

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Embedding of urn schemes into continuous time Markov branching processes and related limit theorems KRISHNA B. ATHREYA AND SAMUEL KARLIN	1801
A delicate law of the iterated logarithm for non-decreasing stable processes LEO BREIMAN	1818
On a general class of designs for multiresponse experiments J. N. SRIVASTAVA	1825
On dominating an average associated with dependent Gaussian vectors S. C. SCHWARTZ AND W. L. ROOT	1844
On the distribution of some statistics useful in the analysis of jointly stationary time series GRACE WAHBA	1849
Contagion in stochastic models for epidemics GRACE LO YANG	1863
Sequential compound estimation DENNIS C. GILLILAND	1890
Optimal stopping for functions of Markov chains ALBERTO RUIZ-MONCAYO	1905
Robustness of some nonparametric procedures in linear models . . PRANAB KUMAR SEN	1913
Some integral transforms of characteristic functions . . . G. ANDERSEN AND T. KAWATA	1923
On pseudo-games ALFREDO BAÑOS	1932
On the cost of not knowing the variance when making a fixed width confidence interval for the mean GORDON SIMONS	1946
Sequential selection of experiments K. B. GRAY, JR.	1953
On the admissibility at ∞ , within the class of randomized designs, of balanced designs R. H. FARRELL	1978
Further second order rotatable designs NORMAN R. DRAPER AND AGNES M. HERZBERG	1995
A treatment of ties in paired comparisons . . JAGBIR SINGH AND W. A. THOMPSON, JR.	2002
Convergence rates for probabilities of moderate deviations . . JAMES AVERY DAVIS	2016
On slippage tests (II)—Similar slippage tests IRVING J. HALL, AKIO KUDÔ AND NENG-CHE YEH	2029
Asymptotic shapes for sequential testing of truncation parameters . . GIDEON SCHWARZ	2038
On the distribution of the log likelihood ratio test statistic when the true parameter is 'near' the boundaries of the hypothesis regions PAUL I. FEDER	2044
Information and sufficient sub-fields S. G. GHURYE	2056
An extension of Paulson's selection procedure D. G. HOEL AND M. MAZUMDAR	2067
Nonparametric ranking procedures for comparison with a control M. HASEEB RIZVI, MILTON SOBEL AND GEORGE G. WOODWORTH	2075
Notes	
On a theorem of Skorohod LESTER E. DUBINS	2094
On recent theorems concerning the supercritical Galton-Watson process E. SENETA	2098
Randomized rules for the two-armed bandit with finite memory . . S. M. SAMUELS	2103
On a limit distribution of high level crossings of a stationary Gaussian process CLIFFORD QUALLS	2108
The distribution of Galton's statistics . . SHULAMTH GROSS AND PAUL W. HOLLAND	2114
Arbitrary state Markovian decision processes SHELDON M. ROSS	2118
On the local behavior of Markov transition probabilities DAVID BLACKWELL AND DAVID FREEDMAN	2123

Continued on back cover

Vol. 39, No. 6—December 1968

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U.S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 to 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volume 28 to Volume 35 and \$22.00 per volume for Volume 36 onward.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, membership, changes of address, etc., should be addressed to Professor George J. Resnikoff Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. Abstracts and corrected galley proofs should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with two additional copies, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter *l*, numeral 1 used as superscript and prime ([']), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol \exp . In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ad}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.
