ISSN(0091-1798)

THE ANNALS
of
PROBABILITY

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Special Invited Paper

Limit theorems for large deviations and reaction-diffusion equations ..... MARK FREIDLIN 639

Articles

The I-function for diffusion processes with boundaries ..... ROSS PINSKY 676
A classification of diffusion processes with boundaries by their invariant measures ..... ROSS PINSKY 693
Asymptotic behavior of elementary solutions of one-dimensional generalized diffusion equations
NARIYUKI MINAMI, YUKIO OGURA, AND MATSUYO TOMISAKI 698
Approximations of solutions of stochastic differential equations driven by semimartingales ..... PHILIP PROTTER 716
The stationary distribution of reflected Brownian motion in a planar region
J. M. HARRISON, H. J. LANDAU, AND L. A. SHEPP 744
Recurrence classification and invariant measure for reflected Brownian motion in a wedge ..... R. J. WILLIAMS 758
Brownian slow points: The critical case ..... BURGESS DAVIS AND EDWIN PERKINS 779
Optimal prediction of level crossings in Gaussian processes and sequences
GEORG LINDGREN 804
The LIL when X is in the domain of attraction of a Gaussian law ..... J. KUELBS 825
The space $D(A)$ and weak convergence for set-indexed processes
RICHARD F. BASS AND RONALD PYKE 860
Convergence of quadratic forms in p-stable random variables and θ_p-radonifying operators
STAMATIS CAMBANIS, JAN ROSINSKI, AND WOJBOR A. WOYCZYNSKI 885
De Finetti-type theorems: An analytical approach ..... PAUL RESSEL 898
Critical branching processes with nonhomogeneous migration
N. M. YANEV AND K. V. MITOV 923
Invariance properties of the conditional independence relation
C. VAN PUTTEN AND J. H. VAN SCHUPPEN 934
On randomized tactics and optimal stopping in the plane ..... ANNIE MILLET 946
On an inequality of Chernoff ..... CHRIS A. J. KLAASSEN 966
An iterative procedure for obtaining I-projections onto the intersection of convex sets ..... RICHARD L. DYKSTRA 975
On regularity of Banach-valued processes ..... NIKOS E. FRANGOS 985
On the coverage of k-dimensional space by k-dimensional spheres ..... PETER HALL 991

Short Communications

The size of an analytic function as measured by Lévy's time change
TERRY R. MCCONNELL 1003
Brownian paths and cones ..... KRZYSZTOF BURDZY 1006
On the range of Brownian motion and its inverse process ..... J.-P. IMHOF 1011
A note on a limit theorem for differentiable mappings ..... K. A. BOROVKOV 1018
Bochner's theorem in measurable dual of type 2 Banach space ..... YOSHIAKI OKAZAKI 1022
Rotational representations of stochastic matrices ..... JOHN HAIGH 1024
Two examples concerning a theorem of Burgess and Mauldin ..... LUTZ W. WEIS 1028

Vol. 13, No. 3—August 1985
50th Anniversary Year

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Probability.* www.jstor.org

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS AND EDITORS

President:
Oscar Kempthorne, Department of Statistics, 111B Snedecor Hall, Iowa State University, Ames, Iowa 50011

President-Elect:
Paul Meier, Department of Statistics, University of Chicago, 5734 University Avenue, Chicago, Illinois 60637

Past-President:
Ingram Olkin, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

Executive Secretary:
Francisco J. Samaniego, Division of Statistics, 469 Kerr Hall, University of California, Davis, California 95616

Treasurer:
Bruce E. Trumbo, Department of Statistics, California State University, Hayward. *Please send correspondence to:* IMS Business Office, 3401 Investment Blvd., Suite 7, Hayward, California 94545

Program Secretary:
Richard A. Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706

Editor: *The Annals of Statistics*
Michael D. Perlman, Department of Statistics GN-22, University of Washington, Seattle, Washington 98195

Editor: *The Annals of Probability*
Thomas M. Liggett, Department of Mathematics, University of California, Los Angeles, California 90024

Executive Editor: *Statistical Science*
Morris H. DeGroot, Department of Statistics, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213

Editor: *The IMS Bulletin*
William C. Guenther, Department of Statistics, University of Wyoming, Laramie. *Please send correspondence to:* Box 3332 University Station, Laramie, Wyoming 82071

Editor: *The IMS Lecture Notes—Monograph Series*
Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:
Prem K. Goel, Department of Statistics, 1958 Neil Avenue, The Ohio State University, Columbus, Ohio 43210

Official Journals. The official journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *The Institute of Mathematical Statistics Bulletin.*

Individual, Institutional and Corporate Memberships. All *individual members* receive the *Bulletin.* Annual dues for individual membership depend upon the journals selected ($52 for both *Annals*/$40 for one *Annals*). Dues allocations to each journal are set by Council resolution for regular members at $6 for *The IMS Bulletin* and $34 for one *Annals* or $23 for each *Annals.* Subject to some restrictions, memberships are available at reduced rates for students ($21/$17), residents of developing countries ($35/$28), and retired members ($11/$6/$1 for the *Bulletin* only). *Institutional memberships* are available to nonprofit organizations at $215 per year and *Corporate memberships* are available to other organizations at $500 per year. Institutional and corporate memberships include two multiple-readership copies of all three journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1985 are available to *The Annals of Statistics* ($45), *The Annals of Probability* ($45), and *The IMS Bulletin* ($11).

General subscriptions are for libraries, institutions, and any multiple-readership use. General subscriptions for 1985 are available to *The Annals of Statistics* ($75), *The Annals of Probability* ($70), both *Annals* ($140), and *The IMS Bulletin* ($20). Air mail rates for overseas delivery of general subscriptions are $40 per subscription.

Correspondence. Mail to IMS should be sent to the Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production).

The Annals of Probability **(ISSN 0091–1798),** Volume 13, Number 3, August, 1985. Published in February, May, August and November by the Institute of Mathematical Statistics, 3401 Investment Blvd., #7, Hayward, California 94545. Printed at the Waverly Press, Inc., Baltimore, Maryland 21202. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster.** Send address changes to *The Annals of Probability*, Institute of Mathematical Statistics, 3401 Investment Blvd., #7, Hayward, California 94545.

EDITORIAL POLICY

The main purpose of *The Annals of Probability* and *The Annals of Statistics* is to publish contributions to the theory of probability and statistics and to their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

THE ANNALS OF PROBABILITY

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of *The Annals of Probability.* (For current address, see the latest issue of the *Annals.*) Three copies should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Two copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters. For example, an article with the title "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law" could have the running head, "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law" depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear. List your permanent mailing address after the references.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be selfcontained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index*-1980. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one", "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\dfrac{a + b}{c + d}$, and $(2\pi)^{-1}$ or $1/(2\pi)$ to $\dfrac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred to a^{b_c} and a_{b_c}, respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Révész, P. (1982). Admissibility of conditional confidence procedures. *Ann. Probab.* **10** 613–622.

In textual material, the format "... Révész (1982) ..." should be used. Multiple references can be distinguished as "... Révész (1982a) ...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews.*

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to: Science Typographers Inc., 15 Industrial Blvd., Medford, L. I., NY 11763.
