

# THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938  
EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## Contents

	PAGE
Ergodic theory with recurrent weights.....	KENNETH N. BERK 1107
On a class of aligned rank order tests in two-way layouts.....	PRANAB KUMAR SEN 1115
The estimation of variances after using a Gaussianizing transformation	M. H. HOYLE 1125
The output process of a stationary $M/M/s$ queuing system.....	P. J. BURKE 1144
A class of infinitely divisible mixtures.....	F. W. STEUTEL 1153
Contributions to central limit theory for dependent variables.....	R. J. SERFLING 1158
Operating characteristics of some sequential design rules.....	ROBERT BOHRER 1176
The geometry of an $r \times c$ contingency table.....	STEPHEN E. FIENBERG 1186
Monotone convergence of binomial probabilities and a generalization of Ramanujan's equation.....	KUMAR JOGDEO AND S. M. SAMUELS 1191
Robustness of the Wilcoxon estimate of location against a certain dependence	ARNLJOT HØYLAND 1196
The Wilcoxon two-sample statistic on strongly mixing processes....	R. J. SERFLING 1202
Renewal theorems when the first or the second moment is infinite....	JOZEF L. TEUGELS 1210
An optimality condition for discrete dynamic programming with no discounting	E. V. DENARDO AND B. L. MILLER 1220
Existence of optimal stopping rules for rewards related to $S_n/n$	DAVID SIEGMUND, GORDON SIMONS AND PAUL FEDER 1228
Probability densities with given marginals.....	S. KULLBACK 1236
Asymptotic optimum properties of certain sequential tests.....	SEOK PIN WONG 1244
Generalized asymptotic expansions of Cornish-Fisher type	G. W. HILL AND A. W. DAVIS 1264
On moments of elementary symmetric functions of the roots of two matrices and approximations to a distribution.....	C. G. KHATRI AND K. C. S. PILLAI 1274
Independent sequences with the Stein property.....	D. L. BURKHOLDER 1282
Bayesian estimation of mixing distributions.....	JOHN E. ROLPH 1289
Simultaneous tests for the equality of covariance matrices against certain alternatives.....	1303
The $\epsilon$ -entropy of certain measures of $[0, 1]$ .....	T. S. PITCHER 1310
Multivariate exponential-type distributions....	SHEELA BILDIKAR AND G. P. PATIL 1316
On asymptotic normality in stochastic approximation.....	VÁCLAV FABIAN 1327
Optimal stopping in a Markov process.....	HOWARD M. TAYLOR 1333

*Continued on back cover*

Vol. 39, No. 4—August 1968

# THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$30 per volume (six issues of one calendar year) in the U.S. and Canada, \$22.50 per volume elsewhere. Single issues are \$5.75. Back numbers for all issues up to and including 1956 (Volume 27) are \$16.50 per volume, \$4.50 per issue; issues from 1957 through 1964 are \$22.00 per volume, \$5.75 per issue; from 1965 onward, \$33.00 per volume, \$5.75 per issue. Complete sets (Volumes 1 to 27) are \$275.00. If additional volumes are ordered at the same time complete sets are ordered, the price is \$16.50 per volume for Volume 28 to Volume 35 and \$22.00 per volume for Volume 36 onward.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Professor George J. Resnikoff, Treasurer, Department of Statistics, California State College, Hayward, California 94542.

**Papers** to be submitted for publication should be sent to the Editor, Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105. **Abstracts and corrected galley proofs** should be sent to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163.

**Preparation of manuscripts.** Each manuscript should be typewritten, double spaced with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the style of 33 313-314.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\log \bar{x}$ ) and underlined letters (e.g.,  $\underline{x}$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions are preferably written with the

solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ , and  $ab/cd$  rather than  $\frac{ad}{cd}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

---

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

---

COMPOSED AND PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND 21202 U.S.A.

Second-class postage paid at Baltimore, Maryland 21202 and at additional mailing offices.
