

For those of you who need to know what's happening in statistics . . .

The Institute of Mathematical Statistics
and
The American Statistical Association

announce publication of Volume Two of

**CURRENT INDEX TO STATISTICS:
APPLICATIONS, METHODS AND
THEORY**

An annual computerized index to the statistical literature

Coverage—Over 4,000 articles in “core” and “related” journals for 1976 are indexed. Author index & index by key words. Example of subject index (complete reference to journal, volume, pages, etc., is given):

Important word

Asymptotic Properties of Non-linear Least Squares Estimators • R. I. Jennrich
Interval Estimation of Non-linear Parametric Functions • Halpern, Mantel
Interval Estimation of Non-linear Parametric Functions, II • M. Halpern
On a Problem in Non-linear Prediction Theory • J. B. Robertson
Convergence in Non-linear Regression • T. Tornheim
Non-linear Regression with Minimal Assumptions • H. M. Wagner

Key word

Who should subscribe—All individuals who spend any significant fraction of their time doing statistics. Anyone who spends more than *one hour per year* looking for an article on a particular topic in statistics or redeveloping some technique that already exists in the literature will find it cost effective to have a personal copy of this index.

Editor—Brian L. Joiner, University of Wisconsin.

Management Committee—Wilfrid J. Dixon, Chairman; Donna R. Brogan, Robert M. Elashoff, David C. Hoaglin, Donald R. Truax

Subscription Rates— \$9.00 for members of the two sponsoring societies
\$12.00 for other individuals
\$18.00 for organizational/library subscriptions
(Volume One, covering 1975 journals, available at the same rate.)
