROGER H. AND HWANG, JIUNN TZON. Estimation of accuracy in testing	490–509
CHANG, YUAN-CHIN IVAN AND MARTINSEK, ADAM T. Fixed size confidence regions for parameters of a logistic regression model	1953–1969
CHAUDHURI, PROBAL. Multivariate location estimation using extension of R -estimates through U -statistics type approach . .	897–916
CHEN, HANFENG AND LOH, WEI-YIN. Bounds on AREs of tests following Box–Cox transformations	1485–1500

CHEN, JIAHUA. Some results on 2^{n-k} fractional factorial designs and search for minimum aberration designs	2124-2141
CHENG, CHI-LUN AND VAN NESS, JOHN W. Generalized M -estimators for errors-in-variables regression	385-397
CHENG, QIANSHENG. On the unique representation of non-Gaussian linear processes	1143-1145
COMETS, FRANCIS. On consistency of a class of estimators for exponential families of Markov random fields on the lattice . .	455-468
CUZICK, JACK. Efficient estimates in semiparametric additive regression models with unknown error distribution	1129-1136
DABROWSKI, ANDRÉ ROBERT AND McDONALD, DAVID. Statistical analysis of multiple ion channel data	1180-1202
DATTA, SOMNATH. Some nonasymptotic bounds for L_1 density estimation using kernels	1658-1667
DAVIES, LAURIE. The asymptotics of Rousseeuw's minimum volume ellipsoid estimator	1828-1843
DELLA PIETRA, VINCENT, KANEVSKY, DIMITRI, NÁDAS, ARTHUR AND BURSHTAIN, DAVID. Minimum impurity partitions	1637-1646
DETTE, H. Optimal designs for a class of polynomials of odd or even degree	238-259
DEVROYE, LUC. A note on the usefulness of superkernels in density estimation	2037-2056
DICKEY, JAMES M. AND GARTHWAITE, PAUL H. Elicitation of prior distributions for variable-selection problems in regression . .	1697-1719
DONOHO, DAVID L. AND GASKO, MIRIAM. Breakdown properties of location estimates based on halfspace depth and projected outlyingness	1803-1827
DONOHO, DAVID L. AND LOW, MARK G. Renormalization exponents and optimal pointwise rates of convergence	944-970
EATON, MORRIS L. A statistical diptych: Admissible inferences—recurrence of symmetric Markov chains	1147-1179
EINMAHL, JOHN H. J. AND MASON, DAVID M. Generalized quantile processes	1062-1078
EUBANK, R. L. AND HART, JEFFREY D. Testing goodness-of-fit in regression via order selection criteria	1412-1425
EUBANK, R. L. AND LARICCIA, V. N. Asymptotic comparison of Cramér-von Mises and nonparametric function estimation techniques for testing goodness-of-fit	2071-2086
FALK, M. AND REISS, R.-D. Statistical inference for conditional curves: Poisson process approach	779-796
FAN, JIANQING AND GJJBELS, IRÈNE. Variable bandwidth and local linear regression smoothers	2008-2036
FAN, JIANQING AND MARRON, JAMES S. Best possible constant for bandwidth selection	2057-2070
FARAWAY, JULIAN J. Smoothing in adaptive estimation	414-427

FARRELL, ROGER H., HWANG, JIUNN TZON, CASELLA, GEORGE, ROBERT, CHRISTIAN AND WELLS, MARTIN T. Estimation of accuracy in testing	490–509
FENSTAD, GRETE AND HJORT, NILS LID. On the last time and the number of times an estimator is more than ε from its target value	469–489
FRANKE, J. AND HÄRDLE, W. On bootstrapping kernel spectral estimates	121–145
GARTHWAITE, PAUL H. AND DICKEY, JAMES M. Elicitation of prior distributions for variable-selection problems in regression . . .	1697–1719
GASKO, MIRIAM AND DONOHO, DAVID L. Breakdown properties of location estimates based on halfspace depth and projected outlyingness	1803–1827
GASSER, THEO AND KNEIP, ALOIS. Statistical tools to analyze data representing a sample of curves	1266–1305
GENEST, CHRISTIAN. Vincentization revisited	1137–1142
GIJBELS, IRÈNE AND FAN, JIANQING. Variable bandwidth and local linear regression smoothers	2008–2036
GINÉ, EVARIST AND ARCONES, MIGUEL A. On the bootstrap of U and V statistics	655–674
GITTINS, JOHN AND WANG, YOU-GAN. The learning component of dynamic allocation indices	1625–1636
GOLDSTEIN, LARRY AND LANGHOLZ, BRYAN. Asymptotic theory for nested case-control sampling in the Cox regression model . . .	1903–1928
GOLDSTEIN, LARRY AND MESSER, KAREN. Optimal plug-in estimators for nonparametric functional estimation	1306–1328
GOUTIS, CONSTANTINOS AND CASELLA, GEORGE. Increasing the confidence in Student's t interval	1501–1513
GREENSHTEIN, EITAN AND BROWN, LAWRENCE D. Two-sided sequential tests	555–561
GUTENBRUNNER, C. AND JUREČKOVÁ, J. Regression rank scores and regression quantiles	305–330
HALL, PETER. Effect of bias estimation on coverage accuracy of bootstrap confidence intervals for a probability density	675–694
HALL, PETER. On bootstrap confidence intervals in nonparametric regression	695–711
HALL, PETER. On global properties of variable bandwidth density estimators	762–778
HALL, PETER AND BERAN, RUDOLF. Estimating coefficient distributions in random coefficient regressions	1970–1984
HALL, PETER, WOOD, ANDREW AND BOOTH, JAMES. Bootstrap estimation of conditional distributions	1594–1610
HALLIN, MARC, MÉLARD, GUY AND MILHAUD, XAVIER. Permutational extreme values of autocorrelation coefficients and a Pitman test against serial dependence	523–534

HÄRDLE, W. AND FRANKE, J. On bootstrapping kernel spectral estimates	121–145
HART, JEFFREY D. AND EUBANK, R. L. Testing goodness-of-fit in regression via order selection criteria	1412–1425
HARTIGAN, J. A. AND BARRY, DANIEL. Product partition models for change point problems	260–279
HAWKINS, D. L., KOCHAR, SUBHASH AND LOADER, CLIVE. Testing exponentiality against IDMRL distributions with unknown change point	280–290
HE, XUMING AND PORTNOY, STEPHEN. Reweighted LS estimators converge at the same rate as the initial estimator	2161–2167
HE, XUMING AND SIMPSON, DOUGLAS G. Robust direction estimation	351–369
HEDAYAT, A. S., PU, KEWEI AND STUFKEN, JOHN. On the construction of asymmetrical orthogonal arrays	2142–2152
HENZE, N. AND BARINGHAUS, L. Limit distributions for Mardia’s measure of multivariate skewness	1889–1902
HEYDE, C. C. On best asymptotic confidence intervals for parameters of stochastic processes	603–607
HJORT, NILS LID AND FENSTAD, GRETE. On the last time and the number of times an estimator is more than ε from its target value	469–489
HOLLANDER, MYLES, PRESNELL, BRETT AND SETHURAMAN, JAYARAM. Nonparametric methods for imperfect repair models	879–896
HSING, TAIEN AND CARROLL, RAYMOND J. An asymptotic theory for sliced inverse regression	1040–1061
HSU, JOHN S. J. AND LEONARD, TOM. Bayesian inference for a covariance matrix	1669–1696
HWANG, JIUNN TZON, CASELLA, GEORGE, ROBERT, CHRISTIAN, WELLS, MARTIN T. AND FARRELL, ROGER H. Estimation of accuracy in testing	490–509
JIN, KUN. Empirical smoothing parameter selection in adaptive estimation	1844–1874
JOHNSTONE, IAIN M. AND MACGIBBON, K. BRENDA. Minimax estimation of a constrained Poisson vector	807–831
JONES, LEE K. A simple lemma on greedy approximation in Hilbert space and convergence rates for projection pursuit regression and neural network training	608–613
JUREČKOVÁ, J. AND GUTENBRUNNER, C. Regression rank scores and regression quantiles	305–330
KADANE, JOSEPH B. AND WASSERMAN, LARRY. Symmetric upper probabilities	1720–1736
KANAZAWA, YUICHIRO. An optimal variable cell histogram based on the sample spacings	291–304

KANEVSKY, DIMITRI, NÁDAS, ARTHUR, BURSHTAIN, DAVID AND DELLA PIETRA, VINCENT. Minimum impurity partitions	1637–1646
KHAS'MINSKII, RAFAIL Z. AND LAZAREVA, BETTY V. On some filtration procedure for jump Markov process observed in white Gaussian noise	2153–2160
KIM, SEONG-JU. The metrically trimmed mean as a robust estimator of location	1534–1547
KLONECKI, WITOLD AND ZONTEK, STEFAN. Admissible estimators of variance components obtained via submodels	1454–1467
KNEIP, ALOIS AND GASSER, THEO. Statistical tools to analyze data representing a sample of curves	1266–1305
KO, DAIJIN. Robust estimation of the concentration parameter of the von Mises–Fisher distribution	917–928
KOCHAR, SUBHASH, LOADER, CLIVE AND HAWKINS, D. L. Testing exponentiality against IDMRL distributions with unknown change point	280–290
KONING, ALEX J. Approximation of stochastic integrals with applications to goodness-of-fit tests	428–454
KUROTSCHKA, VIKTOR AND MÜLLER, CHRISTINE. Optimum robust estimation of linear aspects in conditionally contaminated linear models	331–350
LAGAKOS, STEPHEN AND BEGG, MELISSA DOWD. Effects of misspecification on tests of association based on logistic regression models	1929–1952
LAHIRI, SOUMENDRA NATH. Bootstrapping M -estimators of a multiple linear regression parameter	1548–1570
LANGHOLZ, BRYAN AND GOLDSTEIN, LARRY. Asymptotic theory for nested case-control sampling in the Cox regression model . . .	1903–1928
LARICCIA, V. N. AND EUBANK, R. L. Asymptotic comparison of Cramér–von Mises and nonparametric function estimation techniques for testing goodness-of-fit	2071–2086
LAVINE, MICHAEL. Some aspects of Polya tree distributions for statistical modelling	1222–1235
LAZAREVA, BETTY V. AND KHAS'MINSKII, RAFAIL Z. On some filtration procedure for jump Markov process observed in white Gaussian noise	2153–2160
LEHMANN, E. L. AND ROJO, J. Invariant directional orderings . . .	2100–2110
LEONARD, TOM AND HSU, JOHN S. J. Bayesian inference for a covariance matrix	1669–1696
LEROUX, BRIAN G. Consistent estimation of a mixing distribution	1350–1360
LIU, REGINA Y. AND SINGH, KESAR. Efficiency and robustness in resampling	370–384
LIU, REGINA Y. AND SINGH, KESAR. Ordering directional data: Concepts of data depth on circles and spheres	1468–1484

LO, SHAW-HWA. From species problem to a general coverage problem via a new interpretation	1094–1109
LOADER, CLIVE R. A log-linear model for a Poisson process change point	1391–1411
LOADER, CLIVE, HAWKINS, D. L. AND KOCHAR, SUBHASH. Testing exponentiality against IDMRL distributions with unknown change point	280–290
LOH, WEI-YIN AND CHEN, HANFENG. Bounds on AREs of tests following Box–Cox transformations	1485–1500
LOPUHAÄ, HENDRIK P. Highly efficient estimators of multivariate location with high breakdown point	398–413
LOW, MARK G. Non-existence of an adaptive estimator for the value of an unknown probability density	598–602
LOW, MARK G. Renormalization and white noise approximation for nonparametric functional estimation problems	545–554
LOW, MARK G. AND DONOHO, DAVID L. Renormalization exponents and optimal pointwise rates of convergence	944–970
MACGIBBON, K. BRENDA AND JOHNSTONE, IAIN M. Minimax estimation of a constrained Poisson vector	807–831
MAJUMDAR, DIBYEN. Optimal designs for comparing test treatments with a control utilizing prior information	216–237
MARDEN, JOHN I. AND BROWN, LAWRENCE D. Local admissibility and local unbiasedness in hypothesis testing problems	832–852
MARRON, J. S. AND WAND, M. P. Exact mean integrated squared error	712–736
MARRON, JAMES S. AND FAN, JIANQING. Best possible constant for bandwidth selection	2057–2070
MARTINSEK, ADAM T. Using stopping rules to bound the mean integrated squared error in density estimation	797–806
MARTINSEK, ADAM T. AND CHANG, YUAN-CHIN IVAN. Fixed size confidence regions for parameters of a logistic regression model	1953–1969
MASON, DAVID M. AND EINMAHL, JOHN H. J. Generalized quantile processes	1062–1078
MASON, DAVID M. AND NEWTON, MICHAEL A. A rank statistics approach to the consistency of a general bootstrap	1611–1624
MAULDIN, R. DANIEL, SUDDERTH, WILLIAM D. AND WILLIAMS, S. C. Polya trees and random distributions	1203–1221
MCDONALD, DAVID AND DABROWSKI, ANDRÉ ROBERT. Statistical analysis of multiple ion channel data	1180–1202
MEEDEN, GLEN. The admissibility of the linear interpolation estimator of the population total	510–522

MÉLARD, GUY, MILHAUD, XAVIER AND HALLIN, MARC. Permutational extreme values of autocorrelation coefficients and a Pitman test against serial dependence	523–534
MENÉNDEZ, J. A., RUEDA, C. AND SALVADOR, B. Dominance of likelihood ratio tests under cone constraints	2087–2099
MESSER, KAREN AND GOLDSTEIN, LARRY. Optimal plug-in estimators for nonparametric functional estimation	1306–1328
MILBRODT, HARTMUT. Testing stationarity in the mean of autoregressive processes with a nonparametric regression trend	1426–1440
MILHAUD, XAVIER, HALLIN, MARC AND MÉLARD, GUY. Permutational extreme values of autocorrelation coefficients and a Pitman test against serial dependence	523–534
MUKERJEE, HARI. Estimating conditional quantiles at the root of a regression function	2168–2176
MÜLLER, CHRISTINE AND KUROTSCHKA, VIKTOR. Optimum robust estimation of linear aspects in conditionally contaminated linear models	331–350
MÜLLER, HANS-GEORG. Change-points in nonparametric regression analysis	737–761
MÜLLER, HANS-GEORG AND PREWITT, KATHRYN. Weak convergence and adaptive peak estimation for spectral densities	1329–1349
MYKLAND, PER ASLAK. Asymptotic expansions and bootstrapping distributions for dependent variables: A martingale approach	623–654
NÁDAS, ARTHUR, BURSHTAIN, DAVID, DELLA PIETRA, VINCENT AND KANEVSKY, DIMITRI. Minimum impurity partitions	1637–1646
