

CONTENTS OF VOLUME 9

Articles

BAGGERLY, KEITH, COX, DENNIS, PICARD, RICK AND KOLLMAN, CRAIG. Adaptive importance sampling on discrete Markov chains	391–412
BÄTTIG, ROBERT. Completeness of securities market models—An operator point of view	529–566
BENAÏM, MICHEL AND HIRSCH, MORRIS W. Stochastic approximation algorithms with constant step size whose average is cooperative	216–241
BHATTACHARYA, RABI. Multiscale diffusion processes with periodic coefficients and an application to solute transport in porous media	951–1020
BISKUP, MAREK AND DEN HOLLANDER, FRANK. A heteropolymer near a linear interface	668–687
BOROVKOVA, S., BURTON, R. AND DEHLING, H. Consistency of the Takens estimator for the correlation dimension	376–390
BRAMSON, MAURY. A stable queueing network with unstable fluid model	818–853
BROOKS, ELIZABETH A. Probabilistic methods for a linear reaction-hyperbolic system with constant coefficients	719–731
BURTON, R., DEHLING, H. AND BOROVKOVA, S. Consistency of the Takens estimator for the correlation dimension	376–390
CAO, JIN AND WORSLEY, KEITH. The geometry of correlation fields with an application to functional connectivity of the brain	1021–1057
CAPIŃSKI, MAREK AND CUTLAND, NIGEL J. Stochastic Euler equations on the torus	688–705
CHAN, TERENCE. Pricing contingent claims on stocks driven by Lévy processes	504–528
COUTIN, L. AND DECREUSEFOND, L. Abstract nonlinear filtering theory in the presence of fractional Brownian motion	1058–1090
COX, DENNIS, PICARD, RICK, KOLLMAN, CRAIG AND BAGGERLY, KEITH. Adaptive importance sampling on discrete Markov chains	391–412
COX, J. THEODORE AND SCHINAZI, RINALDO B. A stochastic spatial process to model the persistence of sickle-cell disease	319–330
CUTLAND, NIGEL J. AND CAPIŃSKI, MAREK. Stochastic Euler equations on the torus	688–705
CVITANIĆ, JAKŠA AND SPIVAK, GENNADY. Maximizing the probability of a perfect hedge	1303–1328
DECREUSEFOND, L. AND COUTIN, L. Abstract nonlinear filtering theory in the presence of fractional Brownian motion	1058–1090
DEHLING, H., BOROVKOVA, S. AND BURTON, R. Consistency of the Takens estimator for the correlation dimension	376–390

DEL MORAL, P. AND GUIONNET, A. Central limit theorem for non-linear filtering and interacting particle systems	275–297
DEMBO, AMIR AND KONTOYIANNIS, IOANNIS. The asymptotics of waiting times between stationary processes, allowing distortion	413–429
DEN HOLLANDER, FRANK AND BISKUP, MAREK. A heteropolymer near a linear interface	668–687
DONNELLY, PETER AND KURTZ, THOMAS G. Genealogical processes for Fleming-Viot models with selection and recombination . . .	1091–1148
FANNJIANG, ALBERT AND KOMOROWSKI, TOMASZ. Turbulent diffusion in Markovian flows	591–610
FLEISCHMANN, KLAUS AND KLENKE, ACHIM. Smooth density field of catalytic super-Brownian motion	298–318
FLEMING, WENDELL H. AND SHEU, SHUENN-JYI. Optimal long term growth rate of expected utility of wealth	871–903
FREIDLIN, MARK AND WEBER, MATTHIAS. A remark on random perturbations of the nonlinear pendulum	611–628
FRIEZE, ALAN AND KANNAN, RAVI. Log-Sobolev inequalities and sampling from log-concave distributions	14–26
FULMAN, JASON AND WILMER, ELIZABETH L. Comparing eigenvalue bounds for Markov chains: When does Poincaré beat Cheeger?	1–13
GRIFFITHS, R. C. AND TAVARÉ, SIMON. The ages of mutations in gene trees	567–590
GUIONNET, A. AND DEL MORAL, P. Central limit theorem for non-linear filtering and interacting particle systems	275–297
HÄGGSTRÖM, OLLE. Positive correlations in the fuzzy Potts model	1149–1159
HEATH, DAVID, RESNICK, SIDNEY AND SAMORODNITSKY, GENNADY. How system performance is affected by the interplay of averages in a fluid queue with long range dependence induced by heavy tails	352–375
HIRSCH, MORRIS W. AND BENAÏM, MICHEL. Stochastic approximation algorithms with constant step size whose average is cooperative	216–241
HORVÁTH, LAJOS AND SHAO, QI-MAN. Limit theorems for quadratic forms with applications to Whittle’s estimate	146–187
IGLÓI, E. AND TERDIK, GY. Bilinear stochastic systems with fractional Brownian motion input	46–77
JAGERS, PETER. Branching processes with dependence but homogeneous growth	1160–1174
JELENKOVIĆ, PREDRAG R. Asymptotic approximation of the move-to-front search cost distribution and least-recently used caching fault probabilities	430–464

JONES, BRIAN D., PITTEL, BORIS G. AND VERDUCCI, JOSEPH S. Tree and forest weights and their application to nonuniform random graphs	197–215
KANNAN, RAVI AND FRIEZE, ALAN. Log-Sobolev inequalities and sampling from log-concave distributions	14–26
KARATZAS, IOANNIS AND SUDDERTH, WILLIAM D. Control and stopping of a diffusion process on an interval	188–196
KHOSHNEVISAN, DAVAR AND LEWIS, THOMAS M. Stochastic calculus for Brownian motion on a Brownian fracture	629–667
KLENKE, ACHIM AND FLEISCHMANN, KLAUS. Smooth density field of catalytic super-Brownian motion	298–318
KOLLMAN, CRAIG, BAGGERLY, KEITH, COX, DENNIS AND PICARD, RICK. Adaptive importance sampling on discrete Markov chains	391–412
KOMOROWSKI, TOMASZ AND FANNJIANG, ALBERT. Turbulent diffusion in Markovian flows	591–610
KONTOYIANNIS, IOANNIS AND DEMBO, AMIR. The asymptotics of waiting times between stationary processes, allowing distortion	413–429
KRAMKOV, D. AND SCHACHERMAYER, W. The asymptotic elasticity of utility functions and optimal investment in incomplete markets	904–950
KRONE, STEPHEN M. The two-stage contact process	331–351
KURTZ, THOMAS G. AND DONNELLY, PETER. Genealogical processes for Fleming-Viot models with selection and recombination	1091–1148
LEWIS, THOMAS M. AND KHOSHNEVISAN, DAVAR. Stochastic calculus for Brownian motion on a Brownian fracture	629–667
LI, DELI AND ROGERS, T. D. Asymptotic behavior for iterated functions of random variables	1175–1201
MADRAS, NEAL AND PICCIONI, MAURO. Importance sampling for families of distributions	1202–1225
MÅNSSON, MARIANNE. Poisson approximation in connection with clustering of random points	465–492
MARTIN, J. B. AND SUHOV, YU. M. Fast Jackson networks	854–870
MCDONALD, D. R. Asymptotics of first passage times for random walk in an orthant	110–145
MILSTEIN, G. N. AND TRETYAKOV, M. V. Simulation of a space-time bounded diffusion	732–779
NEUHAUSER, CLAUDIA AND PACALA, STEPHEN W. An explicitly spatial version of the Lotka–Volterra model with interspecific competition	1226–1259
NORRIS, JAMES R. Smoluchowski’s coagulation equation: uniqueness, nonuniqueness and a hydrodynamic limit for the stochastic coalescent	78–109

PACALA, STEPHEN W. AND NEUHAUSER, CLAUDIA. An explicitly spatial version of the Lotka–Volterra model with inter-specific competition	1226–1259
PIAU, DIDIER. Large deviations and Young measures for a Poissonian model of biphased material	706–718
PICARD, RICK, KOLLMAN, CRAIG, BAGGERLY, KEITH AND COX, DENNIS. Adaptive importance sampling on discrete Markov chains	391–412
PICCIONI, MAURO AND MADRAS, NEAL. Importance sampling for families of distributions	1202–1225
PITTEL, BORIS. Normal convergence problem? Two moments with a recurrence may be the clues	1260–1302
PITTEL, BORIS G., VERDUCCI, JOSEPH S. AND JONES, BRIAN D. Tree and forest weights and their application to nonuniform random graphs	197–215
RESNICK, SIDNEY, SAMORODNITSKY, GENNADY AND HEATH, DAVID. How system performance is affected by the interplay of averages in a fluid queue with long range dependence induced by heavy tails	352–375
RESNICK, SIDNEY, SAMORODNITSKY, GENNADY AND XUE, FANG. How misleading can sample ACFs of stable MAs be? (Very!)	797–817
ROGERS, L. C. G. AND ZANE, O. Saddlepoint approximations to option prices	493–503
ROGERS, T. D. AND LI, DELI. Asymptotic behavior for iterated functions of random variables	1175–1201
SAMORODNITSKY, GENNADY, HEATH, DAVID AND RESNICK, SIDNEY. How system performance is affected by the interplay of averages in a fluid queue with long range dependence induced by heavy tails	352–375
SAMORODNITSKY, GENNADY, XUE, FANG AND RESNICK, SIDNEY. How misleading can sample ACFs of stable MAs be? (Very!)	797–817
SCHACHERMAYER, W. AND KRAMKOV, D. The asymptotic elasticity of utility functions and optimal investment in incomplete markets	904–950
SCHINAZI, RINALDO B. AND COX, J. THEODORE. A stochastic spatial process to model the persistence of sickle-cell disease	319–330
SHAO, QI-MAN AND HORVÁTH, LAJOS. Limit theorems for quadratic forms with applications to Whittle’s estimate	146–187
SHEU, SHUENN-JYI AND FLEMING, WENDELL H. Optimal long term growth rate of expected utility of wealth	871–903
SPIVAK, GENNADY AND CVITANIĆ, JAKŠA. Maximizing the probability of a perfect hedge	1303–1328

STEIN, MICHAEL L. Predicting random fields with increasing dense observations	242–273
SUDDERTH, WILLIAM D. AND KARATZAS, IOANNIS. Control and stopping of a diffusion process on an interval	188–196
SUHOV, YU. M. AND MARTIN, J. B. Fast Jackson networks	854–870
TAVARÉ, SIMON AND GRIFFITHS, R. C. The ages of mutations in gene trees	567–590
TERDIK, GY. AND IGLÓI, E. Bilinear stochastic systems with fractional Brownian motion input	46–77
TRETYAKOV, M. V. AND MILSTEIN, G. N. Simulation of a space-time bounded diffusion	732–779
VERDUCCI, JOSEPH S., JONES, BRIAN D. AND PITTEL, BORIS G. Tree and forest weights and their application to nonuniform random graphs	197–215
WEBER, MATTHIAS AND FREIDLIN, MARK. A remark on random perturbations of the nonlinear pendulum	611–628
WILMER, ELIZABETH L. AND FULMAN, JASON. Comparing eigenvalue bounds for Markov chains: When does Poincaré beat Cheeger?	1–13
WORSLEY, KEITH AND CAO, JIN. The geometry of correlation fields with an application to functional connectivity of the brain	1021–1057
WYNER, ABRAHAM J. More on recurrence and waiting times ...	780–796
XUE, FANG, RESNICK, SIDNEY AND SAMORODNITSKY, GENNADY. How misleading can sample ACFs of stable MAs be? (Very!)	797–817
YUKICH, J. E. Asymptotics for the length of a minimal triangulation on a random sample	27–45
ZANE, O. AND ROGERS, L. C. G. Saddlepoint approximations to option prices	493–503
