STATISTICAL THEORY AND METHOD ABSTRACTS

A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published moreover a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

Annual Subscription	£7. 10s. (U.S.A. $24.00)
Single Number	£2. 5s. (U.S.A. $ 7.00)
Loose Leaf Binders for Single Abstract Sheets	16s. 3d. including postage and packing.

SANKHYĀ

The Indian Journal of Statistics

CONTENTS OF SERIES A, VOL. 30, PART 2, 1968

Some results on characteristic functions and characterizations of the normal and generalized stable laws
B. Ramachandran and C. Radhakrishna Rao

On a characterization of the normal law.....*P. K. Pathak and R. N. Pillai*

On some characterizations of the normal law.....*R. N. Pillai*

A characterization of the one parameter exponential family by existence of uniformly most powerful tests
Johann Pfanzagl

Some characterizations of the gamma distribution.....*C. G. Khatri and C. Radhakrishna Rao*

Solutions to some functional equations and their applications to characterization of probability distributions
C. G. Khatri and C. Radhakrishna Rao

On the multidimensional central limit theorem.....*V. V. Sazonov*

On ω^2 criterion.....*V. V. Sazonov*

Discounted dynamic programming on compact metric spaces.....*Ashok Maitra*

Book Review

Abstracts of technical reports

Orders for the Journal for distribution outside India are to be sent to:

Pergamon Press Ltd., Headington Hill Hall, Oxford, England

or

Pergamon Press Inc., 122 East 55th Street, Nen York 22, USA

Orders for the Journal for distribution within India are to be sent to:

Statistical Publishing Society,
204/1 Barrackpore Trunk Road,
Calcutta-35, India

JOURNAL OF THE AMERICAN STATISTICAL ASSOCIATION

Volume 63 June 1968 Number 322

Convergence of a Human Population to a Stable Form.....*Ansley J. Coale*

Selected Economic Data—Accuracy vs. Reporting Speed.....*H. O. Stekler and Susan W. Burch*

Linear Approximations to the Census and BLS Seasonal Adjustment Methods.....*Allan Young*

Spectral Evaluation of BLS and Census Revised Seasonal Adjustment.....*Harry M. Rosenblatt*

Functional Form in the Demand for Money.....*Paul Zarembka*

Standard Errors of Indexes from Complex Samples.....*Leslie Kish*

Multivariate Stratified Surveys.....*Samprit Chatterjee*

On Product Moments from a Finite Universe.....*S. N. Nath*

Multinomial Sampling with Partially Categorized Data.....*Saul Blumenthal*

Estimation in a Heteroscedastic Regression Model.....*Hoover C. Rutherford, Jr. and A. Bowers*

A Test of the Mean Square Error Criterion for Restrictions in Linear Regression
T. Dudley Wallace and Carlos Toro-Vizcarrondo

Simultaneous Estimation by Partial Totals for Compartmental Models
J. J. Beauchamp and Richard G. Cornell

Aitken Estimators as a Tool in Allocating Predetermined *a* Aggregates.....*Alan A. Powell*

Some Estimators for a Linear Model with Random Coefficients.....*Clifford Hildreth and James P. Houck*

Improved Estimators for Coefficients in Linear Regression.....*Stanley L. Sclove*

A Modified Compound Poisson Process with Normal Compounding.....*S. James Press*

Two *k*-Sample Slippage Tests.....*William J. Conover*

On a General System of Distributions (Part I and II).....*Irving Burr and Peter J. Cislak*

On a General System of Distributions III. The Sample Range.....*Irving Burr*

Fractional Replications of 2^p Factorial Experiments with the Factors Applied Sequentially
R. R. Prairie and W. J. Zimmer

Optimal Sample Size in Two-Action Problems When the Sample Observations are Lognormal and the Precision *h* is Known.....*Gordon Kaufman*

Robustness of the *F*-Test to Errors of Both Kinds and the Correlation between the Numerator and Denominator of the *F*-Ratio.....*Theodore S. Donaldson*

Posterior Distribution of Percentiles: Bayes' Theorem for Sampling from a Population.....*Bruce M. Hill*

The First-Median Test: A Two Sided Version of the Control Median Test.....*Joseph L. Gastwirth*

Certain Uncorrelated Non-parametric Test Statistics.....*Myles Hollander*

On the Evaluation of Distribution Functions.....*W. R. Schucany and H. L. Gray*

AMERICAN STATISTICAL ASSOCIATION

810 18th Street, N.W. **Washington, D. C. 20006**

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:
Herman Chernoff, Department of Statistics, Stanford University, Stanford, California 94305

President-Elect:
Wassily Hoeffding, Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27514

Executive Secretary:
Leo Katz, Statistical Laboratory, Michigan State University, East Lansing, Michigan 48823

Program Secretary:
Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

Treasurer:
George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

Editor:
Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

Managing Editor:
Paul L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington 99163

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are $20.00 per year for residents of the United States or Canada and $12.00 per year for residents of other countries. Special student rates of $10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics* and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

Notes
A Borel set not containing a graph ..... DAVID BLACKWELL 1345
A note on the weak law of large numbers ..... MELVIN KATZ 1348
On the proportion of observations above sample means in a bivariate normal distribution ..... CHANDAN K. MUSTAFI 1350
Construction of joint probability distributions ..... L. F. KEMP, JR. 1354
Corrections Notes 1358
Abstracts of Papers 1360
News and Notices 1373
Report of the Blackburn, Virginia meeting 1376
Publications Received 1378

MEETINGS OF THE INSTITUTE

EUROPEAN MEETING—Amsterdam, Netherlands, September 2–7, 1968

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
