# STATISTICAL THEORY AND METHOD ABSTRACTS

## A Journal of the International Statistical Institute

The object of this abstracting service is to cover published papers concerned with statistical theory, including relevant aspects of probability and mathematical methods, and new contributions to statistical method. These abstracts provide valuable information on new developments for studying problems in many fields: such as frequency distributions, estimating and testing problems, sampling and experimental designs, variance analysis, spectral theory and other methods in time-series analysis, queueing theory, reliability and acceptance inspection. Journals appearing in all parts of the world, on mathematics and statistics, or on other fields and possible contribution of interest are regularly scanned for suitable papers. Abstracts are also prepared from collections of papers such as reports of conferences, symposia and seminars: technical reports of experiment and research stations are covered.

The abstracts do not exceed 400 words, with occasional "double abstracts" for papers where this size is not sufficient to represent the paper. The language is English; the language of the original paper is indicated. The headings give the name and address of the author together with the Journal in which the paper is published moreover a note is added on the number of references, tables and figures.

The classification scheme which is used in this Journal supplies a division of all abstracts in twelve main sections. The pages of the Journal are colour-tinted in accordance with these main sections. Each section is further sub-divided to indicate the main topic of the paper; a secondary number denotes the most important additional topic referred to by the author. A special index in each part links together these two classifications. This scheme is arranged to facilitate transfer to punch cards. Papers containing new statistical tables are listed in a separate index.

The abstracts are numbered serially, the volume number being inserted as a prefix. The Journal is published four times a year and contains approximately 1,000 abstracts. An author index, the secondary classification index and the new statistical tables index are published in issue and combined in a yearly supplement which also contains a list of all Journals represented in the volume by one or more abstracts.

<i>Annual Subscription</i>	£7. 10s. (U.S.A. \$24.00)
<i>Single Number</i>	£2. 5s. (U.S.A. \$ 7.00)
<i>Loose Leaf Binders for Single Abstract Sheets</i>	16s. 3d. including postage and packing.

# TECHNOMETRICS

## *A Journal of Statistics for the Physical, Chemical and Engineering Sciences*

### CONTENTS

#### TECHNOMETRICS, Vol. 9, No. 3, AUGUST 1967

A Two-Stage Subsampling Procedure for Ranking Means of Finite Populations with an Application to Bulk Sampling Problems	R. E. Bechhofer
Sampling Mixtures of Particles	Martin Knott
Estimation of Variance Components in Two-Stage Nested Designs with Composite Samples	Keith Kussmaul and R. L. Anderson
Estimation of Spectra After Hard Clipping of Gaussian Time Processes	Melvin Hinich
The Determination of Single Sampling Attribute Plans with Given Producer's and Consumer's Risk	A. Hald
Variables Sampling Plans Based on the Normal Distribution	D. B. Owen
Classical and Inverse Regression Methods of Calibration	Richard G. Krutchkoff
An Application of Numerical Integration Techniques to Statistical Tolerancing	David H. Evans

#### NOTES

Methods of Obtaining the Average Sample Run Length of Cumulative Sum Schemes when the Cumulated Parameter is Non-Normal	Kenneth W. Kemp
Confidence Interval for the Availability Ratio	Truman Lewis and H. L. Gray
Three Dimensional Models of Extreme Vertices Designs for Four Component Mixtures	W. J. Diamond
On the Distribution of the Bivariate Range	T. Cacoullos and H. DeCicco
A Note on the Graphical Analysis of Multidimensional Contingency Tables	D. R. Cor and Elizabeth Lauh

#### QUERIES

Degrees of Freedom for Chi-Square	Answered by H. Chernoff
Additional Responses to Query 20	

#### BOOK REVIEWS

The purpose of **TECHNOMETRICS** is to contribute to the development and use of statistical methods in the physical, chemical and engineering sciences. This objective places a high premium on succinct communication among the physical scientist, engineer, statistician and mathematician. The journal will accept for publication papers describing new statistical techniques expected to be useful in these sciences, papers illustrating the application of known statistical methods to new or novel environments, expository or tutorial papers on particular statistical methods, and papers dealing with the philosophy and problems of applying statistical methods to research, development, design and performance. Brief descriptions of problems requiring solution and short technical notes will also be accepted for publication.

For further information please contact **TECHNOMETRICS** Post Office Box 587 Benjamin Franklin Station Washington, D. C. 20004.

# JOURNAL OF THE ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in three series, **SERIES A (GENERAL)**, four issues a year, annual subscription, post free, £5 4s. U. S. \$15: price each part 30s; **SERIES B (METHODOLOGICAL)**, three issues a year, annual subscription post free, £4 2s. U. S. \$12: price each part 35s; **SERIES C (APPLIED STATISTICS)**, three issues a year, annual subscription 30s.; U. S. \$5, price each part 15s.

Reviews; Current Notes; Library Accessions

## Contents of **SERIES B (METHODOLOGICAL)**, Vol. 29, PART 2, 1967

- The analysis of association among many variates (with Discussion) E. J. WILLIAMS  
 On John's cyclic incomplete block designs W. H. CLATWORTHY  
 Formal expression which can be used for the determination of the operating characteristic and average sample number of a simple sequential test K. W. KEMP  
 A simple procedure for determining upper and lower limits for the average sample run length of a cumulative sum scheme K. W. KEMP  
 Models of the second kind in regression analysis P. R. FISK  
 Inferences concerning a population correlation coefficient from one or possibly two samples subsequent to a preliminary test of significance S. R. SRIVASTAVA AND T. A. BANCROFT  
 On a special subset giving an irregular fractional replicate of a 2<sup>n</sup> factorial experiment K. S. BANERJEE AND W. T. FEDERER  
 Optimization of a hot rolling mill D. C. DOWSON  
 A non-parametric test for the bivariate two-sample location problem K. V. MARDIA  
 Non-homogeneous branching Poisson processes P. A. W. LEWIS  
 Methods of estimation involving discounting W. G. GILCHRIST  
 A change-over design for testing a treatment factor at four equally spaced levels I. I. BERENBLUT  
 Tests of hypotheses concerning matched samples B. M. BENNETT  
 Optimum utilization of auxiliary information:  $\pi$ ps sampling of two units from a stratum T. V. HANURAV  
 On the choice of a strategy for a ratio method of estimation T. J. RAO  
 Considering statistical and time averages in a regulation problem E. KOUNIAS  
 On a class of Gaussian processes for which the mean rate of crossings is infinite J. A. McFADDEN

**The Royal Statistical Society 21, Bentinck Street, London, W. 1**

## SANKHYĀ

### *The Indian Journal of Statistics*

CONTENTS OF SERIES A, VOL. 29, PART 2, 1967

- The compound statistical decision problem ..... Ester Samuel  
 The generalized Gompertz-Verhulst family of distributions ..... J. C. Ahuja and Stanley W. Nash  
 A class of permutation tests for stochastic independence, I ..... Pranab Kumar Sen  
 Asymptotic independence of certain statistics connected with the extreme order statistics in a bivariate distribution ..... O. P. Srivastava  
 Asymptotic linearisation of non-linear hypotheses ..... G. A. F. Seber  
 Resolvable cyclic design ..... H. A. David  
 Some explicit results for the queue GI/M/1 with group service ..... U. N. Bhat  
 An r-coin tossing game and the associated partition of generalised Fibonacci numbers ..... S. G. MOHANTY

**NOTE:**

- Wilk's tolerance limit sample size ..... Alvin Jay Harman  
 Book Reviews  
 Abstracts of Technical Reports

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

## OFFICERS

*President:*

Theodore E. Harris, Department of Mathematics, University of Southern California, Los Angeles, California 90007

*President-Elect:*

Herman Chernoff, Department of Statistics, Stanford University, Stanford, California 94305

*Executive Secretary:*

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina 27515

*Program Secretary:*

Joan Raup Rosenblatt, National Bureau of Standards, Washington, D.C. 20234

*Treasurer:*

George J. Resnikoff, Department of Statistics, California State College, Hayward, California 94542

*Editor:*

Z. W. Birnbaum, Department of Mathematics, University of Washington, Seattle, Washington 98105

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS of MATHEMATICAL STATISTICS are \$20.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special student rates of \$10.00 per year are available to students residing in the U.S. and Canada. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

## Contents (Continued)

Confidence interval of preassigned length for the Behrens-Fisher problem	SAIBAL BANERJEE 1175
Confidence intervals for the mean of a finite population.....	V. M. JOSHI 1280
The distribution functions of Tsao's truncated Smirnov statistics...	W. J. CONOVER 1208
On the theory of rank order tests for location in the multivariate one sample problem	PRANAB KUMAR SEN AND MADAN LAL PURI 1216
Asymptotically most powerful rank order tests for grouped data	PRANAB KUMAR SEN 1229
An inequality concerning tests of fit of the Kolmogorov-Smirnov type	GEORGES VANDEWIELE AND MARC NOÉ 1240
Permutations without rising or falling $w$ -sequences	MORTON ABRAMSON AND W. O. J. MOSER 1245
Models for cataloguing problems.....	MARTIN KNOTT 1255
Estimation of probability density by an orthogonal series....	STUART C. SCHWARTZ 1261
Asymptotic expansions associated with the $n$ th power of a density..	R. A. JOHNSON 1266
On the Glivenko-Cantelli theorem for infinite invariant measures	EUGENE M. KLIMKO 1273
<b>Notes</b>	
How to survive a fixed number of fair bets	W. MOLENAAR AND E. A. VAN DER VELDE 1278
Timid play is optimal.....	DAVID FREEDMAN 1281
Timid play is optimal, II.....	DAVID FREEDMAN AND ROGER PURVES 1284
Tests for the equality of covariance matrices under the intraclass correlation model.....	P. R. KRISHNALAH AND P. K. PATHAK 1286
The inverse of a certain matrix, with application.....	CHANDAN K. MUSTAFI 1289
On the construction of cyclic collineations for obtaining a balanced set of $L$ -restrictional prime-powered lattice designs.....	SATI MAZUMDAR 1293
A note on the unimodality of distribution functions of class $L$ ....	TZE-CHIEN SUN 1296
Identifiability of mixtures of product measures.....	HENRY TEICHER 1300
Note on the infinite divisibility of exponential mixtures.....	F. W. STEUTEL 1303
Infinite divisibility of integer-valued random variables.....	S. K. KATTI 1306
Correction Note.....	1309
Abstracts of Papers.....	1310
News and Notices.....	1317
Report of the Atlanta Meeting.....	1318
Publications Received.....	1322

## MEETINGS OF THE INSTITUTE

ANNUAL MEETING - Washington, D. C. - December 27-30, 1967

Abstracts should be submitted in duplicate to the Managing Editor, P. L. Meyer, Department of Mathematics, Washington State University, Pullman, Washington, on abstract blanks which may be obtained from him or from any Secretary or Associate Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Ordinarily, each issue will contain those abstracts received at least 75 days before it appears. Abstracts should be limited to 200 words or the equivalent and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
