

THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE
OF MATHEMATICAL STATISTICS

Contents

	PAGE
Conditioned Limit Theorems.....MEYER DWASS AND SAMUEL KARLIN	1147
A Wiener-Hopf Type Method for a General Random Walk With a Two-Sided Boundary J. H. B. KEMPERMAN	1168
Invariants Under Mixing Which Generalize De Finetti's Theorem: Continuous Times Parameter.....DAVID A. FREEDMAN	1194
Poisson Counts for Random Sequences of Events.....J. F. C. KINGMAN	1217
Combinatorial Results in Fluctuation Theory CHARLES HOBBY AND RONALD PYKE	1233
The Autocorrelation Function of a Sequence Uniformly Distributed Modulo 1 DAVID L. JAGERMAN	1243
The Degree of Randomness in a Stationary Time Series.....CALVIN C. MOORE	1253
The Covariance Matrix of a Continuous Autoregressive Vector Time-Series JOEL N. FRANKLIN	1259
Identifiability of Finite Mixtures.....HENRY TEICHER	1265
Some Non-Central Distribution Problems in Multivariate Analysis A. G. CONSTANTINE	1270
An Asymptotic Expansion for the Distribution of the Linear Discriminant Function MASASHI OKAMOTO	1286
Asymptotic Expansions for a Class of Distribution Functions.....K. C. CHANDA	1302
On Approximations to Sampling Distributions of the Mean for Samples from Non- Normal Populations.....A. REITSMA	1308
Correlation and Complete Dependence of Random Variables.....H. O. LANCASTER	1315
Multiplex Sampling.....DAVID H. EVANS	1322
Efficient Utilization of Non-Numerical Information in Quantitative Analysis: General Theory and the Case of Simple Order..ROBERT P. ABELSON AND JOHN W. TUKEY	1347
An Empirical Bayes Approach to the Testing of Certain Parametric Hypotheses ESTER SAMUEL	1370
On the Asymptotic Behavior of Bayes' Estimates in the Discrete Case DAVID A. FREEDMAN	1386
A Modified Bayes Stopping Rule.....SIGMUND J. AMSTER	1404
On a Paradox Concerning Inference About a Covariance Matrix...A. P. DEMPSTER	1414
Estimation of One or Two Parameters of the Exponential Distribution on the Basis of Suitably Chosen Order Statistics.....GUNNAR KULLDORFF	1419
The Limiting Power of Categorical Data Chi-Square Tests Analogous to Normal Analysis of Variance.....EARL L. DIAMOND	1432
The Relation Between Pitman's Asymptotic Relative Efficiency of Two Tests and the Correlation Coefficient Between Their Test Statistics.CONSTANCE VAN EEDEN	1442
On Multistage Estimation.....J. R. BLUM AND JUDAH ROSENBLATT	1452
On an Analog of Regression Analysis.....P. K. BHATTACHARYA	1459
Existence of Bounded Length Confidence Intervals.....RAJINDER SINGH	1474

(Continued on back cover)

Vol. 34, No. 4 — December, 1963

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are \$20 per volume (four issues of one calendar year) in the U. S. and Canada, \$15 per volume elsewhere. Single issues are \$5.25. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$12 per volume, \$3.50 per issue; issues from 1957 on are \$20 per volume, \$5.25 per issue; for complete sets, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address**, etc., should be addressed to Gerald Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

Editorial Office, Department of Statistics, University of California, Berkeley 4, California. J. L. Hodges, Jr. Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow the new style.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\log \bar{x}$) and underlined letters (e.g., \bar{x}) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$, and ab/cd rather than $\frac{ab}{cd}$.

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland
