

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
A distribution free version of the Smirnov two sample test in the p -variate case	
	P. J. BICKEL 1
On robust linear estimators.....	JOSEPH L. GASTWIRTH AND HERMAN RUBIN 24
The speed of Glivenko-Cantelli convergence.....	R. M. DUDLEY 40
Further remarks on topology and convergence in some ordered families of distribution	
	J. PFANZAGL 51
On measurable, nonleavable gambling houses with a goal....	WILLIAM D. SUDDERTH 66
On Erlang's formula.....	LAJOS TAKÁCS 71
Existence of an invariant measure and an Ornstein's ergodic theorem	
	MICHEL METIVIER 79
Probabilistic functions of finite state Markov chains.....	T. PETRIE 97
On detecting changes in the mean of normal variates.....	L. A. GARDNER, JR. 116
The tail field of a Markov chain.....	ALLAN F. ABRAHAMSE 127
The asymmetric Cauchy processes on the line.....	S. C. PORT AND C. J. STONE 137
A central limit theorem for the number of edges in the random intersection of two graphs.....	O. ABE 144
The orthant probabilities of four Gaussian variates.....	M. C. CHENG 152
Invariant sets for translation-parameter families of measures	
	D. BASU AND J. K. GHOSH 162
Partially balanced incomplete block designs with two-way classification of treatments	
	C. RAMANKUTTY NAIR 175
On serial correlation.....	S. JAMES PRESS 188
Equivalence of Gaussian stationary processes.....	T. R. CHOW 197
The central limit theorem for generalized random fields.....	D. M. EAVES 203
On a theorem of Karlin regarding admissible estimates for exponential populations	
	V. M. JOSHI 216
Simultaneous test procedures—some theory of multiple comparisons..	K. R. GABRIEL 224
Interpolation of homogeneous random fields on discrete groups.....	L. BRUCKNER 251
Bivariate symmetry tests: parametric and nonparametric	
	C. B. BELL AND H. SMITH HALLER 259
In variant proper Bayes tests for exponential families.....	RICHARD E. SCHWARTZ 270
Variation quadratique des martingales continues à droite.....	CATHERINE DOLÉANS 284
Multivariate two sample tests with dichotomous and continuous variables I. The location model.....	A. A. AFIFI AND R. M. ELASHOFF 290

Continued on back cover

Vol. 40, No. 1—February 1969

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U.S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 to 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volume 28 to Volume 35 and \$22.00 per volume for Volume 36 onward.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. **Abstracts and corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with two additional copies, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ad}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.
