

THE ANNALS *of* MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Convolutions of distributions attracted to stable laws.....	HOWARD G. TUCKER 1381
On a theorem of Dobrushin.....	CHARLES STONE 1391
Large deviations theory in exponential families. BRADLEY EFRON AND DONALD TRUAX	1402
On multivariate normal probabilities of rectangles.....	ZBYNĚK ŠIDÁK 1425
Optimal designs on Tchebyscheff points.....	W. J. STUDDEN 1435
On the ergodicity for non-stationary multiple Markov processes	
BÛI-TRỌNG LIÊU AND HÉLÈNE DEBERGHES	1448
On confidence limits for the reliability of systems	
JANET M. MYHRE AND SAM C. SAUNDERS	1463
Distributions determined by cutting a simplex with hyperplanes	
A. P. DEMPSTER AND ROBERT M. KLEYLE	1473
Convergence rates for the law of the iterated logarithm.....	JAMES AVERY DAVIS 1479
A note on robust estimation in analysis of variance.....	EMIL SPJØTVOLL 1486
On the asymptotic normality of one-sided stopping rules.....	D. STEGMUND 1493
On a characterization of symmetric stable processes with finite mean	
B. L. S. PRAKASA RAO	1498
Almost sure convergence of quadratic forms in independent random variables	
DALE E. VARBERG	1502
Cross spectral analysis of Gaussian vector process in the presence of variance fluctuations.....	T. SUBBA RAO 1507
The discrete Student's <i>t</i> distribution.....	J. K. ORD 1513
Design and analysis of experiments with mixtures....	J. S. MURTY AND M. N. DAS 1517
Construction of Room squares.....	R. G. STANTON AND R. C. MULLIN 1540
Some results on the complete and almost sure convergence of linear combinations of independent and random variables and martingale differences	
WILLIAM F. STOUT	1549
Distances of probability measures and random variables.....	R. M. DUDLEY 1563
On invariance and almost invariance.....	ROBERT H. BERK AND P. J. BICKEL 1573
Some examples of multi-dimensional incomplete block designs.....	B. D. CAUSEY 1577
On a generalized Savage statistic with applications to life testing....	A. P. BASU 1591
Some multivariate <i>t</i> -distributions.....	K. S. MILLER 1605
On the trimmed Mann-Whitney statistic.....	THOMAS P. HETTMANSFERGER 1610
Three multidimensional-integral identities with Bayesian applications	
JAMES M. DICKEY	1615
A compact table for power of the <i>t</i> -test... J. L. HODGES, JR., AND E. L. LEHMANN	1629
Efficient difference equation estimators in exponential regression	
C. A. MCGILCHRIST	1638
Admissibility and distribution of some probabilistic functions of discrete finite state Markov chains.....	CHIA KUEI TSAO 1646
Approach to degeneracy and the efficiency of some multivariate tests	
G. K. BHATTACHARYYA AND RICHARD A. JOHNSON	1654
The information in a rank-order and the stopping time of some associated SPRT's	
ROBERT H. BERK AND I. RICHARD SAVAGE	1661

Continued on back cover

Vol. 39, No. 5—October 1968

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U.S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 to 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volume 28 to Volume 35 and \$22.00 per volume for Volume 36 onward.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

Papers to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. **Abstracts and corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

Preparation of manuscripts. Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with two additional copies, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter *l*, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log \bar{x}$) and underlined letters (e.g., \underline{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ad}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.
