

THE ANNALS of STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Asymptotic Theory

- Explicit limit results for minimal sufficient statistics and maximum likelihood estimators in some Markov processes: exponential families approach
VALERI T. STEFANOV 1073
- Asymptotically efficient estimation in semiparametric generalized linear models
HUNG CHEN 1102

Contingency Tables

- Prediction functions for categorical panel data . . . ZVI GILULA AND SHELBY J. HABERMAN 1130
- A geometric combination estimator for d -dimensional ordinal sparse contingency tables JIANPING DONG AND JEFFREY S. SIMONOFF 1143
- Convergence of the iterative proportional fitting procedure LUDGER RÜSCHENDORF 1160

Curve Estimation

- Splines as local smoothers. DOUGLAS NYCHKA 1175
- Asymptotics for the transformation kernel density estimator
OLA HÖSSJER AND DAVID RUPPERT 1198

Experimental Design

- Some projection properties of orthogonal arrays CHING-SHUI CHENG 1223
- An optimum design for estimating the first derivative
ROY V. ERICKSON, VÁCLAV FABIAN AND JAN MAŘÍK 1234
- Optimal designs for identifying the degree of a polynomial regression . . HOLGER DETTE 1248

Image Analysis

- A study of least squares and maximum likelihood for image reconstruction in positron emission tomography FINBARR O'SULLIVAN 1267

Resampling

- Asymptotic iterated bootstrap confidence intervals
STEPHEN M. S. LEE AND G. ALASTAIR YOUNG 1301
- On the asymptotic behaviour of the moving block bootstrap for normalized sums of heavy-tail random variables S. N. LAHIRI 1331

Sequential Methods

- A robust surveillance scheme for stochastically ordered alternatives
LOUIS GORDON AND MOSHE POLLAK 1350
- Sequential nonparametric estimation with assigned risk SAM EFROMOVICH 1376

Testing and Confidence

- A general classification rule for probability measures
SANJEEV R. KULKARNI AND OFER ZEITOUNI 1393
- A new general method for constructing confidence sets in arbitrary dimensions: with applications A. DASGUPTA, J. K. GHOSH AND M. M. ZEN 1408
- Robustness of standard confidence intervals for location parameters under departure from normality SANJIB BASU AND ANIRBAN DASGUPTA 1433

Vol. 23, No. 4—August 1995

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.

OFFICERS AND EDITORS

- President:** James O. Berger, Department of Statistics, Purdue University, West Lafayette, Indiana 47907-1399
- President-Elect:** Nancy Reid, Department of Statistics, University of Toronto, 100 St. George Street, Toronto, Ontario M5S 1A1, Canada
- Past President:** David R. Brillinger, Department of Statistics, University of California, Berkeley, California 94720-0001
- Executive Secretary:** Hari G. Mukerjee, Department of Mathematics and Statistics, Wichita State University, Wichita, Kansas 67208-0033
- Treasurer:** Miriam Gasko Donoho, Department of Marketing and Quantitative Studies, College of Business, San Jose State University, 1 Washington Square, San Jose, California 95192-0069
- Program Secretary:** Jon A. Wellner, Department of Statistics GN-22, University of Washington, Seattle, Washington 98195
- Editors, *The Annals of Statistics*:** Lawrence D. Brown, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302; John Rice, Department of Statistics, Evans Hall, University of California, Berkeley, California 94720
- Editor, *The Annals of Probability*:** James W. Pitman, Department of Statistics, University of California, Berkeley, California 94720-0001
- Editor, *The Annals of Applied Probability*:** Richard L. Tweedie, Department of Statistics, Colorado State University, Fort Collins, Colorado 80523
- Executive Editor, *Statistical Science*:** Paul Switzer, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305
- Editor, *The IMS Bulletin*:** Susan R. Wilson, Centre for Mathematics and its Applications, School of Mathematical Sciences, Australian National University, Canberra ACT 0200, Australia
- Editor, *IMS Lecture Notes—Monograph Series*:** David Ruppert, School of Operations Research and Industrial Engineering, E & TC Building, Cornell University, Ithaca, New York 14853-7501
- Managing Editor:** John R. Collins, Department of Mathematics and Statistics, University of Calgary, 2500 University Drive NW, Calgary, Alberta, Canada T2N 1N4
- Managing Editor:** Paul J. Smith, Director, Statistics Laboratory, Department of Mathematics, University of Maryland, College Park, Maryland 20742
-

Journals. The scientific journals of the Institute are *The Annals of Applied Statistics*, *The Annals of Probability*, *The Annals of Statistics* and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual and Organizational Memberships. All individual members pay basic membership dues of \$60. Each individual member must elect to receive at least one scientific journal for an additional amount, as follows: *The Annals of Applied Probability* (\$15), *The Annals of Probability* (\$20), *The Annals of Statistics* (\$25) or *Statistical Science* (\$10). Of the total due dues paid, \$29 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Reduced membership dues are available to full-time students, permanent residents of countries designated by the IMS Council and retired members. Retired members may elect to receive the *Bulletin* only for \$24. *Organizational memberships* are available to nonprofit organizations at \$450 per year and to for-profit organizations at \$750 per year. Organizational memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1995 are available to *The Annals of Applied Probability* (\$80), *The Annals of Probability* (\$85), *The Annals of Statistics* (\$90), *The IMS Bulletin* (\$50) and *Statistical Science* (\$75). *General subscriptions* are for libraries, institutions and any multiple-readership use. General subscriptions for 1995 are available to the *The Annals of Applied Probability* (\$90), *The Annals of Probability* (\$130), *The Annals of Statistics* (\$150), *The IMS Bulletin* (\$50) and *Statistical Science* (\$75). Air mail rates for delivery outside North America are \$80 per title (excluding the *The IMS Bulletin*).

Permissions policy. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$5.00 per copy, plus \$0.00 per page is paid directly to the Copyright Clearance Center, 222 Rosewood Drive, Danvers, Massachusetts 01923. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 1050-5164/95 \$5.00 + 0.00.

Correspondence. Mail concerning membership, subscriptions, nonreceipt claims, copyright permissions, advertising or back issues should be sent to the IMS Business Office. Mail concerning submissions or editorial content should be sent to the Editor of the appropriate journal. Their addresses are listed above. Mail concerning the production of this journal should be sent to: Linda A. Pratt, IMS Production Editor, P.O. Box 1302, Mattituck, New York 11952-0924.

***The Annals of Statistics* (ISSN 0090-5364)**, Volume 23, Number 4, August 1995. Published quarterly by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545-3819-18. Second-class postage paid at Hayward, California and at additional mailing offices.

POSTMASTER: Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545-3819-18.

EDITORIAL POLICY

As editors of *The Annals of Statistics*, it is our policy to publish research of the highest quality reflecting the many facets of contemporary statistics. Primary emphasis is placed on importance and originality.

The discipline of statistics has deep roots in classical mathematical analysis, from which it derives rigor, coherence and clarity, and is also dependent on roots in substantive scientific areas for its historical foundation and continued vitality. In the last twenty years, computational developments have had profound consequences which should also be reflected in the *Annals*. Consequently, our policy is to continue to play a special role in presenting research at the forefront of mathematical statistics, especially the more important and deep advances in the theory underlying statistical science. At the same time, we also intend to publish papers relating to the role of statistics in interdisciplinary investigations of the major scientific and social problems of our time and to emphasize developments in computational methodology. Mathematical depth and difficulty will not be the principal criteria with respect to which submissions in the latter categories are evaluated. Fundamentally, we seek a broad spectrum of papers which intellectually enriches our profession.

Most papers should contain an introduction which presents a discussion of the context and importance of the issues they address and a clear, nontechnical description of the main results. The introduction should be accessible to a wide range of readers. Thus, for example, it may be appropriate in some papers to present special cases or examples prior to general, abstract formulations, while in other papers discussion of the general scientific context of a problem might be a helpful prelude to the body of the paper.

Manuscripts submitted to *The Annals of Statistics* should be sent to:

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) **Four copies** should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

Preparation of Manuscript. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Electronic Submission of Accepted Papers. You are encouraged to submit papers written in some form of \TeX . All forms of \TeX (e.g. \LaTeX , \AMS-TeX etc.) are acceptable. Please do not send a disk with your original submission. On acceptance of a paper written in \TeX , you will be asked to provide an electronic copy for the Production Editor, either on a 3 $\frac{1}{2}$ -inch disk or by e-mail.

Submission of Reference Papers. Two copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters.

Affiliation and Addresses. Indicate your present institutional affiliation as you would like it to appear. List the permanent mailing address of each author after the references.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

AMS 1991 subject classifications. Primary—;
secondary—.

Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1991*. The key words and phrases should describe the subject mat-

ter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between “oh” and “zero,” “ell” and “one,” “epsilon” and “element of,” “summation” and “capital sigma,” etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any hand-written symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions in the text are preferably written with the solidus or negative exponent; thus, $(a + b)/(c + d)$ is preferred to $\frac{a+b}{c+d}$, and $(2\pi)^{-1}$ or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred to a^{bc} and a_{bc} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836–865.

In textual material, the format “. . . Kiefer (1976) . . .” should be used. Multiple references can be distinguished as “. . . Kiefer (1976a) . . .”. Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Copyright, Page Charges and Offprints. Page charges are \$45 per printed page. Payment of some or all of the estimated page charges associated with articles is strongly encouraged. The editorial review of articles and administration of page charges are completely separate activities. Manuscripts are reviewed and accepted prior to determining whether page charges will be paid.

Corresponding authors receive 25 gratis offprints. Offprints of discussion articles include the main article(s), discussion(s) and rejoinder(s) as a package. Corresponding authors of main articles receive 25 gratis offprints; corresponding discussants receive 10 gratis offprints. Additional offprints may be purchased by using the IMS Offprint Purchase Order Form accompanying the galley.

Copyright transfer, page charges and offprints are the responsibility of the IMS Business Manager.

Galley Proofs. The corresponding author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Technical Typesetting Inc., 1510 Caton Center Drive, Suite E, Baltimore, MD 21227.
